

Adaptiv | SD-INTERNET

Reliable Cloud Performance for the Digital SMB

SD-INTERNET is the cloud connectivity solution that delivers superior reliability and performance for customers who depend on cloud services to run their business.

Built for the digital small-to-mid sized business, SD-INTERNET is a managed network service designed to reduce IT cost and complexity while improving cloud performance and reliability.

Adaptiv | SD-INTERNET Features

NETWORK AS-A-SERVICE

One simple site license includes everything you need for your managed SD-INTERNET experience.

CLOUD-BASED MANAGEMENT

A certified service provider manages your network through our centralized cloud portal.

AUTOMATIC SITE FAILOVER

Seamless failover instantly reacts to keep your entire branch network connected.

BI-DIRECTIONAL QOS

We prioritize and protect priority network traffic to ensure voice quality over broadband.

MULTI-LINK AGGREGATION

Combine up to 8 links to create a faster and more reliable connection to any site in your network.

Benefits of SD-INTERNET

REDUCE OPEX

Economies of scale for your bandwidth and IT budget.

INCREASE RELIABILITY

Always-on connectivity for business critical cloud services.

NETWORK AGILITY

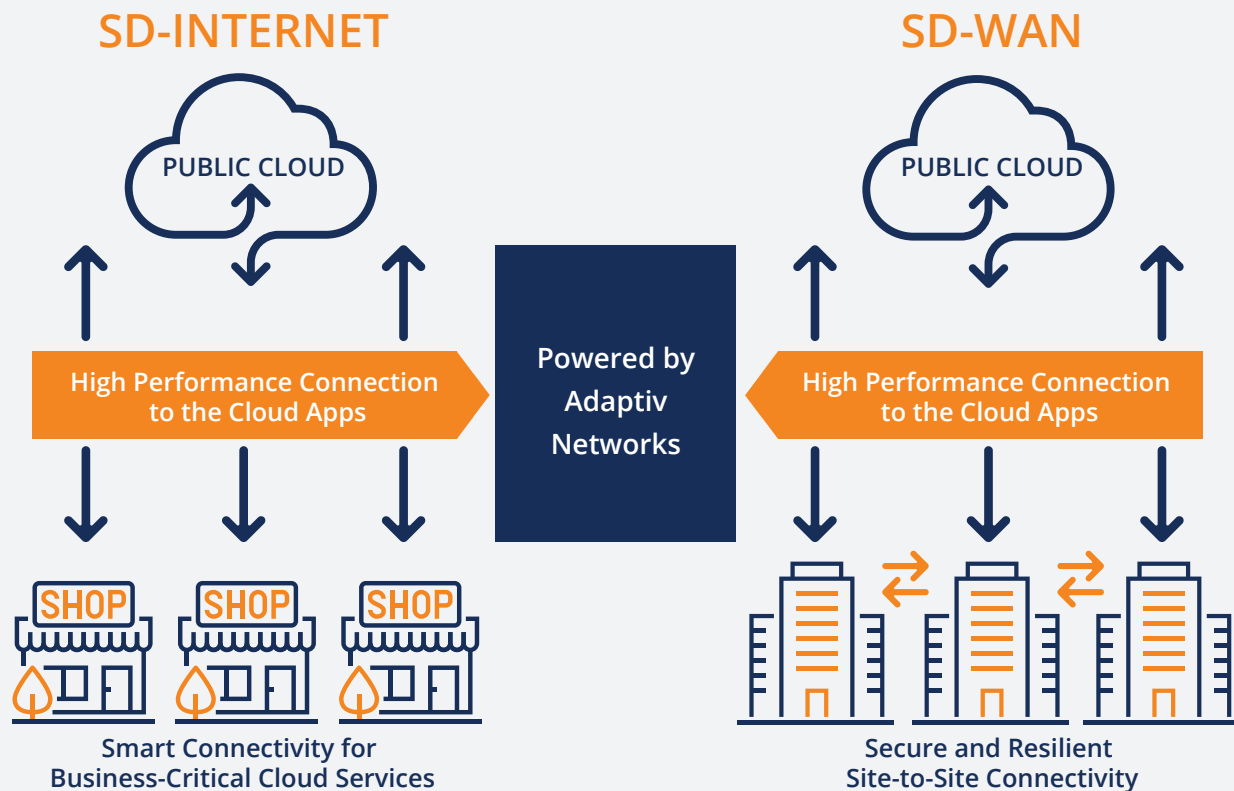

Quickly and easily add new sites or increase bandwidth.

CLOUD PRODUCTIVITY

Faster and more responsive connections to business cloud apps.
