Inkjet date /code printer LINX-10

Simple, portable 2-line inkjet printer for coding bottles, jars, cans, cartons, etc. – any dry surface moving at constant speed past the printhead. May also print onto labels on a labelling machine.

The LINX-10 coder has excellent print quality using sealed, no-mess ink and solvent cartridges. It's low maintenance and has a simple, intuitive user interface for fast message creation and change over. The perfect coder for sell by, best before, lot, batch, sequential number, and product information coding onto porous and non-porous surfaces.

Message height range 1.8 to 5.6mm, character width range 1.7 to 4.3mm, recommended distance printhead to surface 12mm.

A range of support stands, clamps and bracketry is available, to fit onto production machinery, e.g. conveyers, labellers.
