LEVELING RAILS**

GLASS★CRAFT®
DOOR COMPANY

WHY BARNCRAFT®

BarnCraft rolling doors are made by GlassCraft Door Company, an award-winning residential door manufacturer based in Houston, TX. GlassCraft brings its manufacturing and service excellence into producing this premium selection of rolling doors made of Mahogany, Knotty Alder, Knotty Pine, MDF, Metal and Birch. Offering premium products and options at an affordable price, BarnCraft is a unique brand in the market. A harmony of design, craftsmanship, durability and affordability, BarnCraft provides an excellent choice for that perfect rolling door.

ABOUT GLASSCRAFT®

GlassCraft Door Company, founded in 1977, is an award-winning manufacturer of premium wood, composite and steel doors. From its 185,000 square foot manufacturing facility in Houston, Texas, GlassCraft's team of dedicated artisans, designers and master craftsmen create a distinctive selection of the most beautiful doors, decorative glass windows and entryways available. This dedication to excellence is built into each product and continues with industry leading customer service and product warranties.

Cover: 60" wide x 96" tall Knotty Alder barn door with Double X design, Driftwood Barnwood finish, Waggoner rolling hardware, and 24" Gila handle.

This photo: Shown with 42" wide x 96" tall Mid Rail Knotty Alder barn door with Coal Grey Barnwood finish, Vintage rolling hardware, and Vista handle.

Opposite page: Shown with double Chevron MDF rolling doors with Stone primed color, Slade stainless steel rolling hardware, and Vista handle. This installation shows the use of the double door rail connector (page 14).

4 STEPS TO CREATING THE PERFECT ROLLING DOOR

1. Select your door configuration.

Single or double door? Bypass Double or Quadruple? Refer to the information on pages 4-5 for some considerations before selecting your rolling doors.

2. Select your door.

Seven different rolling door series are listed in this catalog with many door designs, glass, and finish options.

See pages 6-11 for an overview of the different BarnCraft Collection door series, including the Knotty Alder Barn Door Series, Pine Door Series, Contemporary Series, Carved MDF Doors, Iron Plank and Mahogany Glass Door Series. Visit www.glasscraft.com to view other GlassCraft doors that may be used for rolling door applications.

3. Select your rolling door hardware.

Choose from 8 heavy-duty metal rolling door hardware with black and stainless steel finish options (select designs).

All BarnCraft rolling hardware include nylon wheels for a quiet-glide operation. See pages 12-13.

4. Select your options.

Consider adding these functional and decorative options to your BarnCraft rolling doors:

- Soft-Close option for a smoother and safer open/close operation of the rolling doors - see page 14.
- Pulls and Handles in black and stainless steel finish - see pages 18-19.
- Header boards for added structural support - see page 15.

The images throughout this catalog, showing the prefinish color options offer an indication of the final appearance, but due to variations in the texture, grain and color of the wood, the actual appearance will vary.

For information on product warranty please visit our website at www.glasscraft.com

SINGLE & DOUBLE DOOR CONFIGURATIONS

Single Door Installation

The single door installation may be used when there is sufficient wall space to the right OR the left of the wall opening that is at least 6 inches wider than the actual wall opening. For instance, if your wall opening is 36" wide, then you must have at least 42" of available wall space to the right or to the left of the wall opening.

Consider an extra-wide single door if you have a wider sized opening that has sufficient wall space. If wall space is available on BOTH sides of the opening, you might want to consider a double door installation. Alternatively, if there is little or no wall space on EITHER side of the wall opening, then you might consider the double BYPASS door installation.

Double Door Installation

The double door installation may be used when this is the desired appearance and when there is sufficient wall space on both sides of the wall opening. Consider that each side of the wall opening must have this much wall clearance: 6 inches + 1/2 of the total wall opening. For instance, if your wall opening is 60 inches wide, then you must have at least 36 inches of available wall space to the right and to the left of the wall opening.

For a double door installation, you will need 2 doors and 2 rolling door hardware kits. The rails from each of the 2 kits meet in the center above your wall opening. The Rail Connector (see page 14) is an available option that mounts across the joined ends of 2 door rails for a seamless double door configuration.

BYPASS DOUBLE/QUAD & WINDOW/TV CONFIGURATIONS

Window Shutter Installation/ TV Cabinet Installation

The BarnCraft Collection in the Barn Door Series offers a wide range of size options to cover unique openings and spaces, such as windows and TV cabinets. Use of rolling doors as shutters add a unique design focal point and tie in the interior design of any room. See pages 26-37 (Barn Door Series) and 38-41 (Iron Plank Series) for a wide selection of sizes available.

Barn doors for TV cabinets can be used in place of traditional cabinet doors for a unique twist. This installation saves on the swinging space and provides a functional and stylish design element. With a wide range of minimum and maximum sizes available, BarnCraft's barn doors offer a complementary design detail to suit your home.

Bypass Double or Quadruple Door Installation

The Bypass door installation may be used when this is the desired appearance and when there is INSUFFICIENT wall space to the right AND/OR the left of the wall opening for a traditional barn door installation. A double bypass installation uses two rolling door tracks instead of one. The second door track is cantilevered in front of the first track. So the doors roll in front and behind of each other.

For a Bypass Double door installation, you will need 2 doors, 2 rolling door hardware kits plus 1 bypass rail bracket kit (see page 16). For a Bypass Quadruple door installation (such as shown on the left), you will need 4 doors, 4 rolling door hardware kits, plus 2 bypass rail bracket kits (page 16). Visit www.glasscraft.com to view the bypass quadruple door installation video.

THE PINE BARN DOOR COLLECTION

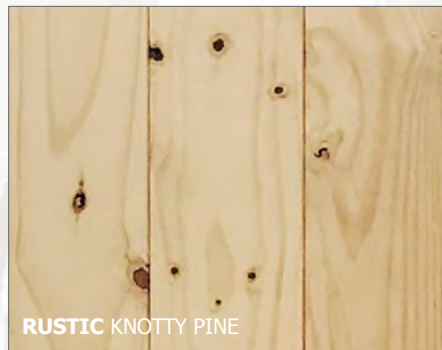

See [PAGES 22-25](#)

Rustic Knotty Pine Double Z Two Panel Barn Door shown here with Slade hardware and Corona handle.

RUSTIC KNOTTY PINE

The Knotty Pine Barn Door Collection is available in unfinished (no paint or stain) only. These true plank doors are the most economical of all of the BarnCraft doors. Knotty Pine features random knot holes, mineral streaks, and the occasional check or minor crack. 3/4" thick planks: 1.75" thick at cross rails. See pages 22 - 25 for available door styles, sizes, details and options.

THE ALDER BARN DOOR & SHUTTER COLLECTION

See PAGES 26 - 37

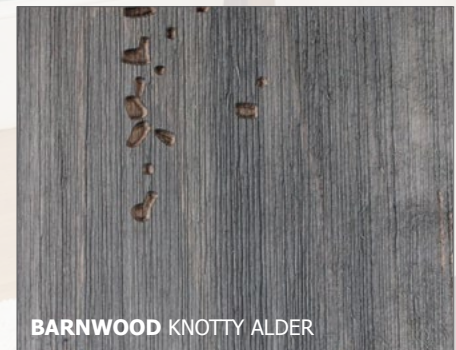

Shown with Double X Barn Door design with Barnwood Knotty Alder prefinished in Driftwood, with Gage hardware and Vista handle.

RUSTIC or BARNWOOD

The Alder Barn Door Collection is available in two different Knotty Alder textures. Rustic texture Knotty Alder is available in Unfinished, Traditional, Distressed and Antique finish options. Barnwood texture Knotty Alder features specialty finishes and heavy distress marks for an authentic weathered barn wood look and design. 3/4" thick planks: 1.75" thick at cross rails. See pages 26 - 37 for available door styles, sizes, details and options.

RUSTIC KNOTTY ALDER

BARNWOOD KNOTTY ALDER

THE IRON PLANK DOOR & SHUTTER COLLECTION

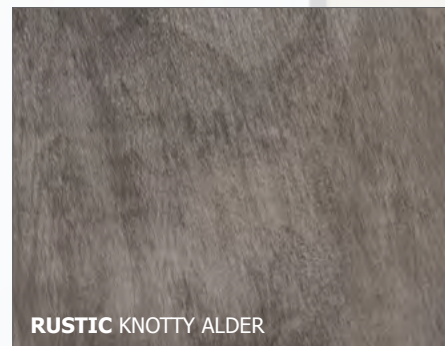

See **PAGES 38 - 41**

Shown with horizontal metal plank door with Barnwood Knotty Alder Coal Grey finish, Vintage hardware and Monterey handle.

IRON PLANK

The Iron Plank Collection is available in two different Knotty Alder textures. Rustic texture Knotty Alder with Traditional, Distressed and Antique finish options, and Barnwood texture with distress marks. Planks are 3/4 inch thick solid wood with 1.25" metal frame. See pages 38 - 41 for available door styles, details and options.

RUSTIC KNOTTY ALDER

BARNWOOD KNOTTY ALDER

THE MDF DOOR COLLECTION

See PAGES 42 - 63

Primed white MDF Shaker 5 Panel rolling door shown with Vintage rolling hardware and Santa Fe pull handle. Multiple hardware options available.

CARVED MDF

The MDF Door Collection is produced using MDF (Medium Density Fiberboard) which has been router-carved to make beautiful door designs to be painted. Doors are primed in smooth white, or finished in 2 colors: stone grey or sand. Doors are 1-1/2" thick, and may be ordered with the design on one or both sides of the door. See pages 42 - 63 for available door styles, details and options.

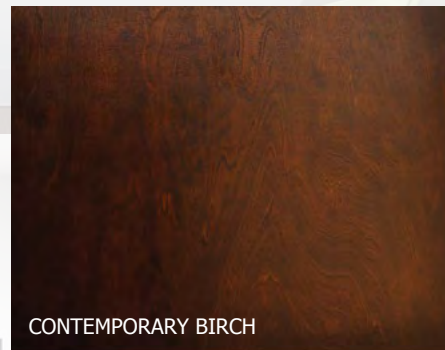

THE CONTEMPORARY DOOR COLLECTION

See PAGES 65 - 67 / 68 - 77

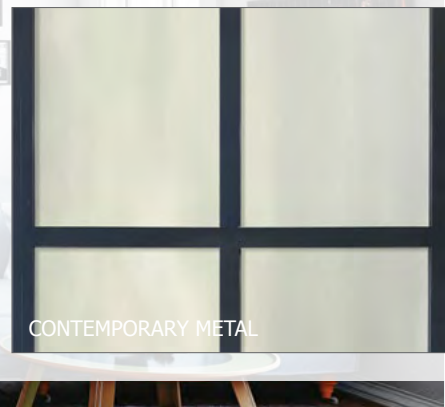

BIRCH OR METAL

The Contemporary BarnCraft Series of rolling doors are now available in birch wood and in metal divided lite design. Birch is a fine textured wood that provides a great surface for painting and staining. See pages 68-77 for details on all features and options. The Contemporary Metal rolling doors are made of powder coated metal grids with Cloud or Clear glass. See pages 65-67 for details.

CONTEMPORARY BIRCH

CONTEMPORARY METAL

Shown above: (Top) Santa Monica Contemporary rolling door prefinished in Natural Antique, with stainless steel Slade hardware, Metro 48" handle, and Reeds glass option. (Bottom) Contemporary 4 Lite Metal rolling door with Gage hardware and Cloud glass.

THE GLASS & MAHOGANY DOOR COLLECTION

See PAGES 78 - 83

Shown with 36" x 96" Mahogany rolling door with 6 Lite design, Owl Grey Distressed finish, Large Flemish glass, Royal hardware, and Monterey handle.

ELEGANT MAHOGANY

The Glass & Mahogany Door Series in the BarnCraft Collection is available in Mahogany wood with choice of Traditional, Distressed or Antique finishing. Mahogany is a fine straight-grained wood that ranges from rich golden to deep brown color and has a beautiful sheen when finished. See pages 78 - 83 for the door style options, complete finish options and other details.

Vintage - black	#BDHA07
Slade - black	#BDHA01
Gage - black	#BDHA02
Royal - black	#BDHA06
Waggoner - black	#BDHA03
Philmont - black	#BDHA05

IMPORTANT NOTE:

* Vintage rollers have wider diameter of 4-7/8". All others have a 2-3/4" diameter wheel.

** The BarnCraft hardware kits are designed for interior residential doors only. Ensure proper structural support for the rail to the wall for the weight and movement of the door or doors before installation.

HARDWARE KITS

All Hardware features **ADJUSTABLE RAILS** and **QUIET-GLIDE** wheels

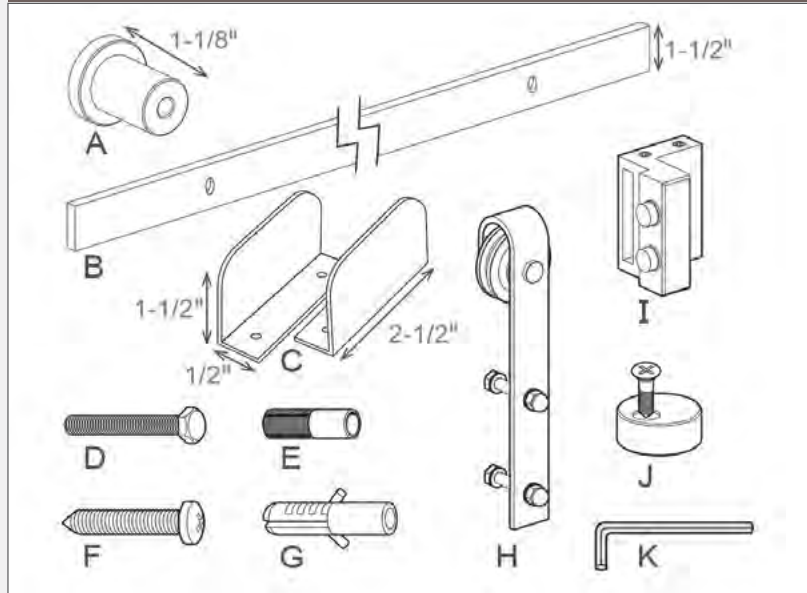

Steel mounting rails now include patent-pending adjustability feature that allows the rails to be perfectly leveled after installation to the walls. Installation of the rails can be difficult to ensure that the rails are perfectly level. But with this new feature, each rail can be fine-tuned for levelness after the rails has been mounted to the header or directly to the wall. This is an exclusive feature and benefit of BarnCraft rolling door hardware.

Premium Features:

- Rollers glide quietly and smoothly on ball-bearings.
- Made of high quality powder-coated steel in black finish with stainless steel options
- 2 rail lengths available: Choice of 78-3/4" or 100"
- Weight capacity: 220 lbs.
- Kits include the rollers, rail, stoppers, screws & nuts, anti-jump discs, floor guide and installation guide.
- Rollers are available individually and separately from the kit. Refer to the Price book for more information

All hardware kits shown on the opposite page are available with the adjustable rail pre-assembled and mounted to a wooden header for easy installation. See page 15 for more information. Add an "M" to the end of the hardware kit stock number shown at left.

New Patented! Adjustable Leveling Rails

Each HARDWARE KIT includes the following:

- A Stand-off Bracket (x5)
- B Rail (x1) – See pg 12
- C Floor Door Guide (x2)
- D Bolt (x5)
- E Bolt Wall Anchor (x5)
- F Log Bolt (x5)
- G Log Bolt Wall Anchor (x5)
- H Roller (x2) – See pg 12
- I Stopper (x2)
- J Anti Jump (x2)
- K Allen Wrench (x1)

Optional:

Locks and Handles, see pages 17-19.
For optional Wall-mount floor guide, see page 17.

BDPART1	Includes all screws, 2 Anti Jumps (J), and 1 Floor Guide (C), for black rollers
BDPART1SS	Includes all screws, 2 Anti Jumps (J), and 1 Floor Guide (C), for stainless steel rollers
BDPART2	Includes 2 stoppers (I), and Allen Wrench (K), for black rollers
BDPART2SS	Includes 2 stoppers (I), and Allen Wrench (K), for stainless steel rollers

SOFT-CLOSE OPTION FOR ROLLING DOOR HARDWARE

New Improved Soft-Close Option

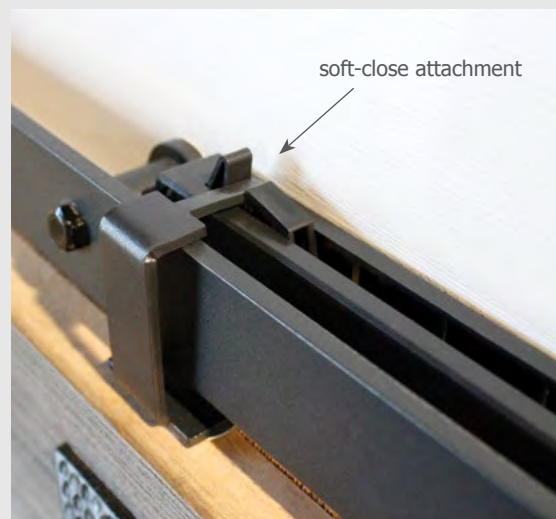

The Soft-Close option is available for all Rolling Hardware Kits.

The soft-close option is an impressive addition to your rolling door installation. Hidden from view, this mechanism ensures a quieter and safer operation of your rolling door by automatically slowing the opening or closing action. No more slamming or jamming issue. Perfect for homes with children, elderly, or those who want ease of use. Packaged 2 per box (one for opening, one for closing), these options attach by set screws directly to the back side of the rail.

Consider these product features:

- Allows for a safer and smoother operation of the rolling door by automatically slowing the door as it glides gently and quietly into the closed or open position.
- Helps to prevent slamming and accidental jamming of fingers.
- Reduce noise with its silent closing/opening action. Ideal for bedroom, bathroom and office installations.
- Use with any of the 6 black finished rolling hardware on page 12. Black finish only.
- Use one for closing action, and the 2nd for opening,

Please visit www.glasscraft.com to view a video of the Soft-Close option in action.

SOFT-CLOSE KIT - BDSC (kit includes all parts needed)

Double Door Rail Connector

Consider installing this Rail Connector with your double doors for seamlessly joining 2 rails together, end-to-end. Your 2 rails appear as one continuous track for a more polished look. Available in black and stainless steel.

BDRC
Black

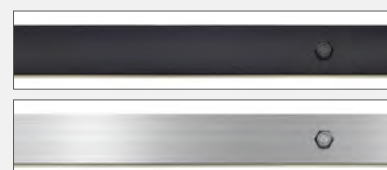

BDRCSS
Stainless Steel

Door Rail Options

The metal rail used in the BarnCraft door installation is a very heavy duty solid steel flat bar 1-1/2" in height and 1/4" thick. One rail is needed for every door, so a double door installation needs 2 rails. The rail length depends upon the width of the door. The wider the door, the longer the rail needed.

RAIL LENGTH	Fits Door Widths	Black Finish	Stainless Steel Finish
78-3/4" Rail	up to 36"	BDRAIL78	BDRAIL78SS
100" Rail	38" to 48"	BDRAIL100	BDRAIL100SS

MORE OPTIONS FOR BARNCRAFT INSTALLATION

Header Board Options: ASSEMBLED / ADJUSTABLE

Installing Header Boards with the BarnCraft hardware kit adds structural support.

The BarnCraft hardware kit is best installed with a header board for added structural support (see examples shown throughout the catalog). With this option, the rolling door hardware is mounted directly to the header board, and the header board mounts to the wall. This method ensures that you can secure this assembly directly into wall studs.

You may use any wood or plywood material for a header board. The header boards listed here are produced from Knotty Alder and will match your Knotty Alder door. Available finished or unfinished.

RUSTIC KNOTTY ALDER HEADER BOARD OPTIONS				
	80" Length		108" Length

MORE OPTIONS FOR BARNCRAFT INSTALLATION

Bypass Door Option

The Bypass door installation may be used when there is INSUFFICIENT wall space to the right AND/OR the left of the wall opening. A Bypass Installation uses 2 rolling doors and 2 rolling door tracks instead of one. The second door track is cantilevered in front of the first track, so the doors roll in front of and behind each other.

See more about this on page 5. These kits are available in black finish and stainless steel.

For a Double Bypass door installation, you will need 2 doors, 2 rolling door hardware kits plus 1 of these Bypass Rail Bracket Kits (5 brackets per kit). For a Quadruple Bypass door installation (as shown on pages 5), you will need 4 doors, 4 rolling door hardware kits, plus 2 of these bypass rail bracket kits.

BYPASS RAIL BRACKET KIT

rolling doors.

MORE OPTIONS FOR BARNCRAFT INSTALLATION

Floor / Wall Guide Option

Every BarnCraft hardware kit includes a "Floor Door Guide" - see page 13. The optional Floor / Wall Guide shown here mounts to the wall (not the floor). This guide is an option and not included with the price of the hardware kits. May be used for full size doors, and also for small shutter doors, with the floor-wall guide mounted higher on the wall.

BDWM
Wall-Mounted Floor Guide

PRIVACY LOCKS

BarnCraft doors may be installed with a locking system for privacy. Specially designed for the BarnCraft Rolling Doors, the privacy lock is made of premium quality steel. Two colors available...black powder coated steel or stainless steel. Includes all screws and parts required for installation. Boxed individually.

Two sizes are available - Regular and Large. Both will work on all doors, but the Large lock looks and may function better with large doors over 28 square feet. The Regular lock measures about 1.75" x 2.25". The Large lock measures about 3" x 3.25".

Note: GlassCraft will not prep the doors for these locks, as the lock location varies for each specific installation.

BARNCRAFT DOOR HANDLES

Black Pull Handles

Vista (8" tall) - HP4

The black handles shown on this page are made of real hand-wrought iron that is durable and can complement any design theme, together with your choice of BarnCraft door and rolling hardware.

As these handles are all hand-made, their size and appearance will vary slightly. All are packaged with mounting screws.

The Vista mounts flush with the face of the door. The other handles shown below extend above the face of the door, and can only be mounted on the door face away from the wall. If you wish, the Vista may be mounted on the "back" side of these doors.

Refer to our BarnCraft Product and Information Guide for more information.

BARNCRAFT DOOR HANDLES

Stainless Steel Pull Handles

Vista (8" tall) - HP4S

The stainless steel handles shown on this page and throughout this catalog are made of real stainless steel.

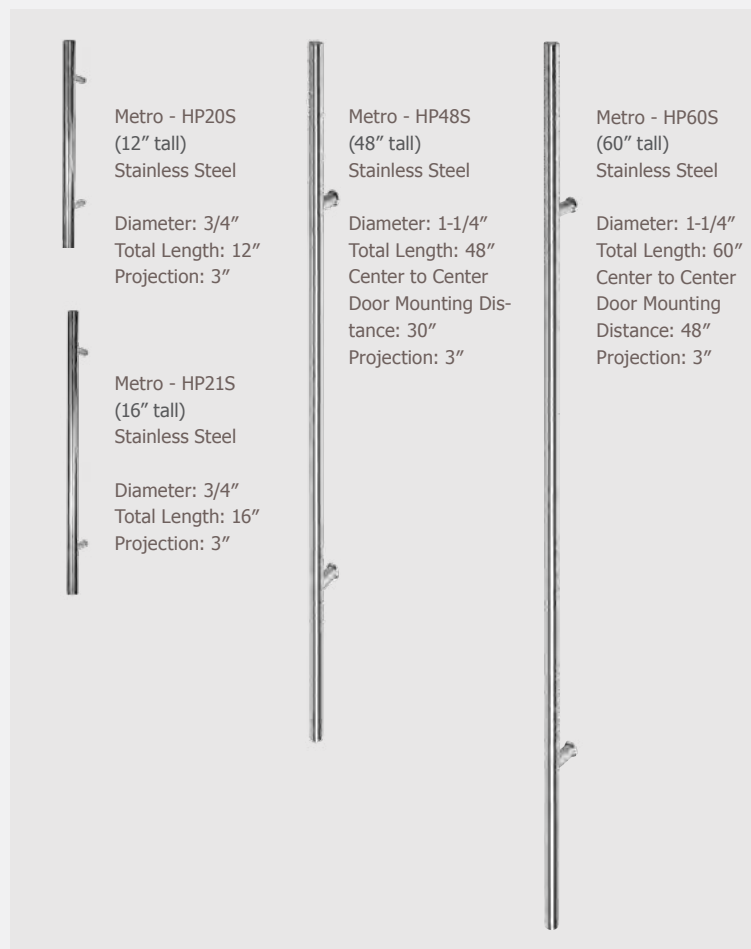

As these handles are all hand-made, their size and appearance will vary slightly. All are packaged with mounting screws.

The Vista mounts flush with the face of the door. The Metro handles extend above the face of the door, and can only be mounted on the door face away from the wall. If you wish, the Vista may be mounted on the "back" side of these doors. The Metro mounts using screws from the back side of the door. These mounting screws will be visible on the back side.

Please refer to our BarnCraft Product and Information Guide for additional specifications and information.

Metro Stainless Steel: Available in 12", 16", 48", and 60" height.

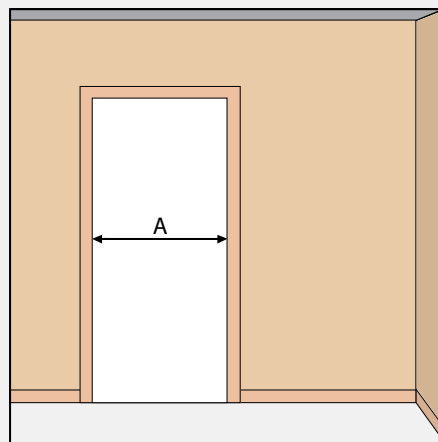

HOW TO ORDER THE BARNCRAFT DOOR & INSTALLATION VIDEOS

Measuring for your BarnCraft Door

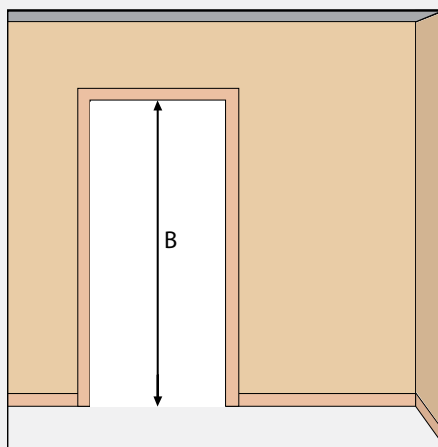

Determine the minimum door width:

To determine the minimum door width, measure the distance between the inside frame opening and add 2" to each side ($A + 2" + 2" = \text{minimum door width}$). This will allow the door to cover the frame opening when the door is fully closed.

Determine the minimum door height:

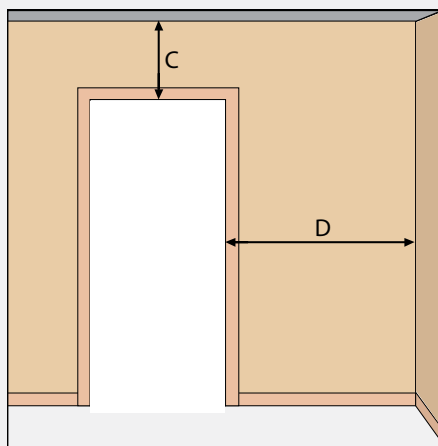

To determine the minimum door height, measure between the finished floor and the frame, then subtract 1/2" for floor clearance from the bottom of the door ($B - 1/2" = \text{minimum door height}$). Door may cover the existing door top casing trim if desired....or you may want your door taller than the existing opening...add on to your door height for this.

Check for minimum door clearance:

A minimum clearance of 6 1/2" (C) is required from the top of the door to the ceiling, to accommodate the track and rolling hardware. The top of the door should be level with or above the frame opening.

A minimum clearance of available wall space **equal to the actual door width plus 2 inches** is required (D) for the door to completely roll free of the door opening.

Video Installation Guides:

Visit the how-to videos on our website: <http://www.glasscraft.com/resources/videos/>
Video guides are available for installing single, double, and bypass rolling doors.

ADDITIONAL INFORMATION

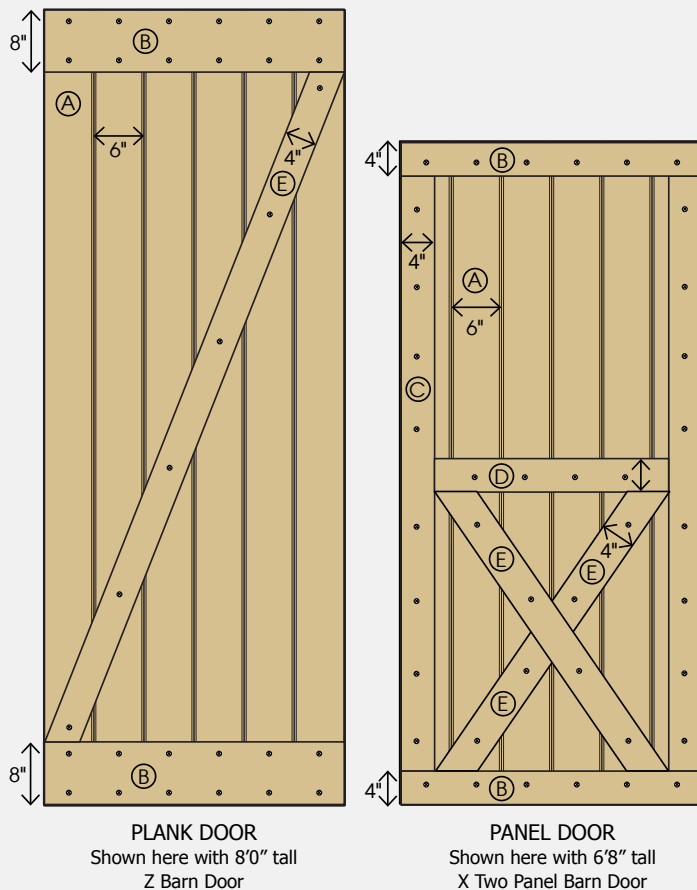

Warranty

The BarnCraft Collection is backed by our guarantee of craftsmanship and premium quality. GlassCraft offers a limited 1 Year door warranty on all BarnCraft rolling doors.

GlassCraft also provides its BarnCraft hardware with a guarantee of durability. Produced with strong steel and quiet-gliding operation, the BarnCraft rolling door hardware comes with a limited 5 Year warranty.

Visit www.glasscraft.com for more information.

BarnCraft Door Dimensions

- A – Tongue-and-groove Plank 6" width
- B – Cross Rail 8" height (Plank style doors only)
4" height (Panel style doors)
- C – Vertical Brace 4" width (Panel style doors only)
- D – Horizontal Brace 4" height (Panel style doors only)
- E – Diagonal Brace 4" width

FAQs:

- 1) **What is the thickness of the Barn Doors?**
3/4" thick doors + 1" thick rails for a total door thickness of 1-3/4" for the Barn Door series. Other door series vary in door thickness. Check corresponding section pages.
- 3) **How do we determine which track length we need to order?** We recommend the 78-3/4" track for door width of up to 36". For door widths of 38" up to 48" wide we suggest the 100" rail length. Double doors or by-pass doors require more than 1 rail.
- 4) **Will the Hardware work with other doors we offer?** Yes. Visit www.glasscraft.com to view other doors.
- 5) **Is the hardware all metal or are the rollers Nylon?** The wheel part of the rollers are of Nylon material which provides the Quiet-Glide benefit.
- 6) **What does the back of the barn door look like?**
The Barn Doors are constructed from 6" wide planks of Knotty Alder wood or Knotty Alder Barn Wood. The back side will be stained or painted in the same finish as the front. If the doors come with rails or braces, these pieces will be on the front side where the rollers are facing. The MDF door series is available with the Design on 1 side only, or both sides.
- 7) **What are the dimensions of the knotty alder barn doors?** See the diagrams at left. Other door series have different dimensions. The Iron plank doors all use 6" planks. The MDF doors, birch doors, and Mahogany doors all vary according to door width, height, and design.

KNOTTY PINE BARN DOOR COLLECTION

BARNCRAFT PREMIUM ROLLING DOORS

THE KNOTTY PINE **BARN DOOR** BARNCRAFT COLLECTION

Pine Barn Door Series

The Pine Barn Door Design Series features Knotty Pine wood doors with natural wood imperfections including pits, knot holes, and crack patterns. Available in 8 door designs and two sizes.

All doors in this series use real tongue-and-groove wood planks that are 3/4" thick. The 1" thick wooden cross rails or slanted rails are mounted on one side of the door and not on both sides. Total door thickness at rails is 1-3/4 inches. See page 21 for more barn wood dimensions and details.

These Pine Barn Door Series may be ordered in any of the 8 styles shown below in either 7 foot or 8 foot heights.

These doors are only available unfinished, ready for your paint or stain. Doors will require sanding prior to your finish process.

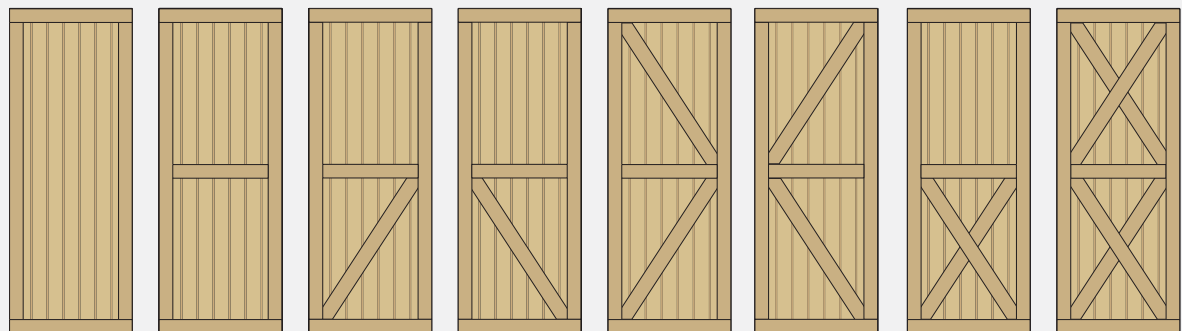

These doors are also available in a kit that includes the black SLADE hardware.

KNOTTY ALDER BARN DOOR & SHUTTER COLLECTION

BARNCRAFT PREMIUM ROLLING DOORS

Alder Barn Door Series

The Barn Door Design Series features the Knotty Alder wood in two textures: Rustic Knotty Alder with the characteristic closed pore graining and natural wormholes, pits, and crack patterns; and the Barnwood Knotty Alder with enhanced distressed markings for an authentic weathered barnwood look. Available in 8 door designs and various sizes.

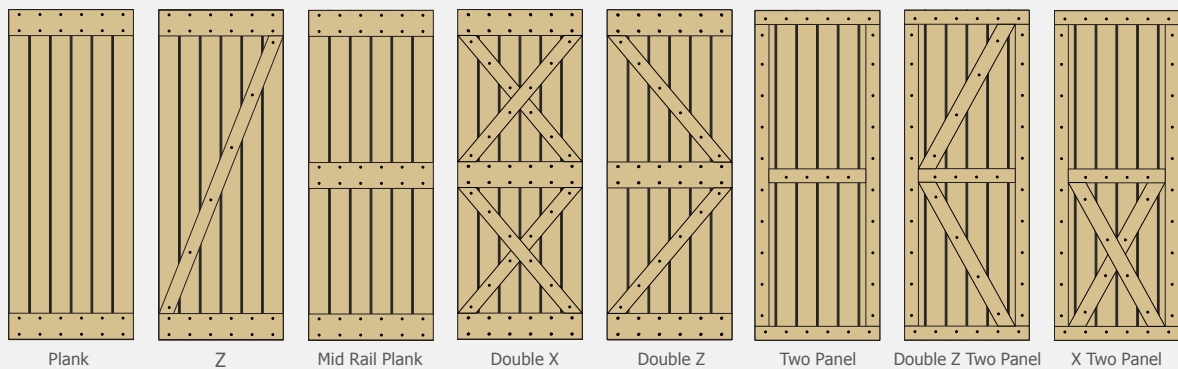

All doors in this series use real 6 inch wide tongue-and-groove wood planks that are 3/4" thick. The 1" thick wooden cross rails or slanted rails are mounted on one side of the door and not on both sides. Total door thickness at rails is 1-3/4 inches. See page 21 for more barn wood dimensions and details.

The Barn Door Series may be ordered in 6" width increments beginning at 24" wide up to 84" wide while heights are available starting at 36" up to 96" at 2 inch increments. Not all of the 8 door profiles below are available in all sizes.

Photo: 36" wide Mid-Rail barn door with Barnwood White Wash finish and stainless steel Slade hardware.

Design Options

TWO FINISH OPTIONS FOR THE BARN DOOR COLLECTION

Barnwood Knotty Alder and Rustic Knotty Alder Textures/Finishes

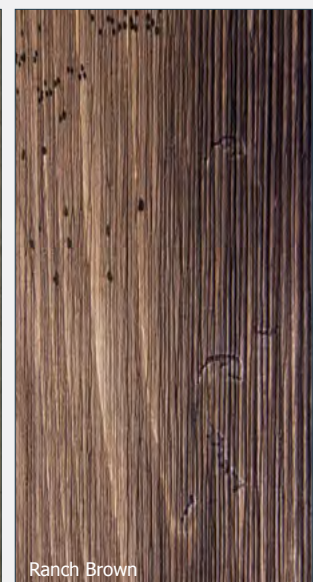

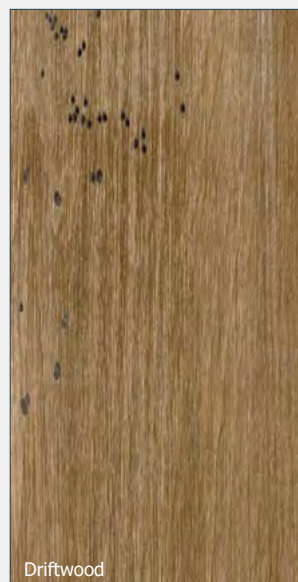

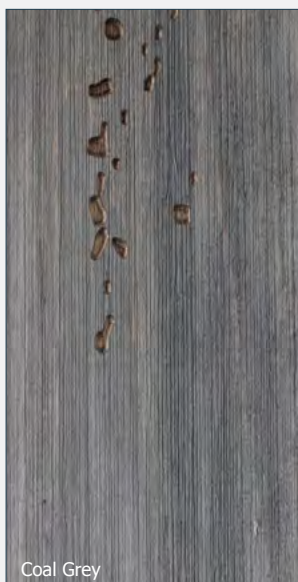

Option 1. Barnwood Knotty Alder features a distinctive weather-worn Knotty Alder texture with enhanced distressed marks for an authentic barn door look. This high definition texture is available unfinished (raw wood) or showcased beautifully in 4 factory finish stain options (see below) and are heavily textured with knots, occasional holes and/or distress and machine marks. The Barnwood finish is irregular in stain, color, and appearance, and features a more heavily textured grain than the Rustic Knotty Alder finish. All colors feature a hand-applied color finish to the natural knotty alder wood, which is then distressed with additional distress marks to simulate worm holes, cracks and splits, and wear marks. This finish does not include any clear top coat...so the colors are flat with no sheen or shine.

Option 2. Rustic Knotty Alder features the natural rustic patterns and textures of Knotty Alder as the Barnwood, but without the rough weathered look included in Option 1 above. This Rustic Knotty Alder option is not "smooth" however, and features the occasional "mill mark" and knot hole. This texture is available unfinished (photo at left is the unfinished raw wood) **or** factory finished in several colors as shown on the page at right. The Traditional Colors includes the Rustic Knotty Alder texture, the stain color, and a clear urethane satin-sheen top coat. The Antique Colors are darker, and suggest an aged appearance. And the Distressed Colors add faux worm holes and cracks to the Antique option for a more rustic aged look. (Distressed and Antique are the same color).

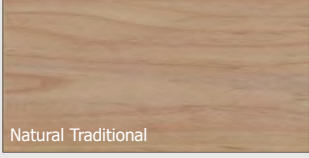

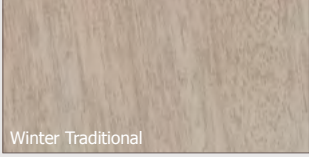

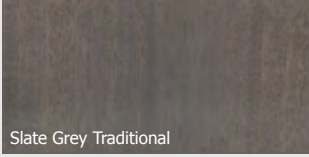

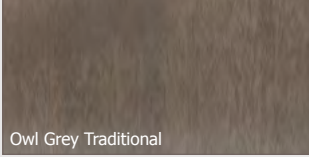

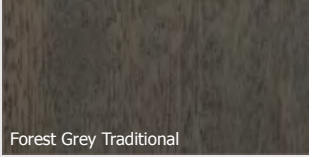

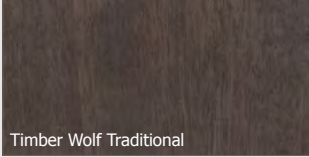

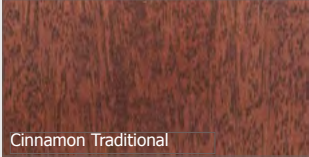

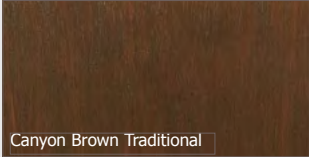

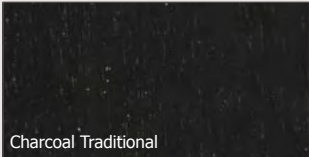

Option 1: Barnwood Texture finish color options

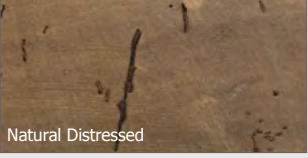

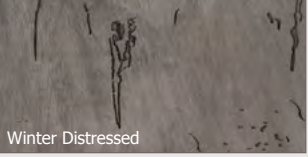

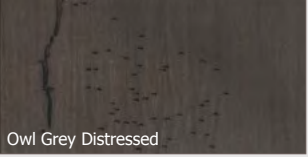

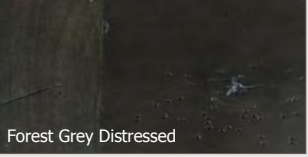

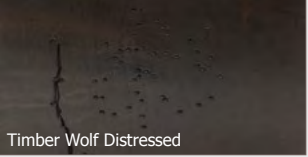

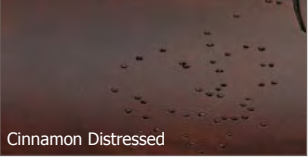

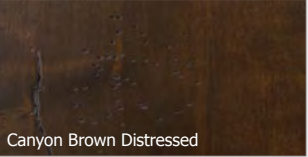

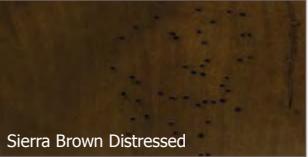

Note: The images throughout this catalog, showing the prefinish options offer an indication of the final appearance, but due to variations in the texture, grain and color of the wood, the actual appearance will vary.

Option 2: Rustic Knotty Alder finish color options

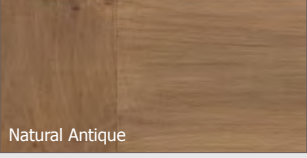

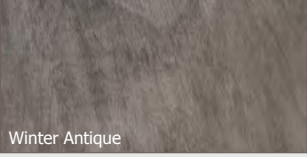

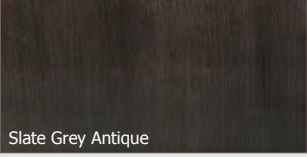

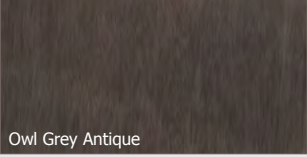

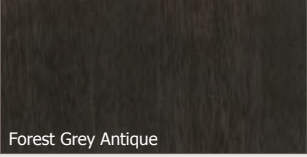

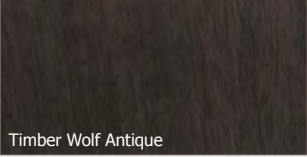

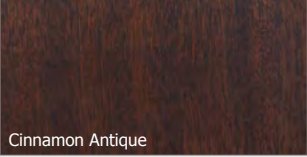

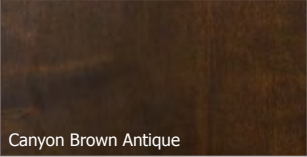

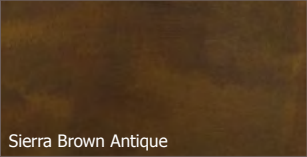

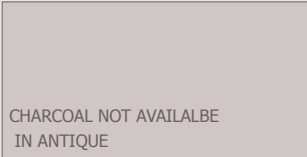

Traditional Colors

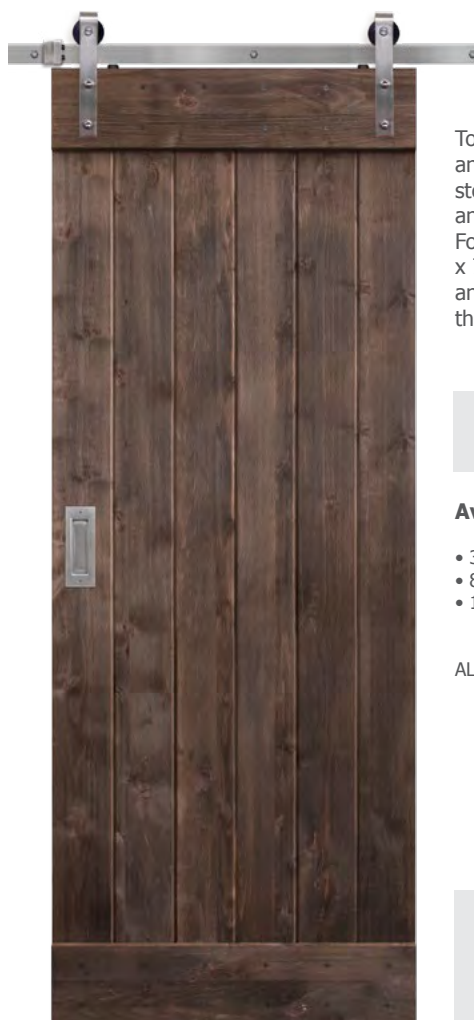

Distressed Colors

Antique Colors

Plank Barn Door

36" wide x 96" tall. Shown here with Ranch Brown finish, stainless steel Slade rolling hardware, and Vista inset pull.

To order, add the width in inches and the height in inches to the stock number at right. Minimum and maximum sizes shown below. For example, to order a 30" wide x 78" tall Mid Rail Plank door with an Unfinished Knotty Alder texture, then order BDKAPL3078.

Sold by the square foot.

Available Options:

- 32 Factory Finish options. See pages 28-29
- 8 Rolling hardware options. See page 12
- 15 Pull-handle options. See page 18-19

ALL HARDWARE SOLD SEPARATELY.

MDF BarnCraft COLLECTION

BARNCRAFT PREMIUM ROLLING DOORS

THE **MDF** BARNCRAFT COLLECTION

White, Stone, and Sand MDF Doors

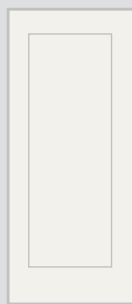

The MDF BarnCraft Collection features 1-3/8 to 1-1/2 inch thick doors produced using MDF — medium density fiberboard. These doors feature a finish coating on both sides in white, sand, or stone colors. Or you may apply your own paint color to the door. These doors are available with the door design router carved on the front side only, or on both sides of the door.

All barncraft door hardware may be used on these doors, see page 12 for all available BarnCraft rolling hardware options.

MDF doors are available in 3 door heights: 80", 84", and 96". And in 4 widths: 32", 36", 42", and 48".

FINISH OPTIONS FOR THE MDF BARN DOOR COLLECTION

MDF Door Information and Door Color Finish Options

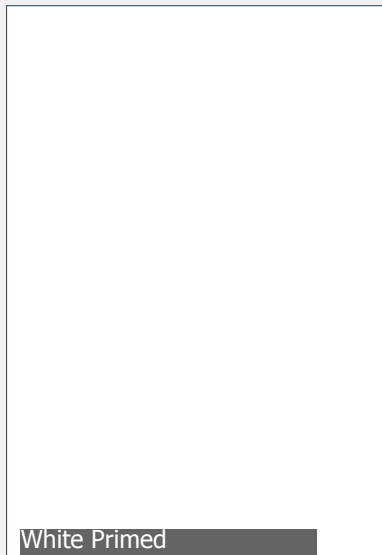

MDF doors offer a smooth surface texture (no wood grain). The design of the door is machined or carved into the medium density fiberboard on one or both sides of the door (your choice).

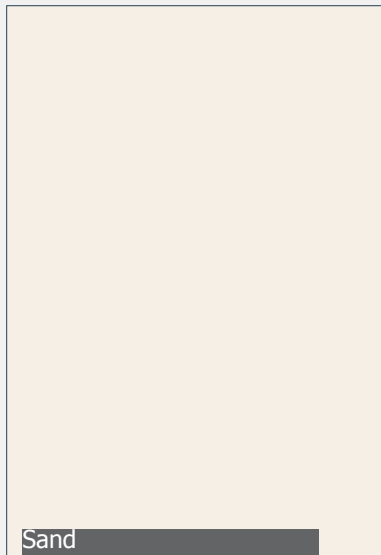

Nineteen different MDF door designs are available, each in up to 12 different sizes.

These are heavy doors, weighing approximately 5 to 6 pounds per square foot.

All MDF doors include a primed finish...your choice of 3 colors...white, stone, or sand. If you wish to paint your MDF door, we suggest ordering the door with the white finish color.

White Primed

Sand

Stone

8'0" Contemporary Metal 4 Lite rolling doors with Cloud glass and Gage rolling hardware.

CONTEMPORARY METAL COLLECTION

BARNCRAFT PREMIUM ROLLING DOORS

THE CONTEMPORARY METAL BARNCRAFT COLLECTION

Urban Modern Design

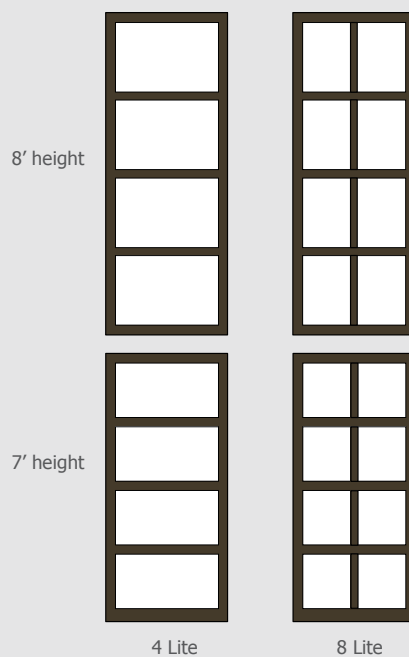

The Contemporary Metal Collection features flush glazed doors with very narrow aluminum stiles and rail, creating a minimalist modern look. These doors utilize heavy 3/8 inch thick tempered safety glass, which is available in 2 different glass types: clear or cloud. All doors are coated with a permanent black finish — other finish options are not available.

Only the Gage type hardware may be used with this door. The Gage is available in both black or stainless steel finishes. See page 12 for more information on Gage hardware. (Gage hardware is not included with the purchase of this door and should be ordered separately.

These Contemporary Metal doors are all 1-1/16" thick, and available in two heights (84" and 96") and two widths (36" and 42").

Doors include 1 door pull — see below. Other door pulls will not fit on this door. Stiles and rails are 1-5/8 inches wide.

Design Options

Shown with 42" wide x 96" tall 4 Lite Contemporary metal door with Gage hardware kit and painted mounting header board.

CONTEMPORARY BIRCH COLLECTION

BARNCRAFT PREMIUM ROLLING DOORS

THE CONTEMPORARY BIRCH BARNCRAFT COLLECTION

Minimalist Modern Design

The Contemporary Birch Collection features solid or true flush glazed doors with minimalist designs, including Brentwood, Westwood, Fleetwood, Inglewood, Beverly and Santa Monica designs in premium Birch wood. The collection offers a choice of multiple stain and paint options that bring out the understated elegance of these doors.

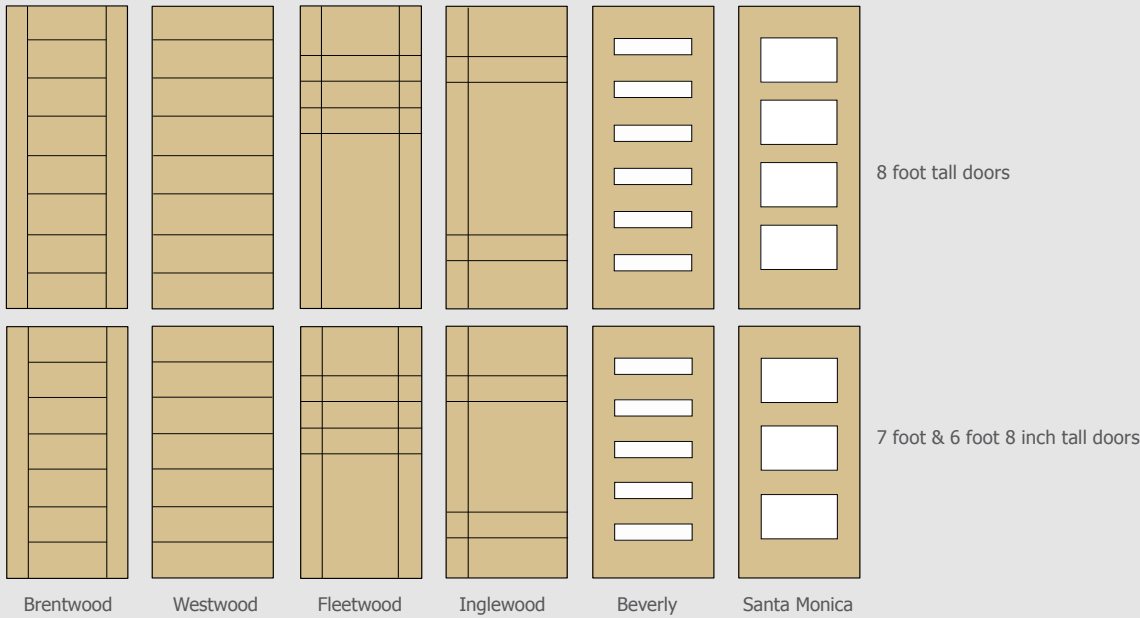

Complement these contemporary rolling doors with either black or stainless steel hardware. See page 12 for all available BarnCraft rolling hardware options. All doors in this series are available assembled only. All glass textures and mirror option used in this door series are made of safety glass.

These doors are all 1-3/4" thick.

Brentwood door shown with Slade rolling hardware, Vista handle, and Canyon Brown Traditional finish.

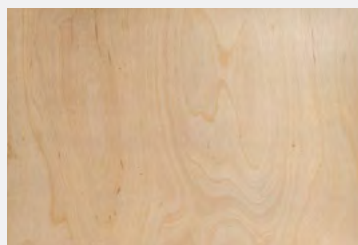

Design Options

Note: Brentwood, Inglewood, Fleetwood, and Westwood are V-grooved on both sides while Beverly and Santa Monica may be ordered with the glass textures shown on page 70.

OPTIONS for the CONTEMPORARY BIRCH COLLECTION

Birch Wood

Birch wood is a creamy white sap wood with some golden brown flame patterns and has a warm and pleasing appearance. It has a fine, uniform texture with closed pores. Birch wood is strong and is a very stable wood with beautiful grain patterns that highlight any stain color. Birch also provides a great surface for paint finishes.

Birch Stain Finish Options

Twenty-eight factory finish color options are available for all Birch Collection doors. These doors are available unfinished (photo above left is the unfinished raw wood) **or** factory finished in 28 colors as shown on the page at right. The Traditional colors on Birch include the stain color and a clear urethane satin-sheen top coat. The Antique Colors are darker, and suggest an aged appearance. And the Distressed Colors add faux worm holes and cracks to the Antique option for a more rustic aged look. (Distressed and Antique are the same color).

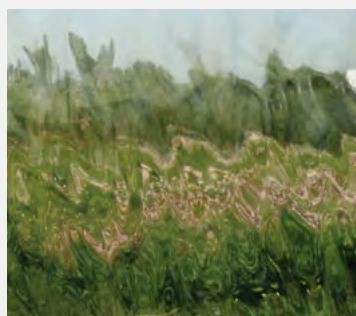

Glass Texture Options for Beverly or Santa Monica Doors

Choose from six different glass texture options for your Beverly or Santa Monica Birch Contemporary door. The glass options are produced using safety glass, and the glass is 1 layer thick (not insulated glass).

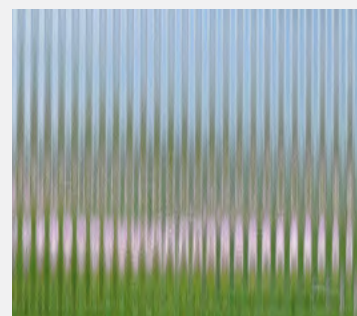

The capacity to see through the glass panel varies depending on the glass texture chosen.

GLASS & MAHOGANY DOOR COLLECTION

BARNCRAFT PREMIUM ROLLING DOORS

THE GLASS & MAHOGANY DOOR BARNCRAFT COLLECTION

Timeless Design

The Mahogany Door Series of BarnCraft rolling doors include these Mahogany doors with glass in various size, glass, and finish options. Choose from raw unfinished wood or 28 stain colors with Traditional, Distressed or Antique finishing options (refer to the next page for finish color options). Mahogany varies from rich golden to deep brown colors and has a straight to wavy even graining that has a beautiful sheen when finished.

See page 12 for the BarnCraft rolling hardware in black and stainless steel options to complement the various rolling doors in this Glass Door Series.

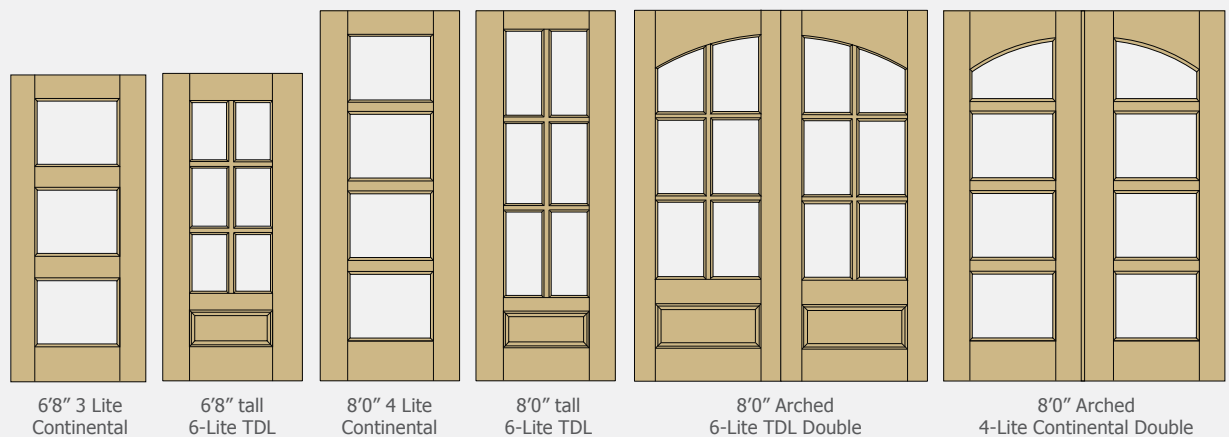

Glass texture options are listed below. All glass used in these doors is single-thickness, and is tempered safety glass. Door finish options on the next page.

These doors are all 1-3/4" thick, and are all True Divided Lite doors, meaning that each piece of glass is a separate piece glazed in place individually. Tempered safety glass is 1 layer thick.

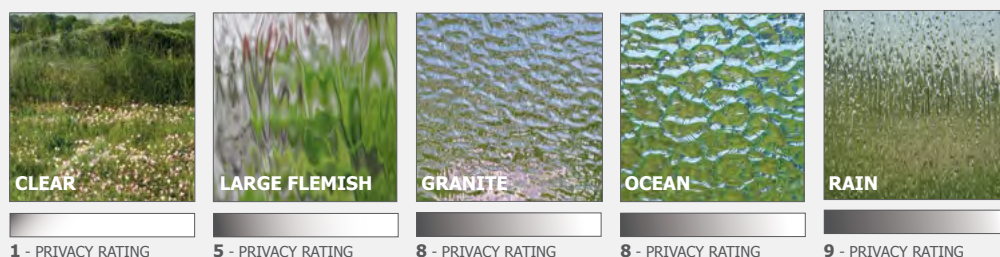

Shown with customer-painted red color, Slade rolling hardware, Monterey handle and clear glass.
