

# BATTERY STAPLER

It enables plastic parts repair simply by sinking hot staples to fix and keep the two damaged parts aligned.

VIDEO

NEW  
ERGONOMIC  
HANDPIECE

● **COMPATIBLE** with batteries Milwaukee® and DeWalt®.

Operation is extremely **SIMPLE** as the tool only has an on/off button and needs no other regulation or adjustment.

**CUSTOMER FRIENDLY** and **INTUITIVE**: operated by portable batteries, it is therefore easy to move around since such batteries are normally already available in any workshop.  
Charge indicator flashes shortly before battery is empty allowing to end repair session.

## TIPS

**Pre-Cut Staples**, patented by MWM, are designed to avoid cutting after insertion: they break at the pre-etched point and remain below the plastic level, preventing the cut stems from coming out and the subsequent grinding stage.
