- X NO ARTIFICIAL COLOURS
- X NO PRESERVATIVES

**PRODUCT DESCRIPTION**

Electrolytes blend to use during prolonged endurance and multi-day performances in the heat.

2 Salt Caps in combination with water work well as an energy-free electrolyte drink. Appropriate to promote the fat metabolism during low glycogene training. In combination with carbohydrates you can create your own “self-made” sports drink.

Carbohydrate-electrolyte solutions enhance the absorption of water during physical exercise and contribute to the maintenance of endurance performance during longlasting endurance exertions. Furthermore, Zinc contributes to a normal fatty acid metabolism.

**ADVANTAGES**

- **2 capsules with 400 mg sodium, correspond to 750-1000 ml sport drink**
- **Practical intake thanks capsules**
- **Prior or during competitions in hot climate**
- **Appropriate for an individualised electrolyt intake**

**UTILISATION**

Intake of the capsules with sufficient water or open the capsules and add the powder to water or other solutions.

Adding the content of 2 capsules in a 500 ml drink containing carbohydrates creates a suitable carbohydrate-electrolyt solution for sport (sport drink).

Consider sodium content of other drinks or food ingested concurrently. Do not exceed recommendations. Keep out of children's reach. Does not substitute for a varied and balanced diet.

**INGREDIENTS**

sodium chloride, sodium citrate, potassium citrate, vegetable capsule (E464), calcium citrate, magnesium citrate, potassium chloride, zinc gluconate, antiagglomerant magnesium stearate.

1 capsule = 940 mg
