

XPORTDIGITALS

Whitepaper Rev 1.0

C

♂ /XPortDigitals

XPortDigitals aims to unite two concepts that have emerged as alternatives to the formal financial system: importation/exportation of services and cryptocurrencies. On other words, it is a Platformbased project to exchange services for cryptos between people.

1. Introduction

Our development team believes that blockchain technology and its applications have arrived to democratize the global financial system allowing the access to a different number of people who are excluded from the banks.

CrowdDreaming aims to unite two concepts that have emerged as alternatives to the formal financial system: Services and cryptocurrencies.

A Services exchange platform using cryptocurrencies.

XPortDigitals main objective will be to facilitate the community exchange of services with many different purposes, like graphic designs, programation web, development of smart contracts, advice, marketing and so on.

2. Why export services for cryptos?

There are no third parties involved, there are no banks, no public entities, and the funds are not in the hands of intermediaries. It is the contact between people with similar ideas.

What we try today would not have been possible without Bitcoin, Ethereum and the blockchain technology. Through it, is possible to share value digitally, and no third parties are required to validate the actions.

We all know the huge changes that Internet has made in the development of mankind. It has modified several aspects of our life, such as communication, social interactions, and commerce at the same time that it reduced the costs of investigating, collaborate and exchange information. In today world connectivity is of utmost importance to Access to employment, educational and economic opportunities. The active participation of the virtual community is fundamental. According to a World Bank report, about 2500 million people do not use formal financial services and 75% of the poor do not have a bank account

As it has been said, XPortDigitals emerged as an alternative means of business that dispenses with traditional financial institutions. Many of the services that obtain money with this proposal would not have been successful if they had resorted to the traditional bank system to get it. The cost of capital through the bank varies from country to country and the bureaucratic procedures are often cumbersome, expensive and restrictive. **XPortDigital project is a collective solution.** Cryptocurrencies also dispense of third parties and include people excluded from formal financial services. (According to a World Bank report, about 2500 million people do not use formal financial services and 75% of the poor do not have a bank account.)

Unlike the formal banking system, the access to an alternative crypto economy is a viable and possible option for the excluded sectors. All that is needed to participate is an internet connection.

ADVANTAGES OF USING CRYPTOCURRENCIES

- Cryptocurrencies allow transactions from person to person quickly and safely without high commissions.
- They are not controlled by any bank or financial institution. It is also a mode of access to capital that does not depend on third parties that perform intermediation functions.
- They also constitute digital values and are alternative means of payment to traditional money.
- They allow privacy to be preserved when making transactions and can be used almost anywhere in the world.

3. Launching of Platform

FIRST STAGE: Build the platform

To meet this objective, we will organize a crowdsale of XPDS, the funds will be used to finance the platform.

SECOND STAGE:

After the initial phase, the platform can be used to publish services that wish to be hired through XPortDigitals.

How it will works?

You have a digital service to offer

01

04 Disseminate your digital

service through the website and the social networks

Submit the information to XPortDigitals

02

05

The community members will see your post according with their preference settings

We review it and approve the visibility

You will be able to export your digital service to members. Satisfaction points will be shared to improve both reputations.

XPDS will be on the XPortDigitals platform and will work, along with other cryptocurrencies. Also will be available on decentralized exchanges

SPECIFICATIONS

Name: XPortDigitals

Contract: 0xf23fD8e6C2eDa7E4D2a5638C8256Bd516F7C6A73

Symbol: XPDS

Decimals: 2

Total Supply: 86,000,000,000 XPDS

Protocol: ERC20 on Ethereum network

Wallet compatibility: Myetherwallet, Metamask and more.

Code verification: Green mark on Etherscan

Link of verification

Like other cryptocurrencies, XPDS is fungible and transferable, and it

will be expected to trade on cryptocurrency exchanges.

5. XPDS First Distribution

THE DISTRIBUTION IS AS FOLLOWS:

6. Roadmap

Ju

July 2019

Project presentation: Whitepaper release.

Q3 2018

- First crowdsale
- Website
- Content development

Q4 2018

- Second Crowdsale to raise funds to XPortDigital platform

Q1 2020

- Launching of XPortDigital platform
- Marketing campaign

Q2 2020

New Roadmap

7. Dev Team

ALEJANDRO FERNANDEZ

Software Developer Computer engineer student (specialized in distributed systems)

COMING SOON

Graphic designer & web designer

COMING SOON

Community Manager

COMING SOON

WebMaster
