Direction (1-15): In the questions given below a sentence is broken into four parts and the parts need to be rearranged to make the sentence meaningful again. Rearrange the parts and choose the correct option.

1. P) Tesla has updated its panels to be about 10 percent more efficient, and has also lowered its prices.

Q) The company also engineers, manufactures and installs solar panels -- both the traditional kind and modules that look like ordinary roof tiles.

R) And while the latter seems like it could be a path to more mainstream adoption of renewable energy, the former is still the go-to solution for the solar industry.

S) Tesla doesn't just make cars.

- 2) P) The team of researchers in Nottingham refined the equation using new data and assumptions.
Q) They found that there are likely between four and 211 civilizations capable of communicating with others, with 36 the most likely number.
R) Our current technology makes it nearly impossible to detect or communicate with possible alien life.
S) Finding these civilizations is another issue entirely -scientists said they would be thousands of light years away.

- 3) P) Domain experts, journalists and former Army officials have analysed the strategic importance of Ladakh to India and China.
- Q) The barren landscape of Ladakh is yet to be fully explored for natural resources.
- R) The region is crucial to both India and China's plans to boost their respective economies.
- S) For China, it is not limited to territorial dominance over the Galwan Valley alone.

- 4) P) Considering the large volume of Bangladeshi migrants in the Middle East, secondary economic impacts through depressed demand and falling oil prices will also likely add strain to the flow of remittances.
Q) But the COVID-19 pandemic is having an acute effect on Bangladeshi migrants abroad, who are largely concentrated in countries with strict lockdown measures.
R) International remittances normally represent around 7% of Bangladesh's GDP.
S) The economic importance of the more than 10 million migrants from Bangladesh who sent close to \$18 billion in 2019 cannot be overstated.

5. P) Studies on small cats remain limited with carnivore research in India being skewed towards large cats.
 Q) Small cats are more specialized than their larger cousins in terms of resource selection.
 R) We estimated the abundance of two widespread small cats, the jungle cat, and the rusty-spotted cat, and investigated their habitat associations based on camera trap captures from a central Indian tiger reserve.
 S) Studies on small cat population and habitat preference are critical to evaluate their status to ensure better management and conservation.

6. **P) Plans for an independent satellite system were announced in 2018 by the then prime minister, Theresa May to ensure national security in the event that Britain were banned from equal access to the EU programme after Brexit.**
- Q) The ministers are exploring other options, which include using OneWeb, the UK satellite operator that went bankrupt in March, the Financial Times reported, citing sources.**
- R) OneWeb has pledged to move its satellite production from Florida in the US to the UK if its management wins government support for its bid, according to the report.**
- S) British ministers are seeking to scale back plans for a £5bn satellite navigation system that was introduced in 2018 as an alternative to the EU's Galileo project, it has been reported.**

7. P) As Delhi heads for a caseload of half a lakh and 80 percent of ICU beds are filled, the health crisis is being intensified with nurses in the capital's private hospitals reportedly resigning or refusing to work.
- Q) However, the plight of nurses, who have been working at the front in the battle against COVID-19, must be appreciated.
- R) Their complaints are well-known, have been repeatedly articulated and remain largely ignored.
- S) In some cases, nursing home owners are doubling up as janitors, while others are going to the police to complain that nurses are abandoning patients.

11. P) The number of seats available on a train is limited and due to the large gap between demand and supply, ticketing is instrumental in achieving the objective of decongestion when limited services are available for such a large population.
- Q) We are a country of 130 crore with people across the social strata moving between states and cities.
- R) One of the major reasons behind the idea is to regulate the flow of people who are availing the service.
- S) We need to first understand the underlying purpose of ticketing.

12. P) There have been two successful models of fighting the pandemic.
- Q) India seems to have adopted the worst combination of a macro lockdown with micro testing that was bound to fail.
- R) What is required at this stage, if we seriously want to address the twin crises, is taking a balanced position that treats both the crises equally and develops measures to address both simultaneously.
- S) One, which South Korea attempted, is mass testing, tracing and isolating without a lockdown, and the other is what China, Vietnam, or, closer home, Kerala implemented, that is, a region-specific micro level lockdown with aggressive health measures to control the spread.

13. P) This meant that to affix liability, it had to be shown that the polluting party had done it deliberately; or that s / he was rash or negligent in the way that s / he acted.

Q) The principle of 'absolute liability' laid down by the Supreme Court in 1986, in the MC Mehta vs Union of India decisions (popularly known as the Oleum Gas Leak Case) needs to be recounted here.

R) For many centuries, liability in law centered around the concept of 'fault' i.e. some form of a shortcoming in the conduct of the polluting party.

S) Now that the incident has happened, the next logical step would be to limit damages, clean up the spill and last but not the least, establish liability.

15. P) India, as defined by our Constitution, is all about 'we the people'.
Q) They had been left to their fates by the country.
R) The owners of the factories, farms, construction companies and other such establishments shunned their workers as soon as the government announced the lockdown.
S) There was one segment of these people, the Indians who were walking on the streets for hundreds and thousands of kilometres to reach their homes by any means, who had already taken this message seriously from day one of the lockdown, long before the prime minister asked them to be self-reliant.
