EXPERTS IN LIQUIDS PROCESSING FILTRATION AND BOTTLING

Product ref. CA – 01

Date: 25/01/19

Manual Crown Capper

Crowns are placed in the magnetic capping head, a bottle is positioned underneath, and a pull on the lever applies the crown.

Easily adjustable for different bottle heights and diameters, comes with interchangeable 26 and 29mm heads.

Attachment available for application of 'Champagne' wire muzzles.

Heavy-duty, robust construction and surprisingly quick and easy to operate.

Speed 300 to 800 bottles per hour
