

Email showing my claims hidden from me and given to Bergman to handle my claims of malpractice against Brady and possibly Frankfort. In order for Frankfort of the Houston Bar on ADR and Brady to be protected, possibly Bergman needed to get me to sign anything so that they could later change the document to include broad protections against these lawyers and themselves for conspiring. I believe this is what happened as the printed agreement, never signed, looked nothing like the several originals, and included all releases against everyone including the lawyers. Instead of zealous representation of my lawyers, I was incessantly threatened for not signing the agreement and abandoned. The only reason for not zealously representing me was to possibly ensure the protections for these lawyers and also themselves for having conspired and joined more into the conspiracy. All of this and I find out in 2018 that my revoking the family court agreement lacking the family remedy 6.602 voided the agreement right then and the lack of action on the agreement voided the agreement a year later; yet, all of my lawyers failed to inform me that I still owned my company for what reason appears was to protect themselves for conspiring to protect Brady and what appears Frankfort. This email starts it all.

Yes. I think we should let that stew until mediation, including the stuff in our mediation memorandum, and tell Bergman that he can handle it.

Can Wendy bring a derivative lawsuit for malpractice against Brady?
