

Have You Seen What's Lighting Up Modern Escalators?

Mathis Electronics Under-Step Demarcation Light

**Multi-volt 24V-
115V AC**

Extended Life – Depending on conditions, our LED demarcation light can provide up to 50,000 hours of continuous service without significant dimming. We give a **Lifetime Warranty** on every unit. That results in **Greater Safety** for your passengers and **Lower Liability** for you.

Inexpensive – As far as we are aware, our MES798 is the most economical LED demarcation available.

Water Resistant – The MES798 demarcation light is poured in epoxy, making it almost impossible for water to get into it.

Practicality – Unlike fluorescent units which light up the entire machine area, the MES798 emits bright points of green light directed toward the passenger's eyes, signaling him or her that he/she is approaching a danger point. The overall light output of our LED demarcation light is less than that of a fluorescent unit, but it is only directed where it is needed, and is much brighter at the LEDs than at any point on a fluorescent tube (see data sheet).

Does it meet the code? Yes, it does! If your inspector is questioning whether or not LED demarcation lights meet the code for elevators/escalators, please contact us for more information.

Lower Power Consumption – Our MES798 demarcation light is a **GREEN** product (no pun intended). It consumes up to 5 watt of power, compared to the approximately 35w consumed by a typical fluorescent unit. The unit can pay for itself in energy savings in a year or two.

**MES798 (24-115VAC)
\$81.77 ea at qty = 30+
\$136.09 ea at qty = < 30**
