1. In the following question, four sentences are given which may or may not be grammatically and contextually correct. You need to find the one which has no error and mark that as your answer. If all the given sentences are correct/incorrect then mark option (E) i.e. 'all are correct/none is correct' as your answer.
- (a) The report said India's growth decelerate for the second consecutive year.
 - (b) The fares are higher but there is hard any change in the running time.
 - (c) Also tickets are available only online which are contrary to the rule book.
 - (d) The train charges 2,450 for AC Executive Class and 1,565 for the AC Chair Car including GST and catering.
 - (e) None is correct

2. In the following question, four sentences are given which may or may not be grammatically and contextually correct. You need to find the one which has no error and mark that as your answer. If all the given sentences are correct/incorrect then mark option (E) i.e. 'all are correct/none is correct' as your answer.

- (a) We must know of what we speak when we speak of categories that allow us to challenge and remake our worlds.
- (b) Tikri Kalan has a legal PVC market on DDA land who deals with scrap plastic.
- (c) The party said strong steps need to taken to stop crime in the Capital.
- (d) The law and order situation in Delhi is deterioration rapidly.
- (e) None is correct

3. In the following question, four sentences are given which may or may not be grammatically and contextually correct. You need to find the one which has no error and mark that as your answer. If all the given sentences are correct/incorrect then mark option (E) i.e. 'all are correct/none is correct' as your answer.

- (a) Scrap plastic from these markets is take to the agricultural fields in Haryana and burnt there.
- (b) It needs to be worked out how is the police is going to control crime when a large number of illegal immigrants are living here.
- (c) Shyam Sundar, a tailor, believes that the BJP candidate will easily sail through as he had delivered on development work.
- (d) The fires detected by satellites don't give a clear picture of the stubble burning incidents.
- (e) All are correct.

✓ 4. In the following question, four sentences are given which may or may not be grammatically and contextually correct. You need to find the one which has no error and mark that as your answer. If all the given sentences are correct/incorrect then mark option (E) i.e. 'all are correct/none is correct' as your answer.

- (a) The number of farm fires in Punjab at present is almost negligible. ✓
- (b) Clearing the trucks took time due to continuous landslides and shooting stones from hills overlooking the highway.
- (c) The study found that exclusion due to Aadhaar linking is more prevalent in tribal areas.
- (d) The protesters raised slogans against the Deputy CM and the State government for not draining out the water.
- ✓ (e) All are correct

Pests are any organisms that are considered, from the (5)_____ of humans, to be undesirable in some ecological context. For example, pests could be insects that compete with humans for some common resource, such as agricultural production or timber. Other pests might be (6)_____ with diseases of humans, livestock, or agricultural plants. Pests could also be unwanted weeds that compete with agricultural plants for necessary resources. Or pests may merely have aesthetics that are viewed as undesirable, as is the case of weeds in a lawn.

When pests are abundant enough to cause damage that is considered to be (7)_____, the abundance of the pests may be managed in some way. For example, if wolves are considered to be an important predator of livestock or wild ungulates, they may be killed by shooting them or using poisons. The most important reason for plowing in agriculture is to reduce the (8)_____ of weeds. Often pesticides are used, for example, to protect crops and livestock from diseases and depredations by fungi, insects, mites, nematodes, or rodents, to protect crop plants from competition with weeds, or to protect humans against the insect vectors of disease-causing pathogens. There are (9)_____ benefits to humans of the use of most pest-management strategies.

It is important to understand, however, that the very species that are considered pests may have desirable attributes in other contexts, or their values may at least be neutral. Therefore, whether an organism is viewed as a pest is entirely a matter of (10)_____, and the criteria generally focus on the needs and perspectives of humans.

In the following passage, there are blanks, each of which has been numbered. These numbers are printed below the passage and against each, four words are suggested, one of which fits the blank appropriately. Find out the appropriate word in each case.

5. (a) Angel (b) Perspective
(c) Scenario (d) Outrage
(e) None of these.

Pests are any organisms that are considered, from the (5)_____ of humans, to be undesirable in some ecological context. For example, pests could be insects that compete with humans for some common resource, such as agricultural production or timber. Other pests might be (6)_____ with diseases of humans, livestock, or agricultural plants. Pests could also be unwanted weeds that compete with agricultural plants for necessary resources. Or pests may merely have aesthetics that are viewed as undesirable, as is the case of weeds in a lawn.

When pests are abundant enough to cause damage that is considered to be (7)_____, the abundance of the pests may be managed in some way. 10. (a) Declaration
(c) Procurement
(e) None of these.
- (b) Judgment
(d) Evasion

Read the following passage and answer the following questions. Some words are highlighted to help you answer some of the questions.

There was something pathetic about Union Communications Minister's wishful thinking as he addressed the Mobile Congress last month. He said his vision of 5G for the country was not just a rollout of services, but the creation of country's intellectual property (IP) and patents in 5G technology.

This may be possible in a couple of decades, but right now we might as well be crying for the moon. While companies around the world, notably the Chinese, have secured thousands of patents in this revolutionary technology that will provide the platform for inventing a host of new products, technologies and services, the companies of Country 'X' are yet to start field trials of 5G spectrum for which permission was granted just recently. Equipment for these trials, needless to say, will be provided by foreign vendors. Most people assume that 5G will provide faster speeds than 4G- which bypasses the hinterland and works only patchily in urban areas of country 'X' but that would be a gross simplification. 5G will empower the invention of thousands of new products, technologies and services, increase productivity and allow for new industries to emerge.

A global 5G network will unify mobile communication and connect people and devices to everything through the Internet of Things. Given that 3G and 4G patent holders have controlled the use of mobile technologies in the smartphone industry, those who own the intellectual property (IP), primarily the SEPs or the standard essential patents, will become the market leaders in a technology that will reshape the future. Remember that companies here or anywhere will have to use SEPs when implementing standardised 5G technology. This means the clutch of companies that own these will rake in billions from licensing the SEPs. Country 'X' may be sending missions to the moon but in the area where technological prowess matters most the country stands nowhere. Not a single telecom firm from country 'X' is in the list of 303 deployment of 5G technology worldwide.

This industry list has 20 operators in 294 locations. Worse, although the domestic firms are expected to start their three-month long trial shortly, it is worth remembering that the industry is in dire straits with huge debts and has indicated that it would be in no position to bid for 5G spectrum. Nor does Country 'X' has the kind of resources that President Xi Jinping is investing in 5G apart from the sharp research effort on it. No wonder Chinese firms command the lion's share of patents among the clutch of global firms that own IP in 5G. Its star performer Huawei, blacklisted by the Trump Administration, continues to surge ahead with revenues soaring by 23 per cent. Country 'X' has to decide if Huawei-with which the initial 5G sortie was made in a lab run-is a security threat or not. Can Country 'X' ever catch up? Field trials are just the starting point; it merely allows operators and equipment makers to prove that the network they have designed in a laboratory _____ (I) _____. Then there is the long haul to a commercial rollout. As Country 'X' obsesses about its technological expertise in a mythical past, the future is looking decidedly dim.

11. Which of the following statements support the current scenario regarding 5G technology in China?

- (i) A reasonable number of Chinese firms own Intellectual Property in 5G
- (ii) Huawei is one of the largest revenue generators among the Chinese firms in field of 5G.
- (iii) The Chinese President has spent huge resources and encouraged research for the development of this technology.

(a) Both (i) & (ii)

(b) Both (ii) & (iii)

(c) Only (iii)

(d) All (i), (ii), (iii)

(e) Only (ii)

Read the following passage and answer the following questions. Some words are highlighted to help you answer some of the questions.

There was something pathetic about Union Communications Minister's wishful thinking as he addressed the Mobile Congress last month. He said his vision of 5G for the country was not just a rollout of services, but the creation of country's intellectual property (IP) and patents in 5G technology.

This may be possible in a couple of decades, but right now we might as well be crying for the moon. Country 'X' has to decide if Huawei-with which the initial 5G sortie was made in a lab run-is a security threat or not. Can Country 'X' ever catch up? Field trials are just the starting point; it merely allows operators and equipment makers to prove that the network they have designed in a laboratory ____ (I) ____ Then there is the long haul to a commercial rollout. As Country 'X' obsesses about its technological expertise in a mythical past, the future is looking decidedly dim.

12. How the author has defined Country X's position in terms of development of 5G Technology?

- (a) 5G is a technological paradigm shift, analogous to the shift from typewriter to computer
- (b) the country is lost in a black hole in the fields where the technological expertise matters the most
- (c) 5G technology in country 'X' has been as revolutionary as electricity or the automobile, benefitting entire economy
- (d) 5G technology introduced within country 'X' will offer host of features and give a boost to economy
- (e) none of these

Read the following passage and answer the following questions. Some words are highlighted to help you answer some of the questions.

There was something pathetic about Union Communications Minister's wishful thinking as he addressed the Mobile Congress last month. He said his vision of 5G for the country was not just a rollout of services, but the creation of country's intellectual property (IP) and patents in 5G technology.

As Country 'X' obsesses about its technological expertise in a mythical past, the future is looking decidedly dim.

15. Which of the following statements is true as per the information given in the passage?

- (a) companies with SEPs will not be able to monopolise the 5G network market
- (b) equipment for the trials of 5G connections will be domestically manufactured to boost the domestic markets within country 'X'
- (c) the future of technological expertise in Country 'X' appears to be bright
- (d) the Union Communications Minister expects introduction of 5G in country 'X' to be largely rolling out of an innovative service
- (e) none of the given statements is true

Read the following passage and answer the following questions. Some words are highlighted to help you answer some of the questions.

There was something pathetic about Union Communications Minister's wishful thinking as he addressed the Mobile Congress last month. He said his vision of 5G for the country was not just a rollout of services, but the creation of country's intellectual property (IP) and patents in 5G technology.

This may be possible in a couple of decades, but right now we might as well be crying for the moon. While companies around the world, notably the Chinese, have secured thousands of patents in this revolutionary technology that will provide the platform for inventing a host of new products, technologies and services, the companies of Country 'X' are yet to start field trials of 5G spectrum for which permission was granted just recently. Equipment for these trials, needless to say, will be provided by foreign vendors. Most people assume that 5G will provide faster speeds than 4G- which bypasses the hinterland and works only patchily in urban areas of country 'X' but that would be a gross simplification. 5G will empower the invention of thousands of new products, technologies and services, increase productivity and allow for new industries to emerge.

A global 5G network will unify mobile communication and connect people and devices to everything through the Internet of Things. Given that 3G and 4G patent holders have controlled the use of mobile technologies in the smartphone industry, those who own the intellectual property (IP), primarily the SEPs or the standard essential patents, will become the market leaders in a technology that will reshape the future. Remember that companies here or anywhere will have to use SEPs when implementing standardised 5G technology. This means the clutch of companies that own these will rake in billions from licensing the SEPs. Country 'X' may be sending missions to the moon but in the area where technological prowess matters most the country stands nowhere. Not a single telecom firm from country 'X' is in the list of 303 deployment of 5G technology worldwide.

This industry list has 20 operators in 294 locations. Worse, although the domestic firms are expected to start their three-month long trial shortly, it is worth remembering that the industry is in dire straits with huge debts and has indicated that it would be in no position to bid for 5G spectrum. Nor does Country 'X' has the kind of resources that President Xi Jinping is investing in 5G apart from the sharp research effort on it. No wonder Chinese firms command the lion's share of patents among the clutch of global firms that own IP in 5G. Its star performer Huawei, blacklisted by the Trump Administration, continues to surge ahead with revenues soaring by 23 per cent. Country 'X' has to decide if Huawei-with which the initial 5G sortie was made in a lab run-is a security threat or not. Can Country 'X' ever catch up? Field trials are just the starting point; it merely allows operators and equipment makers to prove that the network they have designed in a laboratory ____**(I)**____ Then there is the long haul to a commercial rollout. As Country 'X' obsesses about its technological expertise in a mythical past, the future is looking decidedly dim.

16. Which of the following phrases can fill in the blank (I), to make the statement grammatically and contextually meaningful?

- (a) over 5G network security concerns
- (b) 5G applications at the third edition
- (c) telecom equipment manufacturers
- (d) actually works in practice
- (e) prolongs wait and is dangerous

Read the following passage and answer the following questions. Some words are highlighted to help you answer some of the questions.

There was something pathetic about Union Communications Minister's wishful thinking as he addressed the Mobile Congress last month. He said his vision of 5G for the country was not just a rollout of services, but the creation of country's intellectual property (IP) and patents in 5G technology.

This may be possible in a couple of decades, but right now we might as well be crying for the moon. While companies around the world, notably the Chinese, have secured thousands of patents in this revolutionary technology that will provide the platform for inventing a host of new products, technologies and services, the companies of Country 'X' are yet to start field trials of 5G spectrum for which permission was granted just recently. Equipment for these trials, needless to say, will be provided by foreign vendors. Most people assume that 5G will provide faster speeds than 4G- which bypasses the hinterland and works only patchily in urban areas of country 'X' but that would be a gross simplification. 5G will empower the invention of thousands of new products, technologies and services, increase productivity and allow for new industries to emerge.

Field trials are just the starting point; it merely allows operators and equipment makers to prove that the network they have designed in a laboratory ____(I)____ Then there is the long haul to a commercial rollout. As Country 'X' obsesses about its technological expertise in a mythical past, the future is looking decidedly dim.

18. Which of the following phrases implies similar meaning as 'crying for the moon', as highlighted in the above passage?

- (a) To deride or mistreat someone or something.
- (b) To overshadow or silence someone or something
- (c) To be problematic and inopportune
- (d) To make an impractical or unreasonable request
- (e) A critical need for someone or something

Directions (Q. Nos. 19-23) Read each sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The number of that part is the answer. If there is 'No error', the answer is (5). (Ignore errors of punctuation, if any.)

- 19. (1) Harsh Vardhan said he was looking forward /(2) to serving his roots, as he had spend /(3) the first 15 years of his life /(4) in the streets of old Delhi. /(5) No error**

(Mad + U)³

Spent

✓ 20. (1) A family office has to / (2) execute all tasks related to / (3) manage the wealth of / (4) the upper-rich family. / (5) No error

Managing

21. (1) Service providers in the financial industry, specially private banks / (2) and wealth management firms, are increasingly / (3) forced to standardise their / (4) products to optimise profit. / (5) No error

✓ 22. (1) Social or impact funds are private equity-like funds /(2) that pool money from investors /(3) and put it to work in a portfolio of ventures /(4) that meet the fund's objective. /(5) No error

✓ 23. (1) While residential land purchases /(2) have benefitted many investors /(3) buying land can be risky (4) especially for a NRI. /(5) No error

an

In the following question a sentence is given with a blank followed by three words. Choose among the following option which reflects the most suitable word(s) that can be filled in the blank.

24. The protesters_____ slogans against the Deputy Chief Minister and the State government for not draining out the water.

- (A) raised
- (B) shouted
- (C) chanted

- (a) Only (A)
- (b) Only (B)
- (c) Only (C)
- (d) Only (A) and (B)
- (e) All (A) (B) and (C)

In the following question a sentence is given with a blank followed by three words. Choose among the following option which reflects the most suitable word(s) that can be filled in the blank.

25. Chief Minister Nitish Kumar has called a review meeting on Monday to _____ waterlogging issues.

- (A) tackle**
- (B) discuss**
- (C) redeem**

- (a) Only (A)**
- (b) Only (B)**
- (c) Only (C)**
- (d) Only (A) and (B)**
- (e) Only (A) and (C)**

In the following question a sentence is given with a blank followed by three words. Choose among the following option which reflects the most suitable word(s) that can be filled in the blank.

26. The Commission had recently launched 'Jeevan Kaushal', a life skills programme in the _____ for undergraduate courses across the country.

(A) preponderance

☒ (B) curriculum

☒ (C) modules

(a) Only (A)

(b) Only (B)

(c) Only (C)

(d) Only (A) and (B)

☒ (e) Only (B) and (C)

In the following question a sentence is given with a blank followed by three words. Choose among the following option which reflects the most suitable word(s) that can be filled in the blank.

27. The Odisha government issued show-cause notice to the Sundargarh Collector and the suspended in-charge CDMO for their _____ negligence in implementing 'Mo Sarkar' healthcare initiative.

- (A) Alleged
- (B) Purported
- (C) Ostensible

- (a) Only (A)
- (b) Only (B)
- (c) Only (C)
- (d) Only (A) and (B)
- (e) All (A) (B) and (C)

In the following question a sentence is given with a blank followed by three words. Choose among the following option which reflects the most suitable word(s) that can be filled in the blank.

28. The services that were provided in the Sundargarh district did not _____ to the quality standards prescribed under the government initiative.

- (A) Conform
- (B) Comply
- (C) Meet

- (a) Only (A)
- (b) Only (B)
- (c) Only (C)
- (d) Only (A) and (B)
- (e) Only (A) and (C)

In the following question a sentence is given with a blank followed by three words. Choose among the following option which reflects the most suitable word(s) that can be filled in the blank.

29. In an attempt to discourage the use of plastic, the city corporation is _____ a cup of tea in exchange for four plastic bottles at the canteens.

- (A) Offering
- (B) Serving
- (C) Pouring

- (a) Only (A)
- (b) Only (B)
- (c) Only (C)
- (d) Only (A) and (B)
- (e) All (A) (B) and (C)

In the following question a sentence is given with a blank followed by three words. Choose among the following option which reflects the most suitable word(s) that can be filled in the blank.

30. The Indian government should now be_____ to raise more tax revenues.

- (A) Desperate
- ☒ (B) Apologetic
- (C) Itching

- (a) Only (A)
- (b) Only (B)
- (c) Only (C)
- (d) Only (A) and (B)
- (e) Only (A) and (C)
