## IONIC SILVER SPRAY & SPRAY REFILL

**PRACTITIONER STRENGTH 50 PPM**

Silver ions are increasingly being recognized for their broad-spectrum antimicrobial qualities and bandages impregnated with silver ions are especially in demand because they prevent bacterial growth and therefore speed healing time, making them extremely valuable for treating burn and wound victims.

The fact that silver ions are effective against a very broad range of bacteria is well established and due to recent advances in the delivery of silver ions, they are being used in a rapidly growing range of wound care, medical and industrial products.
