# PARTNER PROGRAM

## GLANCE AT THE MARKET

Almost 100% of IT executives report they intend to deploy SD-WAN, most will select their vendor within the next 5 years.

Managed SD-WAN service is what the vast majority of businesses are looking for.

Learn How Our Partner Program  
Can Help You Gain Market Share

# OVERVIEW

For 20 years, businesses have relied on edge routers that were manually configured by skilled IT workers combined with costly dedicated access circuits (MPLS) to provide site-to-site connectivity. The high cost for bandwidth and maintenance is unsustainable in today's world of business digital transformation.

Today's businesses require a more agile network designed to connect users with cloud-based services, a network that delivers better speeds, better agility and lower operating cost while remaining secure. A new breed of agile, cloud-ready networks has emerged known as Software-Defined Wide-Area-Network (SD-WAN).

## Why Partner with Adaptiv Networks

The value of SD-WAN is compelling, recent surveys by Forrester indicate that almost 100% of IT executives report they intend to deploy SD-WAN. Furthermore, the vast majority of business customers are looking for a service provider who can manage their network to deliver the benefits of SD-WAN-as-a-Service.

As market demand grows for SD-WAN, Service Providers, MSPs and VARS are selecting Adaptiv Networks as their preferred partner to meet their customers SD-WAN requirements.

While dozens of vendors are catering to large enterprise, Adaptiv Networks offers cloud reliability and performance delivered as a managed service tailored toward mid-market and smaller business customers.

The Adaptiv Partner Program forms the foundation for the relationship between your team and ours. Our program is designed to put our partners in a position to succeed through training and support plus digital marketing and sales enablement.

In this guide we have highlighted key partner program benefits and information on how to join our Partner ecosystem.

# AGILE CLOUD CONNECTIVITY

## Frictionless SD-WAN Service Delivery

Our vision is to remove the barriers of business digital transformation with amazingly simple and effective cloud connectivity.

Our go-to-market program is purpose-built for service providers. We'll get you into the market quickly, with agile, scalable connectivity that adds reliability and efficiency to all your cloud apps and IT services.

## Minimal Risk, Maximum Potential

Our licensed-based recurring revenue model ensures partner profitability from day one. We provide the network infrastructure, our CPE device and cloud-based orchestration portal are all included as part of the service so our partners get into the market without any upfront investment.

We combine market-leading broadband QoS and failover with cloud-based orchestration to ensure frictionless service delivery enabling our partners to remain profitable while serving a large number of customers.

Our solutions work with any local broadband access circuits, and any cloud-based services giving you the flexibility to tailor solutions that fit your customers' needs.

We offer scalable solutions with low entry-level price points designed that fit small to mid-sized business customers, plus a digital marketing enablement platform to help you build sales pipeline.

As your customer base grows, we offer service providers additional infrastructure investment options to further increase your profit potential and service differentiation.

TRAINING	Sales Enablement Certification Pre-sales Engineer Technical Training	Provisioning and Install Certification Monitoring and Management Certification
SUPPORT	Full Support Through Onboarding	Support Collaboration Ongoing

# NETWORK-AS-A-SERVICE

Adaptiv | SD-INTERNET is geared for digital SMBs who rely on business critical cloud apps, it enables our partners to offer differentiated connectivity solutions for voice and data services at a fraction of the cost of Dedicated Internet Access circuits.

Adaptiv | SD-WAN is built for customers who require secure and reliable connectivity between sites in addition to their business critical cloud apps. Our SD-WAN is ideal for customers who want to replace MPLS without sacrificing quality or reliability.

Our products are sold as annual site licenses that include the CPE device, cloud transport and cloud-based orchestration. Pricing is based on the site bandwidth speed requirement, with licenses ranging from 15Mbps all the way up to 1Gbps.

# SMARTER NETWORKS

## RETAIL STORES

Non-stop connectivity built for digital retail transformation

## CLOUD VOICE

Add quality to cloud voice and video with no dropped calls

## MANUFACTURING

Efficient smart factory networks powered by SD-WAN

## CLOUD OFFICE

Easily add reliability and performance to cloud apps

## BRANCH NETWORK

Boost productivity and reduce complexity for your sites

## DIGITAL SMB

Enhance the cloud experience for any-size business
