Rotating Spray Ball / CIP device

These rotating spray balls may be used for the cleaning of small and medium size tanks – up to 4 metres diameter. Connect to a pump or pressurised liquid supply and the ball rotates, dispersing the liquid in an almost 360 degree pattern.

Fabricated in 316L polished stainless steel. Ball head has a diameter of 35mm and total length of the device is 105mm.

Standard connection at bottom of spray ball is 3/4-inch BSPfemale thread, or we can provide adapters, extension tubes , fittings for tanks etc. on request.

Rotary Spray Ball
