PANCHA PAKSHI REPORT

ASTRO BLESS

"Blessings for joyful living"

*Based on Moon sign

ASTRO BLESS Pancha Pakshi report:

Name : ABC
Birth Star : Pooruttathi
Birth Paksha : Suklapaksha
Nakshatra Pakshi : Peacock

Pancha-Pakshi Shastra is based on ancient literature in Tamil language. Pancha means five and Pakshi means Bird. The Pancha-Pakshi system has some resemblance to the Pancha-Bhuta (Five elements) system of Vedic Astrology. It is believed that the Five Elements represented by five birds, influence and control all the actions of human beings. These five birds take their turns in a special sequence and radiate their powers during day and night. The power that takes effect first on a day or night and the sequence that follows depends on the day of the week and the Paksha (waxing half or waning half cycles) of the Moon.

One of the five birds is assigned to every human being as the controlling power based on the Birth Star of the person and the Paksha of the Moon at the time of birth. The activity of this Main Bird at a given point of time and the activity of the Sub-Bird at that time and the relationship between them indicates whether the time will be beneficial and lucky for the person or not. Pacha-Pakshi Shasta is very popular in south India especially Tamil Nadu. It helps selection of auspicious time and also for answering queries (Prasna)

The five birds in the Pancha-Pakshi Shastra are:

- 1- Vulture
- 2- Owl
- 3- Crow
- 4- Cock
- 5- Peacock

These birds engage in any one of the following five activities at any given time:

- 1- Rule
- 2- Eat
- 3- Walk
- 4- Sleep
- 5- Die

The birds are considered most powerful when they rule and least powerful when they die.

To find out your Birth Pakshi (Nakshatra Pakshi) you have to know your birth star according to Vedic Astrology and the Paksha of the Moon at the time of your birth. The half of the Lunar Cycle when the Moon increases in size and reaches the Full Moon (Pournami) is called Sukla-Paksha and the other half of the cycle when the size decreases until the New Moon (Amavasi) is called the Krishna-Paksha. Birth Stars are based on the longitude of Moon and are 27 in number from Aswini to Revati.

Each day of 12 hours (30 Nazhika) is divided into five equal portions called Yaama (6 Nazhika) and given to different activities of the birds. Within each portion, the time is further allocated to other birds called apahara birds and their activities. The duty cycles follow complex and intricate logic of Pancha-Pakshi Shastra. The charts relevant to your Nakshatra Pakshi for different days of the week and Paksha are given below. We will now explain how to use these charts.

Born in star Pooruttathi in Suklapaksha thidhi, your Nakshatra Pakshi is Peacock.

A summary of the activities undertaken by Peacock on different days are given in the first four charts.

The charts for Sukla-Paksha and Krishna-Paksha, for day time and night time are given separately. The related colours, directions, ruling days, death days, vowels and friendship between the birds are also given. The detailed charts following the summary, include the activities of the Apahara Birds for each day of the week for the two Pakshas.

To select a suitable time for an important activity, first of all, you have to find out the day of the week and the paksha of that day. You can get this information from almanacs, regional calendars or using computer software. Then you can select the appropriate chart for the day or night as you desire. The five birds rule certain days of the week and the days when your bird rules are considered good for you. Also, the days on which your bird is least powerful (death days) will be least useful for you. It is best not to undertake important tasks or take decisions on such days. The ruling days and death days also depend on the Paksha of the day you are considering for an activity. At a glance you can see the rating for the various time periods for the day in consideration and select a suitable time. Generally, the time periods when the main bird and the apahara bird are engaged in ruling or eating are auspicious and the periods when they sleep or die are the least preferred. If the two birds have a friendly relationship, then the period will give even better results.

As explained earlier, the days when your bird rules will give you good results and the days when your bird dies are the least preferred. Which are the birds that rule or die on a given day are indicated on top of the charts. Also the colours and direction indicated for your bird for a day will bring you luck. Always, ensure that you are looking at the right chart observing the Paksha carefully.

The Pancha-Pakshi Shastra is not to be confused with 'Pakshi Shastra' practiced by nomads in India where they use a parrot to pick a card from a deck to predict the future.

For SuklaPaksha

Death days of the Birth Pakshi : Wednesday,
 Day ruling days of the Birth Pakshi : Saturday,
 Night ruling days of the Birth Pakshi : Thursday,
 Colour : Black
 Direction : Central
 Namaksharam : Oh,OOh
 Friendly Birds : Vulture, Cock
 Enemy Birds : Owl, Crow

For KrishnaPaksha

Death days of the Birth Pakshi : Wednesday, Friday
 Day ruling days of the Birth Pakshi : Monday, Saturday
 Night ruling days of the Birth Pakshi : Friday,
 Colour : Green
 Direction : West
 Namaksharam : Eh,EEh
 Friendly Birds : Vulture, Cock
 Enemy Birds : Owl, Crow

Suklapaksha : Day time : Peacock
