

NOTICE TO CONTRIBUTORS

GENERAL

Papers published or currently offered for publication elsewhere are not acceptable. Nevertheless, publication elsewhere of an abstract or extended summary does not preclude publication in full in this journal.

Authors should consult the Guide to Referees before submitting their manuscript. A completed Copyright Form should be submitted along with the manuscript. (<http://www.hydrologynz.org.nz/journal.php>).

SUBMISSION OF MATERIAL

Format: Please supply either a hard or an electronic copy. If the manuscript is supplied electronically it should be one electronic file (MS-Word preferred) containing all the figures, tables and text. The manuscript should be sent to: The Editor, Journal of Hydrology (NZ), P. O. Box 12-300, Thorndon, Wellington 6144, New Zealand. Email: editor@hydrologynz.org.nz

Text: Should be double-spaced in 12pt type, with a left-hand margin of at least 3cm. Pages and lines should be numbered. If acceptable for publication, an electronic copy (MS-Word) will be required. The Journal will ensure the correct formatting and layout.

Please provide a brief abstract at the beginning of the paper, indicating the scope of the paper and principal results. It should be suitable for reproduction by abstracting journals, as it stands.

Key words: A list of keywords should follow the abstract.

Authors: Full names, organisational affiliations and the corresponding author are to be provided.

Units: SI units should be used. (see BS 5555: 1976 or ISO 1000-1973).

Equations: Should be part of the text. All symbols should be defined when they first appear. For symbols and abbreviations etc. the usage followed is that of the British Standard 1991 (New Zealand Standard 2276).

Tables: Should be of a size and shape compatible with the journal's page size, (170 by 240mm, with text normally within an area of 67.5 by 200mm single column; 140 by 200mm double column or 106 by 200mm, boxed style). Authors should print tables in final point size (not less than 9pt) and to fit on a journal page, to satisfy themselves that they will be legible. If possible tables should fit upright on the page, not sideways. All tables should be numbered and titled, and referred to in the text. Please refer to articles in this issue for formatting of table titles, headings, etc. Tables should be prepared each on a separate page and assembled together at the end of the text. Their preferred location in the text may be indicated by inserting a single line paragraph 'Table X here'.

Figures: All figures should be numbered and referred to in the text. Figure captions should not be on the figures themselves, but should be assembled together at the end of the text. If the figures are supplied as hard copy the author's name and figure number should be written on the reverse of each figure. The preferred location of figures in the text may be indicated by inserting a single line paragraph 'Figure X here'.

Figures can be either supplied as hard copy ready for inclusion in the text with sharp, black lines and shaded/stippled areas or electronically. Grey tones often do not reproduce well and should be avoided. If figures are prepared at larger than final size, authors should photo-reduce them to fit on a journal page, to satisfy themselves that they will be legible. Maps and vertical aerial photographs should have a bar scale and North arrow shown. Colour images are possible; however, the additional cost of colour will be charged to the author. Please consult the Editor early and do not assume colour is possible.

If acceptable for publication the Journal requires separate electronic files of the figures (600 dpi for line diagrams or 300 dpi for images, GIFs, TIFFs, EPSs) or camera-ready hard copies.

References: In the text, citations are to be by author's names and year, e.g. (Brown, 1991) or '... as stated by Brown (1991)'. The list of references at the end of the paper should be arranged in alphabetical order by the authors' names. Titles of periodicals are to be given in full, and the name and location of the publishers of books should be given. Titles of periodicals or books and the volume numbers should be in italics, but not the page numbers. Please refer to articles in this issue for arrangement and punctuation of references.

REFEREES

Authors are requested to nominate two or three potential referees (please supply contact details), these being competent reviewers, not involved with the work or internal review of the paper.

IF ACCEPTED

If, following review, the manuscript is accepted the Editor will require an electronic copy (MS-Word) of the paper (with the text and tables as separate files) and separate electronic files of the figures (600 dpi for line diagrams or 300 dpi for images, GIFs, TIFFs, EPSs). The electronic files of the figures should be named with authors name and figure number e.g. Brown_fig1. The manuscript will then be formatted, laid out and forwarded to the corresponding author for checking and approval.
