WARNING

READ ALL SAFETY INSTRUCTIONS BEFORE USE.

To avoid electric shock, special care should be taken since water is employed in the use of aquarium equipment. For each of the following situations, do not attempt to repair yourself. Return the appliance to an authorized service facility for service or discard the appliance.

Carefully examine the appliance after installation. It should not be plugged in if there is water on parts not intended to be wet.

Do not operate any appliance if it has a damaged cord or plug, or if it is malfunctioning or if it is dropped or damaged in any manner.

To avoid the possibility of the appliance plug or receptacle getting wet, position aquarium to one side of a wall mounted receptacle to prevent water from dripping onto the receptacle plug. A “Drip Loop” should be arranged by the user for EACH cord connecting an aquarium appliance to a receptacle. The “Drip Loop” is that part of the cord below the level of the receptacle or the connector if an extension cord is used. This “Drip Loop” prevents water travelling along the cord and coming in contact with the receptacle. If the plug or the receptacle do get wet DO NOT unplug the cord. Disconnect the fuse to the circuit breaker that supplies power to the appliance. Then unplug and examine for the presence of water in the receptacle.

Close supervision is necessary when any appliance is used by or near children.

Always unplug an appliance from the outlet when not in use, before putting on or taking off parts, and before cleaning. Never yank the cord to pull plug from outlet. Grasp the plug and pull to disconnect.

Do not use an appliance for other than intended use. The use of attachments not recommended or sold by the appliance manufacturer may cause an unsafe condition.

Do not install or store the appliance where it will be exposed to the weather or to temperatures below freezing.

Make sure an appliance mounted on a tank is securely installed before operating it.

Read and observe all the important notices on the appliance.

This appliance has a polarized plug (one blade is wider than the other). As a safety feature, this plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Never use with an extension cord unless plug can be fully inserted. Do not attempt to defeat this safety feature.

If an extension cord is necessary, a cord with a proper rating should be used.

PARTS

Please inspect your new ChaetoMax™ Refugium LED Light and confirm all parts are included before assembly.

Immediately report if there is any damage or missing parts to: warranty@innovative-marine.com

Your ChaetoMax™ Refugium LED Light purchase should include:

- 1 x ChaetoMax™ Refugium LED Light
- 2 x Accent Bars
- 1 x Cord Manager
- 2 x Sump Neck Module Screws
- 1 x Sump Neck Module
- 2 x Sump Arm Bracket Screws
- 1 x Sump Arm Bracket
- 2 x Sump Arm Screws
- 4 x Adhesive Hook and Loop Fastener Pieces (9W)
- 5 x Adhesive Hook and Loop Fastener Pieces (18W)

CheatoMax 9W - 7602

①	9W ChaetoMax LED Light	760201
②	Accent Bars	760202
③	Cord Manager Module	760203
④	Sump Neck Module	760204
⑤	2 x Sump Neck Screws (small)	760205
⑥	Sump Arm Module	760206
⑦	Sump Arm Bracket	760207
⑧	2 x Sump Arm Bracket Screws	760208
⑨	2 x Sump Arm Screws (large)	760210
⑩	Euro Brace Arm Module	760211
