Big data sources and types varied within the field of RMDs, and methods used to analyze big data were heterogeneous. These findings informed an EULAR taskforce developing recommendations for big data in RMDs. 

**RESULTS**

- **Big data definitions:**
  - Only a few authors clearly defined what they meant by "big data," and the provided definitions were quite different.
  - Disparities in the number of found articles in the literature.

- **Big data sources:**
  - Medical data in RMDs, whereas the distribution was more spread out outside of RMDs.
  - "Use of implementation of other data sources in RMDs?"

- **Big data analyses:**
  - Both traditional and AI-related methods were used in the literature.
  - Lack of knowledge of AI methods.
  - Traditional methods allowed to answer the clinical questions?

**DISCUSSION**

- **Big data definitions:**
  - Only a few authors clearly defined what they meant by "big data," and the provided definitions were quite different.
  - Disparities in the number of found articles in the literature.

- **Big data sources:**
  - Medical data in RMDs, whereas the distribution was more spread out outside of RMDs.
  - "Use of implementation of other data sources in RMDs?"

- **Big data analyses:**
  - Both traditional and AI-related methods were used in the literature.
  - Lack of knowledge of AI methods.
  - Traditional methods allowed to answer the clinical questions?

**REFERENCES**

- **Ethics and Informed Consent:**
  - All ethical guidelines were followed.
  - Informed consent was obtained from all participants.

- **Conflict of Interest:**
  - No potential conflicts of interest were reported.
  - Financial disclosure for all authors.

**CONCLUSION**

- **Big data definitions:**
  - Only a few authors clearly defined what they meant by "big data," and the provided definitions were quite different.
  - Disparities in the number of found articles in the literature.

- **Big data sources:**
  - Medical data in RMDs, whereas the distribution was more spread out outside of RMDs.
  - "Use of implementation of other data sources in RMDs?"

- **Big data analyses:**
  - Both traditional and AI-related methods were used in the literature.
  - Lack of knowledge of AI methods.
  - Traditional methods allowed to answer the clinical questions?
