ABOUT US

We are the manufacturer, not a middleman

Profimod® is a brand of Kozhan Kalıp San. ve Tic. Ltd. Şti. With more than 35 years of experience in machinery and mould making, we produce the connectors, their moulds and our ready-made structures in our own plant in Bursa.

The Profimod system is simple: 30×30×1.2 mm galvanised box profiles are bolted into plastic connectors. No welder, no grinder, no craftsman needed; with one spanner you build a shelf, table, greenhouse, chicken coop or a frame of your own design.

Why Profimod for your store?

01

Fits standard box profile

The connectors fit 30×30×1.2 mm box profiles exactly and complement the profile you already sell.

02

No welding, one spanner

Your customers build their own structure without a welder or a craftsman.

03

Small, light, easy to stock

Connectors take little space and are easy to display at the counter or on the shelf.

04

Durable materials

Connectors in 30% glass-fibre reinforced polyamide, rust-resistant galvanised profile.

05

Take apart, extend

Bolted joints let the structure be dismantled, moved and extended with extra parts.

06

Made in our own factory

Every step from mould to package is ours, so we control quality and stock directly.

01

Profile connectors

Profimod's main product group. With 16 connector models every corner, edge, middle joint and extension can be made. Your customer buys the box profile and the connectors from you and builds a table, shelf or greenhouse in their own size.

No more welding

The profile end slides onto the connector and is bolted. The connector forms the joint instead of a weld.

Gap-free fit

The connector arms fit tightly inside the profile; the structure stays straight, rigid and does not wobble.

Keeps the galvanising intact

No heat and no cutting at the joint, so the zinc coating stays intact and the joint does not rust.

The right part for every joint

180° extension, 90° elbow, three-, four- and five-way models cover every node.

One-spanner assembly

The square-neck bolt does not turn in the hole; the nut is tightened with a single spanner.

Demountable

The structure can be taken apart, moved and rebuilt with new parts added.

TECHNICAL DATA

Profile	30×30×1.2 mm box profile
Material	30% glass-fibre reinforced PA (polyamide)
Colour	White, matt
Outer size	30 mm (flush with the profile)
Fastening	M6×35 round-head square-neck bolt, M6 flange nut
Profile hole	6.5×6.5 mm square hole at the ends

01 · CONNECTOR SERIES

16 models, one for every joint

No:1 180° extension

No:2 90° elbow

No:3 Three-way

No:4 Four-way

No:5 Three-way

No:6 Four-way

No:8-1 Four-way

No:8-2 Four-way

No:9-1 Four-way

No:9-2 Four-way

No:10-1 Four-way

No:10-2 Four-way

No:11-1 Four-way

No:11-2 Three-way

No:12-1 Five-way

No:12-2 Four-way

Models with the same number of arms differ by the direction and angle of the arms. Choose the right part by its model number.

What do your customers build?

Work table · Garage & pantry shelf · Workbench · Greenhouse · Chicken coop · Carport · Log store · Animal enclosure · Display stand · Own design

In your store

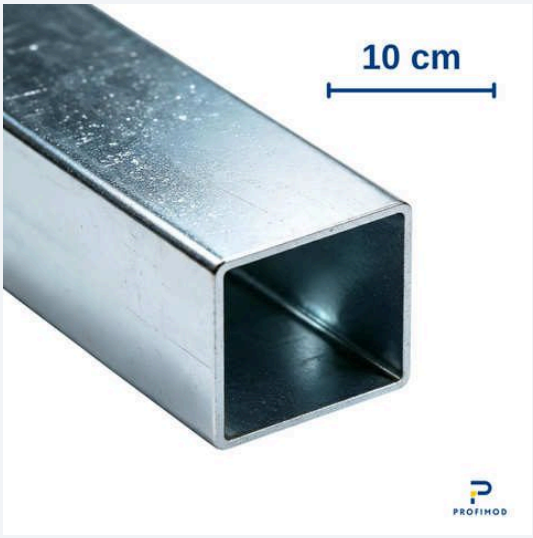

You sell the connectors together with the box profile and the bolts. The customer buys all materials from you at once; one structure means dozens of parts.

02 · GALVANISED PROFILE

02

Profile cut to the size you need

Alongside the connectors we cut 30×30×1.2 mm galvanised box profile to the length you need and ship it ready to bolt to the connectors.

Cut to size

Profiles are cut to length in our factory; no saw or grinder needed.

With or without holes

Pre-drilled profile has 6.5×6.5 mm square holes on all four faces at both ends, so the bolt passes from whichever side is needed.

Galvanised

The zinc coating protects the profile from moisture and water; for garden, greenhouse, balcony and garage.

How does it connect?

1

Slide the profile on

Push the profile end onto the connector arm until its hole lines up with the hole in the arm.

2

Insert the bolt

Pass the M6×35 square-neck bolt through the hole; the square neck does not turn.

3

Tighten the nut

Tighten the flange nut with one spanner. Done; to dismantle, simply undo the nut.

PROFILE DATA

Section	**30×30 mm square box**
Wall thickness	**1.2 mm**
Coating	**Galvanised**
Standard lengths	**10–150 cm in 10 cm steps**
Custom cut	**Any length on request**
Long runs	**End to end with the 180° extension connector**

03

Ready-made structure frames

Ready models designed with the same profile and connectors. Each kit ships in one package with profiles cut to size, connectors, bolt set, assembly spanner and a printed assembly guide.

Greenhouses

Olimpos, Aspendos, Likya and Pergamon series: from hobby garden to production greenhouse.

Chicken coops

From mobile coops on wheels to large production coops.

Log stores

Flat-roof log store frames, with or without doors.

Carports

Single and double; finished with tarpaulin or shade net.

Container frames

Garden office, storage or hobby house; panels, glazing and door supplied by the buyer.

Shelving

Balcony, greenhouse, garage and pantry shelves; boards chosen to size.

Table and workbench frames

Garden work table, workshop bench and packing table.

Drying racks

Multi-tier racks for drying vegetables, fruit and herbs.

Animal enclosures and kennels

Cat balcony enclosure, dog kennel, walk-in aviary.

Air-conditioner and compressor cages

Protect outdoor units and compressors against impact and unauthorised access.

Waste container enclosures

Keep the bin area tidy and enclosed.

PROFIMOD®

Custom size

If a ready model does not fit, we design and cut the structure to the size required.

Greenhouse series

Series	Use	Example size
Olimpos	Gable-roof hobby greenhouse	2.98 × 4.13 m
Aspendos	Villa and home garden greenhouse	2.06 × 3.71 m
Likya	Door-free field tunnel	2.94 × 8.13 m
Pergamon	Mansard-roof production greenhouse	4.23 × 9.26 m

Frames only; covers, wire, mesh, boards and panels are not included. Every series is available in several sizes.

WHOLESALE

Let's work together

Connectors

Sell the connectors in your store with box profile and bolts; your customers build their own structures.

Profile cut to size

Galvanised profile cut and drilled to the lengths you need.

Ready-made structures

Greenhouses, coops, shelves and other frames, boxed with their assembly guide.

Quotation

We prepare a quotation for you based on products and quantities.

Prices are not included in this catalogue. For a quotation, simply reply to our e-mail or write to us.
