1. P: However, Indian girls. have not matched this rate of access to education.

Q: Still the Indian girl child who has been deprived of this gift, as largely girls are not considered worthy of literacy.

R: The power of education in transforming communities is a gift that has changed India in the last few decades.

S: India has seen a substantial increase in primary school enrolment due to the Right to Education (RTE) Act 2009.

✓ 2. P: All Indian water bodies within and near population centres are now grossly polluted with organic and hazardous pollutants.

Q: India is now facing a water situation that is significantly worse than any that previous generations had faced.

R: That's why Interstate disputes over river waters are becoming intense and widespread.

S: Not a single Indian city can provide clean water that can be consumed from the tap on a 24×7 basis.

Q.

- ✓ 3. P: There is a glimmer of hope with India registering a slight drop in the number of new tuberculosis cases and TB deaths in 2016 compared with 2015.
- Q: Incidence estimates for India were considered interim, pending a national TB prevalence survey scheduled for 2017-18.
- R: In terms of mortality, the drop was from 0.51 million in 2015 to 0.43 million in 2016.
- S: From an estimated 2.84 million new cases in 2015, the number dropped marginally to 2.79 million in 2016, according to the World Health Organisations Global 'tuberculosis report, 2017

4. P: People today are so driven towards their personal goals that civic sense as an ethic has become a low priority, almost nuisance.

Q: This attitude cuts across all ranks and sections.

R: We don't think it deserves much importance.

S: Civic sense or rather the lack of it has been widely discussed and somehow it is an undisputed fact that we Indians don't seem to care much for it.

5. P: First impressions count and the first impression that a potential employer will have of you is going to de-pend on how you present your resume.

Q: The statistics are that the average employer only spends a few seconds looking at it, so it is imperative that it makes an impression.

R: Nobody can ever underestimate how important it is to have a good resume.

S: This is going to be your one and only chance to capture a potential employer's attention, or for your resume to be tossed into the file of those they don't want to pursue.

6. P: The growing popularity of computer, video games and television makes the children very inactive in their lifestyles.

Q: The time spent in these things may be spent in some physical activities.

R: Parents should be a role model for their children.

S: If the parents are looking very active, the children are more likely to be more active and will stay active for the rest of their life..

7. P: However, a person's specific daily calorie intake can vary depending on their age, gender and physical activity level.

Q: The average person needs to eat about 2000 calories everyday to maintain their weight.

R: Your body uses calories from food for walking, thinking, breathing and other important functions.

S: The number of calories in food is a measurement of the amount of energy stored in that food.

- (c) PSRQ
- (d) SRQP

$$S = R - Q = P$$

8. P: How do you find a mate when you are just 2cm in size and there aren't many who match your profile?

Q: Now, scientists have discovered that the loudspeakers they make are almost maximally optimised for the purpose at hand: transform any given leaf into the best 'amplifier' it could be.

R: But the tiny tree crickets have taken this a step further: they amplify their mating calls using loudspeakers that they themselves build using leaves.

S: An old trick is to draw attention to oneself by creating a lot of noise.

P.S - R = Q

9. P: The list also includes antibiotics and disinfectants, the use of which can stave off killers like sepsis and meningitis.

Q: The 10 critical products that hospitals must stock to save newborns include a piece of cloth to keep a baby warm and close to the mother to encourage breast-feeding.

R: The biggest cause of death is premature birth, while the second is complications like asphyxia during delivery.

S: But other solutions will need greater investment.

Q:-

10. P: First, with the discovery of the planet Kepler 90i, or-biting the star Kepler 90, we now know of another star besides the Sun that has eight planets orbiting it.

Q: But this announcement of the discovery of two new exoplanets, Kepler-90i and Kepler-80g by the National Aeronautics and Space Administration is particularly significant.

R: Second, Christopher Shallue, a software engineer at Google, and Andrew Vanderburg, of the University of Texas, Austin, have discovered it using a deep learning neural network-an artificial intelligence tools that mimics the workings of a human brain.

S: Exoplanets, or planets outside our solar system, are routinely being discovered, with the number of those that have already been found now standing at 3567.

P → R

11. P: The funds are intended to offset the loss of wages due to TB and to help with travel and nutrition.

Q: The Central TB Division has said the government would hand over a sum of 500 a month to each of India's 35 lakh diagnosed TB patients in order to strengthen the fight against the disease.

R: An early study from a prisoner-of-war camp in Germany in the 1940s showed that Soviet inmates, who didn't receive extra rations from the Red Cross as their British counterparts did, were around 16 times more likely to develop the disease.

S: Yet, much more needs to be done to protect TB patients from the effects of malnutrition, which has a complicated relationship with TB.
