

BUSINESS REPUTATION & THE CYBER RISK

IS YOUR BUSINESS CYBER SECURE?

In 2016, **more than 79% of businesses suffered from at least one cyber security threat.** With the increasing severity of these attacks, numerous government regulations have been created to protect an organization's and an individual's data. Fines for not adhering to these regulations have

increased substantially and **80% of consumers have reported their hesitancy to do business with companies that have been hacked.** To maintain consumer confidence and avoid costly fines, let our elite Cyber Security team manage and maintain your IT environment.

CYBER SECURITY SOLUTIONS

Cyber Security solutions enables small, medium and large organizations to make use of seasoned Virtual Chief Information Security Officers (vCISOs) to assess Cyber Security risks to their businesses using best-of-breed technology. We've partnered with Pro-Active IT and utilize their Cyber Security team to provide peace of mind to businesses. Their specialized skills, tools and methodologies identify possible external threats and internal processes which may lead to security gaps within an organization. We take the lead in identifying, implementing and testing remediation policies while providing the confidence of a safe IT environment.

FOR SMALL AND MID-SIZED BUSINESSES

Our Cyber Security service policy identifies that safety is critical to the success of every business, but no one solution fits all businesses. Recent surveys reveal that 15% of small and medium sized businesses do not consider themselves a target for cyber breaches due to their size, but **more than 78%** of organizations have suffered from at least one data breach over the last two years. Our small and medium-sized business Cyber Security offering allows businesses to make use of a team that will look at the specific needs on a case by case basis and eliminate the threat posed by Cyber-attacks. Our Cyber Security service allows decision makers and technical teams to rest easy knowing that their business Cyber Security is kept up-to-date 24x7x365.

FOR LARGE ORGANIZATIONS

Our partnership with the Pro-Active IT team of Cyber Security experts gives you access to individuals with years of practical experience in many industries and an understanding that even though large organizations may recognize the need for Cyber Security, they lack the budget, experience and knowledge to effectively manage business critical security initiatives. We are able to engage your IT team and provide practical, concise roadmaps to remediation and certification.

WHAT TO EXPECT

- A dedicated vCISO team with years of industry leading experience
- Internal network assessments complete with reports detailing software and equipment licensing inventory
- External penetration testing complete with comprehensive reports on open ports and applications using them
