PRODUCT DESCRIPTION

SPONSER® - PREMIUM WHEY HYDRO provides a high quality protein matrix based on protein hydrolysates to help build and maintain the muscle mass. Hydrolysates are typically enzymatically “pre-digested” or pre-cleaved proteins and offer an absorption advantage compared to intact proteins. Using only Whey Protein from Cross Flow Microfiltration (CFM) guarantees a natural protein quality.

Additionally complemented with the quality raw materials PepForm® BCAA and WHEY CFM NITRO® for increased peptide bound BCAA content per g of pure protein. WHEY CFM NITRO is a patented raw material with bioactive peptides from whey protein to activate NO (nitric oxid) metabolism and improve oxygen utilization.

HMB (beta-hydroxy-beta-methylbutyrate) is an organic acid that occurs naturally in the human body and is synthesized from the essential amino acid L-leucine. Power athletes, bodybuilders and intensively training athletes use HMB in high-intensity phases.

PREMIUM WHEY HYDRO is lactose-free, virtually fat and carbohydrate-free and thus provides high-quality training support for power and endurance.

ADVANTAGES

- **High quality protein matrix with maximum functionality**
- **Rich in BCAA 5700 mg / serving (30 g)**
- **Enriched with WHEY CFM NITRO for NO metabolism**
- **Additionally enriched with HMB**
- **With vitamins, magnesium and zinc**

APPLICATION

In high-intensity phases, depending on the protein needs, about 30 minutes before or within 30 minutes after training.

In addition to a varied and balanced diet as well as a healthy lifestyle.
