

SHOWER CLEARMIRROR™

FIVE-STAR LUXURY

The Shower ClearMirror is a patented, low-voltage bathroom mirror defogger and mirror for a shower or steam room. The thin heater adhered to the back of a mirror is powered by the same circuit as the bathroom light fixture, fan or separate switch.

When turned on, the pad gently heats up, preventing condensation on the surface of the mirror. The Shower ClearMirror installs flush with the bathroom shower surround. A low-voltage transformer, or a low-voltage system provides safe electrical current. The plug-in transformer is located below the vanity, in a soffit or attic space, an adjoining closet, or other accessible space.

Details

- Fully assembled. Heater mounted to the back side of the mirror.
- Mirror mounts flush with the tile surround.
- **UL LISTED** for use in showers and steam showers.
- 24" 18 gauge wire leads centered on the back of the mirror.
