

What is the community's role in HIV prevention?

Lisa Power

How can we prevent HIV from being transmitted or acquired?

- Condoms
- PrEP
- U=U
- Behaviour change
- Testing

and what do we need for this to happen?

Education, communication, resources

What about you?

- What work are you doing NOW to prevent acquisition?
- What work are you doing NOW to prevent transmission?
- What work would you LIKE to be doing (but aren't)?
- Why aren't you doing it? What's in the way?

Doing the health system's work or filling in the gaps?

- Targeting - forgotten key populations
- Challenging - prejudice/poor data about key populations
- Translating - telling the state what the community needs, telling the community how to get what they need from the state
- Providing - doing more or doing better?
- Making change - modernising

Doing more with less

- “Horizontal education” (shag one, nag one)
- Peer support networks
- Social media and apps
- Social events and influencing the influencers
- Sharing across borders
- Comparative shaming (of your health services)
- Tapping international support
