

Simple

Gentle demounting with the bead pusher.

Optional smart bead spacer

For mounting UHP and run-flat tyres. The Smart Bead Spacer comes standard with the plus kit.

smartSpeed

SmartSpeed technology is the best choice for high-productivity workshops.
It provides maximum speed in mounting and demounting operations depending on the torque applied.

SMARTSPEED / EASYMONT® PRO

Pneumatic bead assist device easymont® pro

SMARTSPEED

- The smartSpeed inverter technology comes standard with monty® 3300-22 smartSpeed, monty® 3300-24 smartSpeed and monty® 3300 racing smartSpeed. smartSpeed will never exceed maximum torque thus preventing damage to the tyre bead. In the first pedal position a fixed speed of as low as 7 rpm is provided which is useful for critical tasks and when full control is required. In the second pedal position the operator does not need to change speed, smartSpeed always uses the maximum possible speed up to 18 rpm which reduces cycle time and increases productivity.
- Both monty® 1270 smart and 3300-20 smart are single-speed machines with re-designed motor and gearbox to ensure the ruggedness required for modern tyre service.

EASYMONT® PRO

- The powerful pneumatic bead assist device is an indispensable accessory for mounting and demounting tyres which are difficult to handle, such as low profile tyres and run flat tyre systems or tyres with hard sidewalls. It is an optimum complement to a tyre changer.
- During the demounting operation the bead pusher presses the upper bead into the drop centre of the rim so that it can be easily levered over the mounting head nose and finally demounted without any effort.
- During the mounting operation of the upper bead the disc retains the bead under the mounting head nose. The bead pusher follows rotation of the wheel, doing the otherwise tedious job of the operator, while preserving both tyre and rim.
- The pneumatic bead assist device is an optional extra for tyre changers from monty® 1270 smart (easymont® pro swing) up to monty® 3300 racing smartSpeed (easymont® pro) and can be easily fitted by the customer.
It is a standard feature of all plus tyre changers.
