

BioRN Lounge with Patrick Maier, head of the administration office of the [Research Campus M²OLIE](#).

“Research Campus M²OLIE – Treatment of oligometastatic patients in a closed loop process”

The research campus M²OLIE is a consortium of 24 academic and industrial partners located at the University Hospital Mannheim. They have the common aim to develop a new intelligent closed loop process in order to treat tumour patients with oligometastasis. M²OLIE is funded by the BMBF for up to 15 years.

May 28, 2019, 7pm

At the restaurant Urban Kitchen, Poststr. 36/5 in Heidelberg

Patrick Maier, head of the administration office of the Research Campus M²OLIE

Patrick Maier studied biology at the University in Konstanz and got his PhD at the University of Zürich. After three years as a postdoc at Aventis he joined the research group in the radiobiology lab at the University Hospital Mannheim where he also habilitated. Then he worked for a biotech company in Darmstadt. Since 2014 he has been the head of the administration office of the research campus M²OLIE.
