In Collaboration With

AI CONTRACT MANAGEMENT

VIRTUALLY CONSTRUCTED FROM FIRST PRINCIPLES

VISIBLE REAL TIME BUSINESS DATA

NATURAL LANGUAGE UNDERSTANDING

EV understands your unstructured data and extracts entities, relationships and more from your contracts.

WATSON ASSISTANT

Queries all your contracts | with easy, interactive and natural language questions via our AI powered legal chatbot.

WITH
WATSON

WATSON KNOWLEDGE STUDIO

Uses machine learning to teach E:V the nuances and unique patterns of your contracts.

WATSON DISCOVERY

Trains E:V to adapt to your specific collection of contracts. Responds to queries with the most relevant and accurate answers.

SYMPHONY FOR INFRASTRUCTURE

DYNAMIC BUSINESS MODELLING & SIMULATION

Symphony Value Modeller provides Executive Boards, Program Managers and Senior Analysts with unparalleled business scenario modelling and simulation

DYNAMIC BUSINESS MODELLING AND SIMULATION

Flex enterprise operations up to net revenue using dynamic scenarios, constraint modelling and simulation.

INTEGRATE CONSTRUCTION DELIVERY AND FINANCE

Integrated view of SAP and operations data. See impact of operations planning on net revenue.

BUDGETING, PLANNING AND RAPID RE-FORECASTING

Streamlined budgeting, planning and re-forecasting processes and variance/sensitivity analysis.

EXECUTIVE IPADS. REAL-TIME DATA.

View operations in real-time from SAP HANA on Executive iPads.

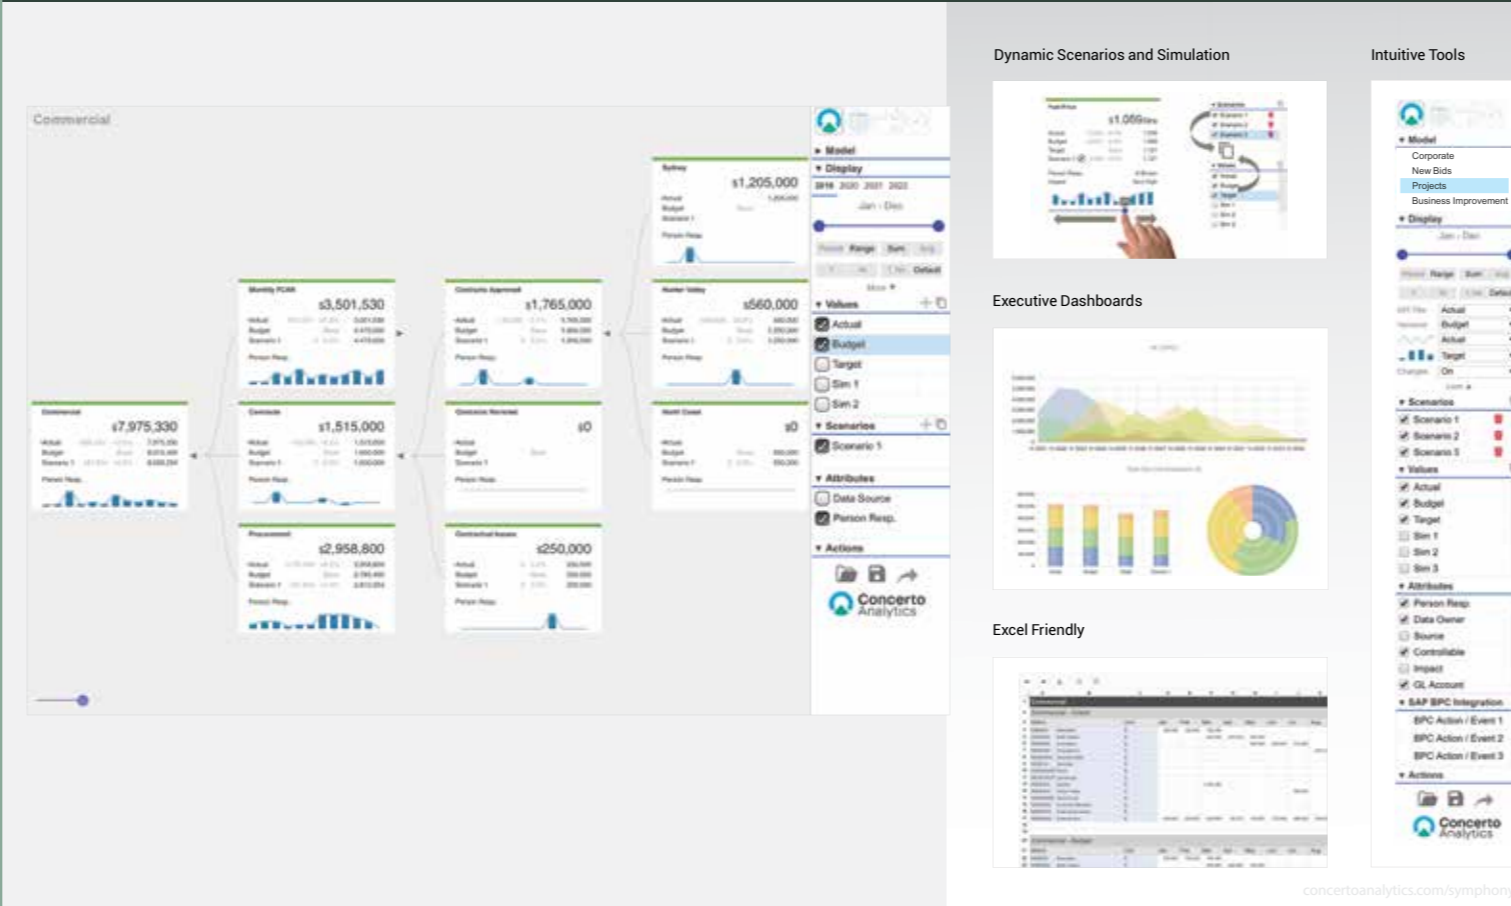

TOP DOWN TARGETS

Track operational planning scenarios and how they rollup to achieve high-level targets.

EMBED CONTINUOUS IMPROVEMENT

Drive productivity and cost reduction across the value chain with transparency and accountability.

INTEGRATING OPERATIONS AND FINANCE

SIMULATED PLANNING

Stact specialises in Spatial Gamification services, BIM:4D+ models, used in scenario modelling, logistics analysis, simulation and learning.

We have provided both vertical and horizontal BIM services to a significant number of high profile projects across Australia with Clients ranging from Transport for New South Wales (TfNSW) to large Tier 1 construction firms to Tier 3 construction firms.

We also have significant experience in the establishment of BIM on major projects and can offer practical expertise early on in the project.

Stact was engaged by Downer on the HCMT – Pakenham project to establish a 4D-BIM model that encompasses the BIM stages of Build & Commission and Handover & Close-out, with the outcome to de-risk the delivery of the facility by integrating these traditionally siloed work processes.

- CHRISTCHURCH HOSPITAL (4D-BIM)
- BHP – MINE PLANNING (4D-BIM)
- GC12 (4D-BIM)
- EUROMBAH GAS PLANT (4D-BIM)
- REGIONAL RAIL LINK – VIC (4D-BIM)
