A person who denies the existence of God.

- (a) Agnostic**
- (b) Theist**
- (c) Atheist**
- (d) Heretic**

17. Select the correct indirect/direct form of the given sentence.

The reviewer projected that the market would rebound sharply in the next quarter, provided global economic stability improved.

- ☒ (a) The reviewer projected, "The market will rebound sharply in the next quarter, provided global economic stability improves."
- (b) The reviewer projected, "The market would rebound sharply in the next quarter, provided global economic stability improved."
- (c) The reviewer projected, "The market might rebound sharply in the next quarter, provided global economic stability improves."
- (d) The reviewer projected, "The market ought to rebound sharply in the next quarter, provided global economic stability improved."

18. Sentences describing ecological relationships are provided below in disorganized sequence. Reconstruct the narrative to form a logically flowing explanation:

1. These interactions, such as predation, competition, and symbiosis, define the community's structure.
2. An ecosystem is a dynamic community where living organisms constantly interact with each other and their environment.
3. Each species occupies a specific niche, influencing the flow of energy and nutrients throughout the system.
4. Ultimately, the health and stability of an ecosystem depend on the intricate balance of these diverse connections.

(a) 2, 4, 1, 3

(b) 1, 3, 2, 4

(c) 2, 1, 3, 4

(d) 3, 2, 4, 1

19. Spot the error in the following sentence.

✓ My neighbor constantly complains for the noise coming from the children playing in the park.

- (a) coming from
- (b) in the park
- (c) My neighbor
- ✓ (d) complains for

20. Select the most appropriate synonym of the given word:

Robust = *Strong*

- (a) Sensitive
- (b) Fragile
- (c) Durable
- (d) Sturdy

Comprehension:**Direction:- [Q.96. to Q.100.]**

Nutrition is the process by which living organisms obtain the food necessary for growth, metabolism, and other vital functions. It encompasses a vast array of biochemical and physiological processes, beginning with ingestion and culminating in the assimilation of nutrients at the cellular level.

Macronutrients — carbohydrates, proteins, and fats — are required in larger quantities as they provide the bulk of energy and building blocks for bodily structures. Carbohydrates are the body's primary energy source, proteins are crucial for tissue repair and enzyme production, while fats are essential for hormone production, nutrient absorption, and organ protection.

Micronutrients, though needed in smaller amounts, are equally indispensable. These include vitamins and minerals, which play pivotal roles in myriad enzymatic reactions, immune function, and overall cellular health. For instance, Vitamin C is vital for collagen synthesis and immune support, while iron is central to oxygen transport in the blood. A deficiency in any micronutrient can lead to specific health issues, ranging from mild impairments to severe diseases.

The concept of a "balanced diet" is foundational to good nutrition, advocating for a diverse intake of foods from all major food groups to ensure adequate provision of both macronutrients and micronutrients. However, modern dietary patterns, often characterized by highly processed foods, excessive sugar, and unhealthy fats, frequently deviate from this ideal. These imbalances contribute significantly to the global burden of non-communicable diseases, such as obesity, type 2 diabetes, and cardiovascular disease. Understanding the intricate relationship between diet and health empowers individuals to make informed choices, fostering well-being and preventing chronic illness. Educating the public on nutritional science is, therefore, a crucial public health endeavour.

21. What are the three main macronutrients required by the human body?

- (a) Vitamins, minerals, and water
- (b) Carbohydrates, proteins, and fats
- (c) Sugar, salt, and fiber
- (d) Enzymes, hormones, and cells

22. Why are micronutrients considered indispensable, even though they are needed in smaller amounts?

(a) They provide the body's primary energy source.

(b) They are crucial for tissue repair and enzyme production.

(c) They play pivotal roles in myriad enzymatic reactions, immune function, and cellular health.

(d) They are essential for hormone production and organ protection.

23. What is a key characteristic of modern dietary patterns, according to the passage?

- (a) A focus on balanced intake from all food groups.
- (b) High consumption of fruits and vegetables.
- (c) Frequent deviation from a balanced diet with processed foods and excessive sugar.
- (d) An increased understanding of nutritional science.

24. What is the primary role of carbohydrates mentioned in the passage?

- (a) Tissue repair.
- (b) Hormone production.
- (c) Oxygen transport.
- (d) Body's primary energy source.

25. What can a deficiency in any micronutrient lead to?

- (a) Increased energy levels.
- (b) Stronger immune function.
- (c) Specific health issues, from mild impairments to severe diseases.
- (d) Excess weight gain.
