Directions (1-8): Read the following passage and answer the given questions. Certain words are highlighted to answer some of the questions.

Australia has long been associated with vast deserts, sunny skies, and a strong mining industry. However, in recent years, the nation has turned its attention toward renewable energy as a viable and necessary solution for sustainable growth. While the transition is still in progress, promising developments have positioned Australia as a key player in the global clean energy movement. The country's geographical advantages make it ideal for solar and wind energy. In fact, Australia has some of the best solar exposure in the world.

Solar farms across Queensland and New South Wales are generating record amounts of electricity, helping to reduce reliance on fossil fuels. Similarly, wind power has seen rapid expansion, particularly in states like Victoria and South Australia, where consistent wind conditions support large-scale wind farms. However, the road to a renewable future has not been without difficulties. The process has been fraught with policy uncertainties and infrastructure limitations. Frequent changes in energy policy have created confusion among investors, slowing down the pace of new renewable projects. In addition, the existing electricity grid is outdated and struggles to handle the variable nature of solar and wind energy. This has raised concerns about energy reliability during peak demand periods.

Despite these obstacles, Australia has taken meaningful steps forward. Battery storage technology is evolving quickly, allowing excess renewable energy to be stored and used when needed. The development of pumped hydro energy storage and large-scale battery farms is _____ for a more stable and efficient energy system.

Another promising area is green hydrogen — a clean fuel produced using renewable electricity. With pilot projects already underway, Australia hopes to become a leading exporter of green hydrogen in the future, especially to energy-hungry nations like Japan and South Korea. Public support for clean energy is also growing. More Australians are installing rooftop solar panels than ever before, and community-driven initiatives are gaining momentum. This growing awareness is crucial for long-term success. While challenges remain, the momentum is undeniable. Australia's renewable energy sector is evolving rapidly, driven by innovation, investment, and a clear need to act on climate change. If the nation can overcome policy and infrastructure hurdles, it may not only meet its energy goals but also inspire other countries with similar potential.

1. What can be inferred about the future of green hydrogen in Australia from the given passage?

- (A) It will completely replace solar and wind energy within a decade.
- (B) It is being dismissed as too expensive to pursue.
- ☒ (C) It is in early stages but seen as a strategic opportunity.
- (D) It has already become the country's primary export fuel.
- (E) None of these.

2. Why might investors hesitate to fund renewable energy projects in Australia?

- (A) Because Australia lacks natural resources for renewable energy.
- (B) Due to instability and regulatory environment.
- (C) Because public interest in clean energy is declining.
- (D) As renewable energy projects are currently banned.
- (E) None of these.

3. **What does the passage imply about the current condition of Australia's energy grid?**
- (A) It is fully equipped to support modern renewable technologies.
 - (B) It is outdated and struggles to adapt to renewable sources.
 - (C) It was recently upgraded for efficient energy transfer.
 - (D) It relies solely on hydropower to maintain balance.
 - (E) None of these.

4. Choose the word that is closest in meaning to "fraught" as used in the passage:

(A) Smooth

(B) Laden

(C) Free

(D) Simple

(E) All are correct.

5. Battery storage technology is evolving quickly, allowing excess renewable energy to be stored and used when needed, _____ for a more stable and efficient energy system.

- (A) Rupturing
- (B) Restraining
- ☒ (C) Paving the way
- (D) Disregarding
- (E) None of these

6. What can be inferred about the author's attitude toward Australia's renewable energy journey?
- (A) Skeptical and dismissive of its progress.
 - (B) Neutral and purely factual with no opinion.
 - ☒ (C) Optimistic yet aware of the challenges.
 - (D) Strongly opposed to non-renewable energy policies.
 - (E) All are correct.

7. How does public support influence Australia's renewable energy transition?

- (A) It has had little impact due to slow government response.
- (B) It is slowing the adoption of green hydrogen projects.
- ☒ (C) It helps promote clean energy through local actions and awareness.
- (D) It encourages more investment in fossil fuel alternatives.
- (E) None of these.

8. Choose the word that is opposite in meaning to “promising” as used in the passage.

(A) Hopeful

(B) Uncertain

(C) Bright

(D) Encouraging

(E) All are correct.

Direction (9 - 13) Read the following passage and answer the given questions. In each of the questions given below, a set of six statements is given, out of which only the statement given in bold is fixed, and the rest are jumbled in any random order. Rearrange the remaining statements in the right order and answer the questions that follow.

- A. It is also associated with chronic illness and disability.
- B. Physical inactivity is the fourth leading cause of death worldwide
- C. Popular ways to be physically active include walking, cycling, and playing sports.
- D. Regular physical activity helps to prevent and manage many chronic diseases.
- E. The World Health Organisation recommends that children and adolescents get an average of at least 60 minutes per day of moderate to vigorous intensity physical activity.
- F. Recent research estimates that the world could see close to half a billion new cases of major chronic diseases by 2030 if people don't get more active.

BAFDCE.

9. Which among the following would come after the Statement A after the rearrangement?

✓ (A) (F)

(B) (B)

(C) (C)

(D) (D)

(E) None of the above

10. Which among the following would precede the Statement (F) after the rearrangement?

(A) (B)

(B) (C)

(C) (E)

(D) (A)

(E) None of the above

11. Which among the following would be the FIFTH sentence of the paragraph after the rearrangement?

(A) (A)

(B) (C)

(C) (F)

(D) (E)

(E) None of the above

12. Which among the following would be the **SECOND** statement of the paragraph after the rearrangement?

(A) (F)

(B) (C)

~~(C) (A)~~

(D) (B)

(E) None of the above

13. Which among the following would be the SIXTH (LAST) sentence after the rearrangement?

(A) F

(B) B

☒ (C) E

(D) C

(E) None of the above

14. In the question given below, a sentence is given with two blanks. From the given options, choose the one that gives the correct combination of words that fit in the blanks.

**The world is a struggle for _____ supremacy
_____ two individuals with separate sources
of power.**

- (A) fascinating, amongst
- (B) backpacking, despite
- ✓ (C) witnessing, between
- (D) astonishing, for
- (E) None of the above

15. In the question given below, a sentence is given with two blanks. From the given options, choose the one that gives the correct combination of words that fit in the blanks.

Zelda is one of the most _____ and successful video game franchises of all time, with _____ 100 million copies sold worldwide.

- (A) powerful, above
- (B) dominant, maximum
- (C) prestigious, minimum
- (D) influential, over
- (E) None of the above

16. Direction: The following question carries a statement with two blanks. From the given options, choose the word that would fit in both the blanks to make the sentence grammatically correct and meaningful.

While I was _____ about my daughter's cold, I did not think it would be a _____ to her school attendance.

- (A) Talking, obstacle
- (B) Bothered, problem
- ☒ (C) Concerned, hindrance
- (D) Treating, question
- (E) Affected, matter

17. Directions: In each question below, a sentence is given with two blanks indicating that some parts are missing.

Identify the correct pair of words that fit in the sentence to make it grammatically and contextually correct.

Humans could be directly _____ to antibiotic-resistant elements while _____ air pollutants.

- (A) protected, consuming
- (B) covered, breathing
- (C) addicted, absorbing
- (D) obsessive, gasping
- (E) exposed, inhaling

18. Direction: The following question carries a statement with two blanks. From the given options, choose the word that would fit in both the blanks to make the sentence grammatically correct and meaningful.

As the judge looked at the rebellious teen, he realized the fear of prison was not a strong enough _____ to keep young people out of _____.

- (A) Disincentive, fear
- (B) Purpose, worry
- (C) Objective, concern
- (D) Deterrent, trouble
- (E) Factual, upset

19. Direction: In the following question, three sentences are given revolving around the same theme or idea. Decide which of the sentence(s) is/are grammatically and meaningfully correct and mark the answer accordingly.

1. The government has announced new rules for the distribution of COVID-19 vaccines, with priority given to healthcare workers and vulnerable populations during the pandemic.

2. After being closed for nearly a year due to the pandemic, the popular tourist attraction will be reopening its doors next week.

3. Profits of the companies making COVID 19 vaccines have seen insignificant increases this quarter after the government announced the distribution rules.

(A) Only 1

(C) Only 2

(B) Both 1 and 2

(D) Both 2 and 3

(E) All 1, 2 and 3

20. Direction: In the following question, three sentences are given revolving around the same theme or idea. Decide which of the sentence(s) is/are grammatically and meaningfully correct and mark the answer accordingly.

1. Considering the limited information for both China and India, especially in the absence of the Census 2021, it is difficult ~~for~~ predict the exact date on which this demographic order will change.

2. A deeper look into the trends of population growth, size and composition gives one an idea of whether India has over-population that can disrupt carrying capacity.

3. If India is able to generate sufficient and quality jobs for its bulging working age population, realisation of demographic dividend will be achieved.

(A) Only 1

(B) Only 1 and 2

(C) Only 2 and 3

(D) Only 1 and 3

(E) All 1, 2 and 3
