

BUFFALO FORGE

THERMAPLUS® STEEL ENTRY DOORS

GLASS★CRAFT®
DOOR COMPANY

ABOUT GLASSCRAFT

Founded in 1977, GlassCraft Door Company has become a premier manufacturer of premium wood, composite and steel entryways in the USA. By providing the best value to customers and focusing on product quality, innovation, and service, GlassCraft has established itself as a trusted brand in the residential home building industry.

From its 198,000 square foot manufacturing facility in Houston, Texas, GlassCraft's teams of dedicated artisans, designers and master craftsmen continues to create a selection of the most beautiful doors, decorative glass windows and entryways available. This dedication to excellence is built into each product and continues with industry leading customer service and product warranties.

Since 1977

Cover Photo: 6'0" x 8'0" ThermaPlus double Arch Top Continental 4 Lite door with Water glass, French Grey Satin finish and San Jose handleset; on this page: 3'0" x 8'0" Contemporary Beverly door with French Grey Satin finish, Reeds glass and Savoy handleset.

THE BUFFALO FORGE STEEL THERMAPLUS®

WHAT is the Buffalo Forge Steel ThermaPLUS?

GlassCraft has redefined steel doors and made them better with Buffalo Forge Steel ThermaPlus. This series of doors combines the benefits of **STEEL** and **COMPOSITE** into one innovative door product.

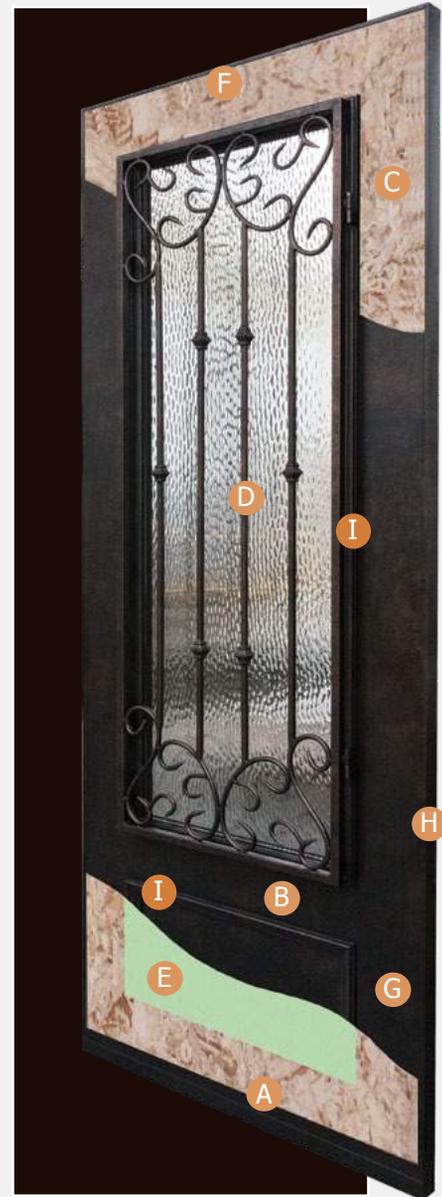

WHY Buffalo Forge Steel THERMAPLUS?

- 1) Excellent Price/Great Value - Priced at 40% less than other so-called premium steel and wrought iron doors while offering many innovative features in one unique door product line.
- 2) Field-Trimable for an exact fit - These doors can be field-trimmed for an exact fit. With the use of common power tools, the edges may be trimmed up to 1/4 inch on both sides and the top edge, and by 1.5 inches on the bottom edge. The doors are available in "full-book" sizing of 36" x 80", 36" x 96", and 42" x 96" and are offered pre-finished only, but may also be painted.
- 3) Thermally Broken to prevent heat and cold transfer from exterior to interior - GlassCraft's patent-pending design provides a thermal-break around all four door edges and the core to ensure efficient thermal performance. This ensures that summer heat or winter cold does not wrap around the edges of the door and radiate into the home. Other doors can actually freeze or frost over on the inside during the winter, or sweat with condensation during the summer months.
- 4) Security - Built strong and secure with 18 gauge dent-resistant and kick-proof steel. Also available with multipoint locks and StrikeJamb™ reinforcement.
- 5) In-Stock for short lead time - All Buffalo Forge ThermaPlus entryways shown in this catalog are in stock and available for immediate shipment. No long waits.
- 6) Uses standard door hardware - Available with standard one-point and multi-point locks.
- 7) Available as pre-hung with ready-to-install system or as door-only that can fit into existing frames - The pre-hung unit includes a vinyl weather-strip system and a 100% composite threshold that will not rot or warp.
- 8) Raised Mouldings — ThermaPlus doors include unique raised mouldings around glass panels and / or flat solid door panels. These raised mouldings are included on both the front and inside sides of the door.

DOOR CONSTRUCTION of BUFFALO FORGE THERMAPLUS

Strength Matters

- A** All door edges are trimmable, to allow for a perfect fit. 1/4" trim allowed on top and sides, and 1-1/2" on the bottom edge.
- B** Six beautiful prefinish options provide a durable finish in several colors and textures.
- C** LSL-Laminated Strand Lumber beams used on door stiles and rails provide the strongest steel door available! No "lock-blocks" used or needed. The entire door stile is a LSL beam!
- D** Real hand wrought iron mounted to a composite frame that can open for cleaning or be secured in the closed position.
- E** The core of the 1 inch thick door panels are filled with insulating foam.
- F** All four door edges utilize 100% recycled composite content that is completely rot-resistant and waterproof.
- G** Super-thick 18 gauge steel skin is 3 times thicker than ordinary steel door skins. Dent-resistant!
- H** Doors are a full 1-3/4" thick—thicker than other so-called premium steel doors to allow for the use of standard door hardware or you can use multipoint locks!
- I** All doors feature raised moulding around glass and flat solid panels...and on BOTH sides of the door. This matching moulding is unique to GlassCraft ThermaPlus doors!

Thermally broken, strong and sustainable.

Patented and Award-Winning ThermaPlus door design

GlassCraft Buffalo Forge Steel ThermaPlus doors offer the best choice steel entry doors available! The Buffalo Forge ThermaPlus Steel Composite line is GlassCraft's answer to two specific product problems: creating a steel door with a high-end look that could be trimmed in the field during installation, and adding a thermal break— not available in other high-end steel and wrought iron product lines—to prevent hot/cold exposure issues. These doors have an all-composite edge which incorporates an extremely dense 100 percent recycled composite material, and the door may be trimmed on all four door edges which provides for easier installation when replacing an existing entry door.

GlassCraft Buffalo Forge Steel ThermaPlus doors was selected for the Window & Door Product Innovation award 2017!

Components OF BUFFALO FORGE THERMAPLUS

Safety and Security: The GlassCraft Difference is in the details...

Solid, smooth composite frames securely hold glass panels in doors. These plugless frames are patented, and offer a strong and waterproof product, yet allow glass to be replaced if broken.

Wrought iron grilles are hand made, and secured to the door and glass frame with a unique patented system.

Both sides of the door incorporate one-piece solid steel 18 gauge plates that are 270% thicker than ordinary 24 to 26 gauge door skins.

————— 26 gauge steel
————— 18 gauge steel

Multi-point lock options are available in several design options, and provide additional security and peace of mind with 3-deadlocking bolts.

Door jambs and brick mould are constructed with 100% composite material to eliminate rot or termite potential. The pre-hung door unit also includes an adjustable threshold with a composite core.

Unique StrikeJamb™ is an available option that reinforces the lock-side composite jamb leg with an 18 gauge steel reinforcing plate to help prevent kick-ins.

Heavy-Duty, ball-bearing hinges are standard on all pre-hung entryway units. 3 hinges on 6' 8" tall doors and 4 hinges on 8' tall doors.

All four edges of the door are trimmable to ensure an exact fit into your door frame. These edges are 100% rot-proof composite material that is recycled. Photo above shows bottom right edge of door.

Windstorm Performance

Certain GlassCraft Premium ThermaPlus Steel Composite doors and entryways listed in this catalog have been evaluated for compliance and are approved for installation in designated Windstorm or Catastrophe areas along coastal areas when installed as required and as specified with GlassCraft's installation guidelines. Both 6'8" tall and 8'0" tall entryways have been certified in a variety of entryway configurations, including single doors and double doors for in-swing applications.

These doors have been tested in accordance with the Texas Department of Insurance as a Steel Hinged Door - Non-Impact Resistant.

Please refer to GlassCraft's web site for specific information on Design-Pressure (DP) Ratings, approved configurations, and installation information.

GLASS OPTIONS for BUFFALO FORGE THERMAPLUS

DOUBLE IG (INSULATED GLASS)

All glass textures are produced with double IG (insulated glass) to provide safety, security and **energy efficiency**. All glass used in these panels are also **tempered** for added safety. Please note that not all glass textures are available for all door styles. See each section for applicable glass options.

All 8 textures below are available for Speakeasy doors. Large Flemish is not available for SDL ThermaPlus doors. Granite is only available for Continental ThermaPlus doors, while Cloud Glass is available only for the Contemporary doors (Cloud photo shown in Contemporary section). Privacy ratings below represent the obscurity of the glass...the higher the number, the more obscure.

RAISED MOLDING AROUND GLASS AND DOOR PANELS

All ThermaPlus doors include GlassCraft's patented raised molding around glass panels and solid door panels. This functional yet decorative molding is applied to both sides of the door.

The solid door panels feature sleek, flat panel design, and are a full 1 inch in thickness.

All 4 edges of the door feature trimmable edges to ensure a custom fit into your door frame.

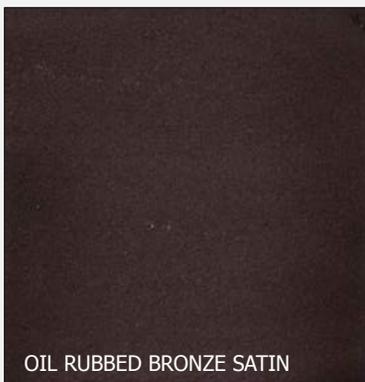

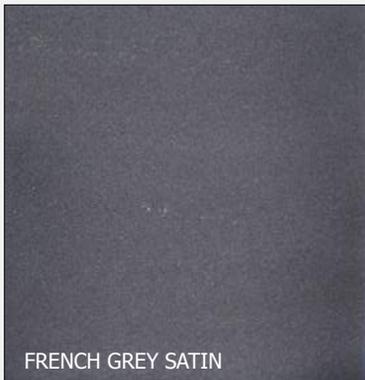

Trimmable edges

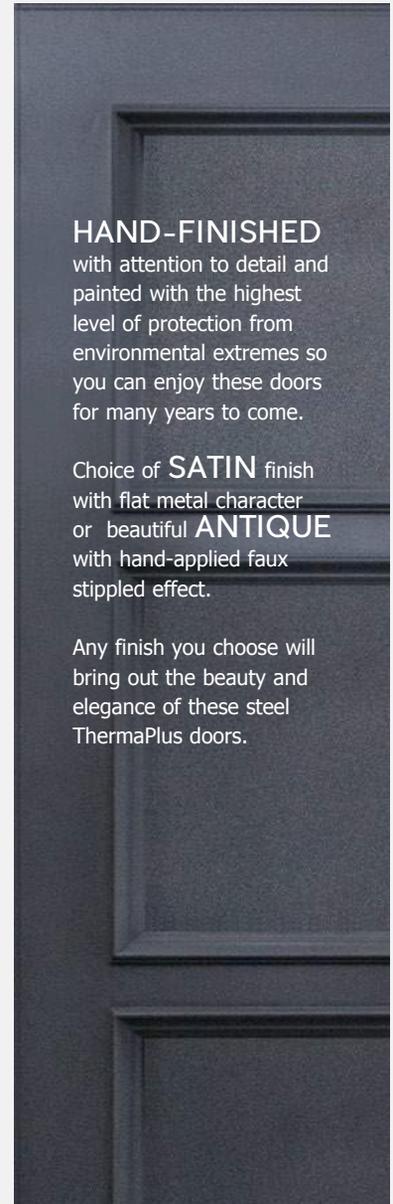

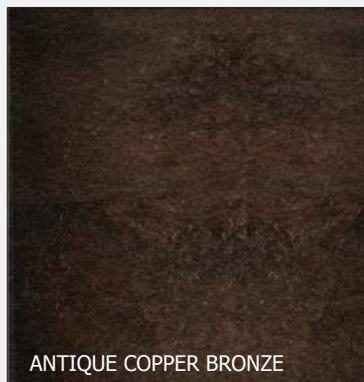

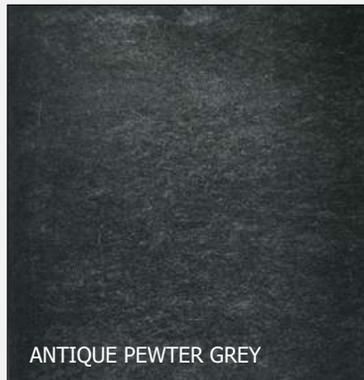

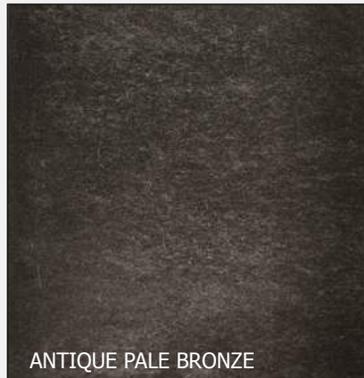

Patented raised molding

FINISH OPTIONS for BUFFALO FORGE THERMAPLUS

SATIN FINISH

ANTIQUE FINISH

HAND-FINISHED
with attention to detail and painted with the highest level of protection from environmental extremes so you can enjoy these doors for many years to come.

Choice of **SATIN** finish with flat metal character or beautiful **ANTIQUE** with hand-applied faux stippled effect.

Any finish you choose will bring out the beauty and elegance of these steel ThermoPlus doors.

NOTE: The photos of the finish colors shown on this page and throughout this catalog offer an indication of the final appearance. Due to the hand finish process, color of actual finished doors may vary from the finish samples in this catalog.

If adding speakeasy grilles, clavos and straps to a 2 panel solid door; or clavos and straps to wrought iron doors, please note that these decorative options will be prefinished to match the door.

DOOR FRAME AND SILL OPTIONS

Composite Door Frames with STRIKEJAMB™

Buffalo Forge Steel THERMAPLUS Doors are available as door-only or as pre-hung with rot-proof composite door frame with StrikeJamb™.

Pre-hung units include the T-astragal (for double doors), sill cover, weatherstripping, and adjustable threshold, plus 3 ball-bearing hinges on 6'-8" tall doors and 4 ball-bearing hinges on 8'-0" tall doors.

StrikeJamb™ Pre-hung units have the option of GlassCraft's exclusive StrikeJamb™ reinforcement, providing extra security around the door frame strike plate area with the addition of a large 18 gauge steel reinforcing plate on single doors, and a steel reinforcing plate added to the astragal for double doors. Pre-hung units have a factory finish in one of 6 colors. Standard pre-hung door units can be ordered with any of our standard double bore or multi-point lock sets and handleset options. Pre-hung entryways include a 4-1/2" jamb or an optional 6-1/2" full composite jamb for an additional cost, and composite exterior brick mold. GlassCraft composite jamb system can be stained or painted.

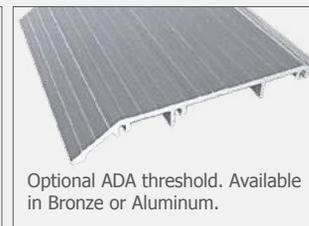

The Strike Jamb reinforcement (image shown at right) is installed on the lock side jamb leg for safety and security.

Black composite jamb material will not rot, warp, split, or crack.

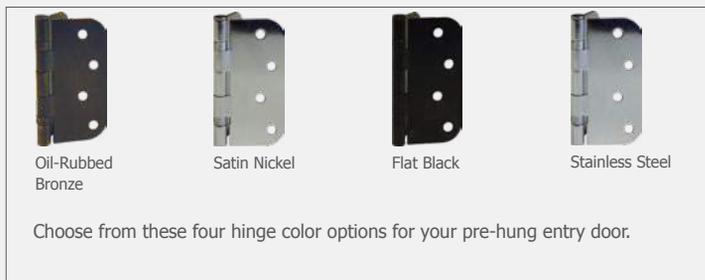

Our standard sill uses a composite substrate that will not warp or rot.

Optional ADA threshold. Available in Bronze or Aluminum.

Optional Endura brand threshold is available in both Bronze and Mill Finish, and includes a removable hard protective construction cover.

Choose from these four hinge color options for your pre-hung entry door.

SILL and Sill Color Options

All standard pre-hung exterior door units use adjustable composite sills that help prevent water penetration, rotting, warping, and discoloration. Our standard adjustable composite sill includes a peel-off protection film which protects the sill during the house construction, and is made from 100% composite and aluminum materials. The "adjustable" feature allows the top of the sill to be adjusted with a screwdriver to match the correct height required for the bottom of the door.

Optionally, you may select the Endura® Brand adjustable composite threshold or an ADA threshold. The ADA threshold is approved for use with wheelchairs. ADA sills are 5" x 1/2" or 7" x 1/2". The Endura Z-Series Sill System (for an extra charge) provides a walnut colored sill cap, the adjustable feature, and a hard plastic protective construction cover.

Bronze Aluminum Sill

Mill Aluminum Sill

MULTI-POINT LOCK SETS AND BENEFITS

Multi-point Lock Sets for Added SECURITY

Increase security and peace of mind with Glass-Craft's multi-point lock option with deadlocking bolts built to work with traditional grip hardware.

Choose from any of the multi-point handle set trim options shown on the next 2 pages. This multi-point system is activated with the turning of the dead-bolt lock. All 3 locking points are engaged only when the dead bolt is locked by turning the thumb latch.

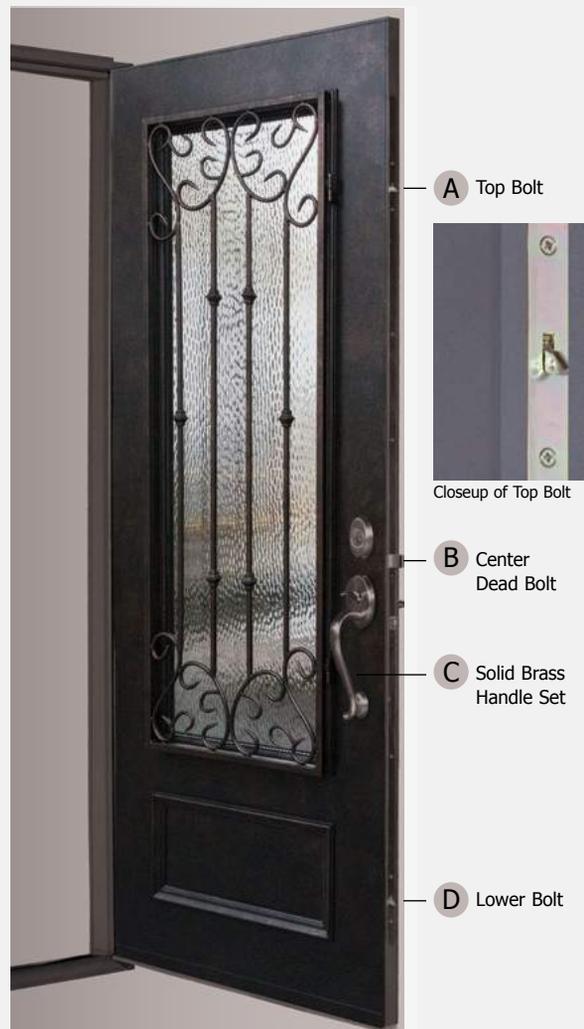

BENEFITS of Multi-point Lock Sets:

- Includes an anti-saw and kick-proof center dead bolt for maximum security.
- 90-degree consumer friendly locking operation, so you visually know the door is locked when the dead bolt knob is in the horizontal position.
- Produced using heavy-gauge steel with a zinc dichromate finish per ASTM-8633 testing standard. Stainless steel models are available for both 6-8 and 8-0 sizes for coastal installation.
- Precision-engineered components reduce the need for service calls, providing years of trouble-free service; cycle-tested to exceed 300,000 locking cycles.
- Adjustable strike plates allow for field adjustment during and after installation; allow for right hand or left hand installation with the same part. Available in Antique Nickel, Stain Nickel, or Oil Rubbed Bronze finish.

Multi-point lock systems use our standard GlassCraft flush bolts installed on the passive door of a pre-hung double door, which gives the homeowner the option to include dummy handle sets on the passive door with all multi-point lock sets.

GlassCraft provides installation of the 3-point lock mechanism into the door, and installation charges are included in the cost of these lock sets. Installation involves machining of the edge of the door slab, which is performed with CNC machines to ensure precision.

When ordering for double doors, only 1 multi-point lock set is required. You may choose to include a "dummy" handle set on the inactive door for appearance purposes.

Door shown above is a 6-8 premium steel with Valencia grille and multi-point lock set.

Adjustable Strike Plates included with each handle set.

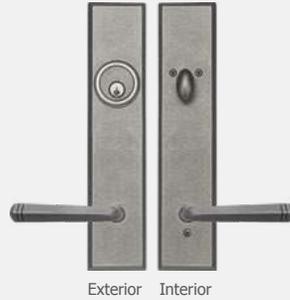

Close up image of multi-point center dead bolt.

SOLID BRASS HANDLESETS - LEVER LATCH ACTION

Features & Benefits

- Solid brass, heavy gauge construction with precision-engineered mechanism.
- Compatible with multi-point lock system (page 17).
- Available with one-point lock sets for 6'8" and 8'0" (For Windsor, Savoy, and San Jose).
- Dummy lock sets available for inactive door in a double door entryway (no internal mechanism).
- Special PVD coating option on multi-point and dummy lock sets (For Satin Nickel Sapphire and Verano).
- May be used for right-hand or left-hand door swings.

SPEAKEASY DOOR COLLECTION

8'0" & 6'8" BUFFALO FORGE STEEL THERMAPLUS ENTRY DOORS

SOLID PANEL BUFFALO FORGE STEEL THERMAPLUS®

Solid Panel Doors

The Speakeasy collection of solid ThermaPlus doors offer a range of solid doors with operable speakeasy grilles. Clavos (decorative door nails) are an option for these doors. See below for grille and clavo options.

Hand-forged Iron Speakeasy Grilles and Clavos

The solid panel doors shown in this section include a "speakeasy" installed into the door. This speakeasy provides a small, operable rectangular door installed in the upper door panel at a height of approximately 5'-6". This small door-within-a-door is hinged and latched from the interior side of the door. The speakeasies are available with four standard wrought iron grille designs (see below right). To complement these speakeasy grilles, clavos may be added on the door. The speakeasies and any additional clavos will be prefinished to match the door.

Glass Texture Options

You may choose from 8 glass texture options for any of the speakeasy doors shown in this section. See page 6 for all glass options.

Five Glass Texture Options

Choose from five different glass texture options to complement your contemporary composite entry door. The glass textures shown below are produced using a double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen. Water offers a light obscured view, Reeds glass offers a moderate level of privacy. Rain and Cloud give the highest level of privacy. Cloud is a white frosted glass panel.

Glass Panel Width in Contemporary doors

Doors in this catalog section are available in 2 heights (80 inch and 96 inch) and in two widths (32 inch and 36 inch).

Glass panels in each door design are the same width, regardless of the door being 32 inch or 36 inch in width. Glass panel width is noted for each door style.

Newport Contemporary · 8'0" Tall ThermaPlus®

36" wide x 96" tall Newport door with Antique Pale Bronze finish, Reeds glass texture and optional Verano Antique Nickel handleset

ThermaPlus Newport Contemporary Door		
	32" width door	36" width door
Newport Door with Textured glass	TDNP2880	TDNP3080

WROUGHT IRON COLLECTION

8'0" & 6'8" BUFFALO FORGE STEEL THERMAPLUS ENTRY DOORS

WROUGHT IRON BUFFALO FORGE STEEL THERMAPLUS®

Patented Ferralites® Wrought Iron Grilles

GlassCraft's ThermaPlus Wrought Iron Series features real handmade wrought iron grilles and textured or clear insulated glass panels. The patented design features a wrought iron grille that is "hinged" to allow the grille to be opened for ease of cleaning. The iron grilles are available in eight wrought iron designs, and are pre-finished in the same color as the door. Choose from five glass texture options with varying obscurity levels (see below). The degree of "obscurity" is noted for each glass texture option. The glass panels use tempered safety glass to make a two-layer-thick safety glass panel.

CONTINENTAL COLLECTION

8'0" & 6'8" BUFFALO FORGE STEEL THERMAPLUS ENTRY DOORS

CONTINENTAL BUFFALO FORGE STEEL THERMAPLUS®

Unique Continental Collection

GlassCraft's ThermaPlus Continental Collection offers an on-trend design series of unique yet simple doors.

Each door design may be customized with all glass, all solid panels, or a glass and solid panel mix. Choose from six glass texture options with varying obscurity levels (see below). The degree of "obscurity" is noted for each glass texture option. The glass panels use tempered safety glass to make a two-layer-thick safety glass panel.

These doors feature raised molding on both sides of the door.

Depending upon the specific door profile, doors are available in 2 heights and 3 widths. Single and double door options are also available.

Photo at left shows a close-up of the top edge of the new Continental Collection Arch Top double door. Note the trimmable edge and the raised moldings.

Textured Glass Options for Continental Doors

Choose from six different glass texture options to complement your ThermaPlus Continental entry door. The glass textures shown below are produced using a double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen. Large Flemish offers a light obscured view, Granite and Ocean offer a moderate level of privacy, while Rain glass provides the highest level of privacy.

DECORATIVE GLASS COLLECTION

8'0" & 6'8" BUFFALO FORGE STEEL THERMAPLUS ENTRY DOORS

DECORATIVE GLASS BUFFALO FORGE STEEL THERMAPLUS®

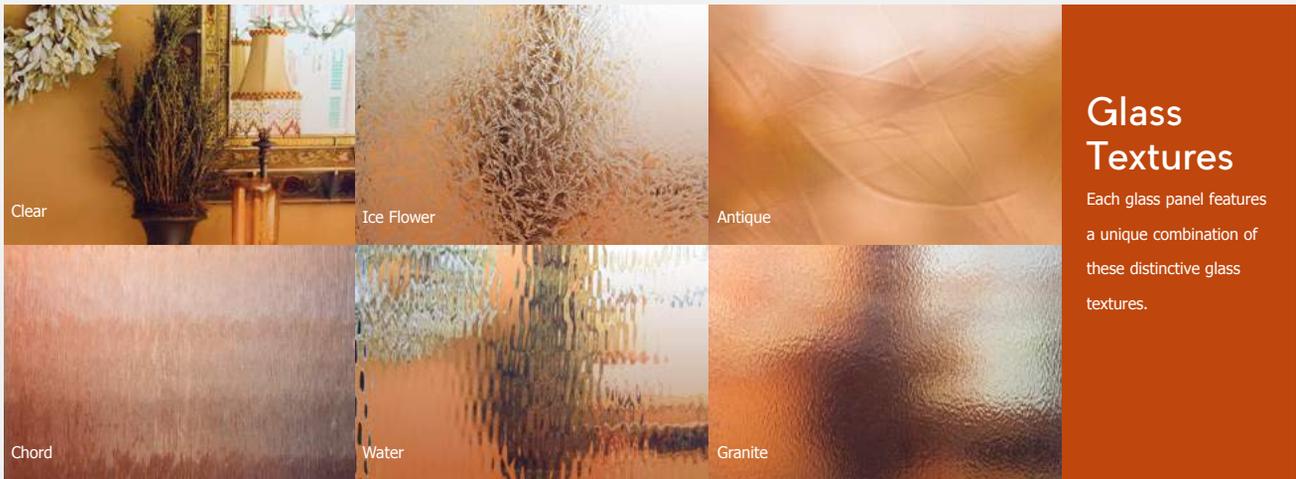

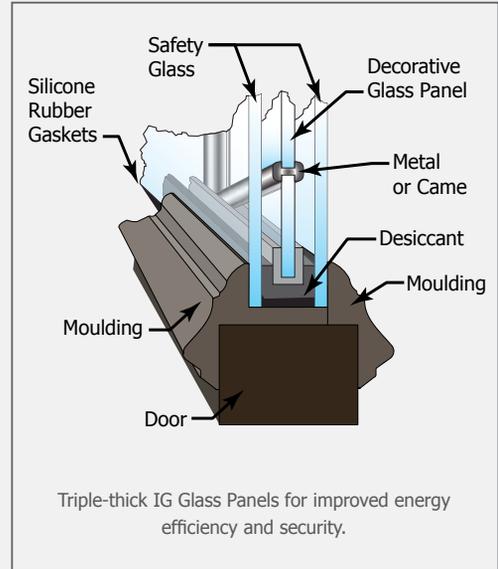

Vitrilites® Decorative Glass Door Panels for ThermaPlus Doors

GlassCraft's Decorative Glass Series features hand-cut and assembled decorative glass panels with unique glass clusters and/or a combination of glass textures that maximize brilliance and sparkle while offering a desired level of privacy.

No one makes better quality decorative glass panels for their doors and windows than GlassCraft. Each decorative glass panel was designed, crafted, assembled, and polished with artistry and performance in mind.

VitriLites® Decorative Glass Door Panels offer these features:

- Glass designs with multiple glass textures
- Triple-thick insulated glass panels for improved energy efficiency and security
- Four decorative glass designs to choose from: Sandringham, Remington, Marsais, and Cantania
- Black came color for each glass panel design
- Tempered safety glass on both sides of glass panel
- Patented raised molding on both sides of door matches molding around the door panels

ThermaPlus Decorative Glass Doors

The photo at right is a close-up detail image of the top edge of the new ThermaPlus Decorative Glass Door. Note the trimmable edge and the raised moldings.

Choose from four decorative glass panel options. Each features black "came" which is the metal pieces that hold the glass panel together. The glass panels use tempered safety glass panes on both sides to make a three-layer-thick safety glass panel.

These doors feature raised molding on both sides of the door.

Depending upon the specific door profile, doors are available in 2 heights and 2 or 3 widths. Single and double door options are also available.

DIVIDED LITE ENTRY DOORS

8'0" & 6'8" BUFFALO FORGE STEEL THERMAPLUS ENTRY DOORS

DIVIDED LITE BUFFALO FORGE STEEL THERMAPLUS®

The SDL Divided Lite Entry Door Series

GlassCraft's ThermoPlus Divided Lite series provides a selection of classic French doors and timeless Mission style doors. This collection of steel composite doors will complement a wide range of architectural styles. The Divided Lite doors in this section feature double insulated glass panels for energy efficiency and security, and a new SDL construction. The Divided Lite Series provides an impressive range of options and finishes. Choose from 6 factory finish colors, and the 4 glass textures shown below. These doors may be ordered individually or assembled in full composite pre-hung jambs.

Glass panels are all double-thick tempered insulated safety glass.

NEW Super Strong SDL Assembly

The Divided Lite doors are constructed with the NEW inter-locking SDL bars that lock into place for a stronger, more structurally sound assembly. Using advanced production technology, the new SDL assembly features precision-cut bars that seamlessly snap together for improved performance and appearance.

Divided Lite Construction

Divided Lite muntin bars give the look and feel of historic and traditional divided lite doors, but with improved performance and energy efficiency. Divided Lite grilles create the illusion of True Divided Lite "TDL" doors by placing composite SDL muntin bars on the interior and exterior of the double insulated glass panel. Muntin bars are permanently fixed to the glass surface allowing for superior energy efficiency over TDL doors. In addition, internal grid bars are inserted inside of the IG glass unit, with these bars perfectly matching the design of the external SDL bars. This completes the look of a true divided lite glass panel.

Glass Texture Options for Divided Lite Doors

Choose from four different glass texture options to complement your Divided Lite composite entry door. The glass textures shown here are produced using a tempered double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen.

GBG (Grille-Between-Glass) DOORS

8'0" & 6'8" BUFFALO FORGE STEEL THERMAPLUS ENTRY DOORS

GBG (Grille-Between-Glass) BUFFALO FORGE STEEL THERMAPLUS®

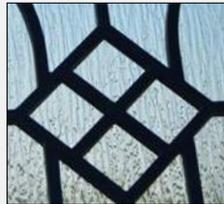

Patented VinciLites® GBG Panels for ThermaPlus Doors

The wrought-iron inspired VinciLites® Collection of decorative “grille-between-the-glass” or GBG ThermaPlus doors are unique in their appearance, and feature simulated hand-tooling marks and unique designs. GlassCraft has multiple US Patents approved for this product! Available in several door sizes, there are six GBG grille designs to choose from: Austin, Cantania, Novara, Palermo, Salento, and Florence. Each decorative grille is finished in Antique Black, and mounted between two pieces of tempered safety glass. There are four glass texture options available with varying obscurity levels – all of which allow daylight to enter. All VinciLites® designs are registered trademark designs created by GlassCraft.

SALENTO®

FLORENCE™

Glass Texture Options for GBG Doors

Choose from four different glass texture options to complement your GBG ThermaPlus entry door. The glass textures shown here are produced using a tempered double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen.
