

FOUNTAIN DRYER CF

Cobalt Free Drier Additive For Fountain Solutions

When Fountain Dryer-CF is added into any premixed fountain solution, it will be picked up within the ink and promote faster drying.

**Contains through driers...*

- Stop drying issues before or when they happen
- Use for hard to dry jobs
- Creates faster drying of heavily printed jobs
- Starts drying when fount/water mixes with ink
- Mixes into any fountain solution

Direction For Use:

Add 1-2 ounce (0.8% - 1.5%) per mixed gallon of fountain solution.

As many print jobs are different with different substrates, inks and coverages, some dosage experimentation may be advisable. If necessary, dosage may be increased in one half ounce per mixed gallon of fountain solution increments.

Specifications:

VOC content lb. / gallon	0 lbs
VOC content grams / liter	0
