

How to pay with PayPal on Eventbrite with a credit card, without creating a PayPal account

Unfortunately, PayPal in Switzerland only accepts payments from users which have a PayPal account. Here's a workaround how you can pay with **credit card**.

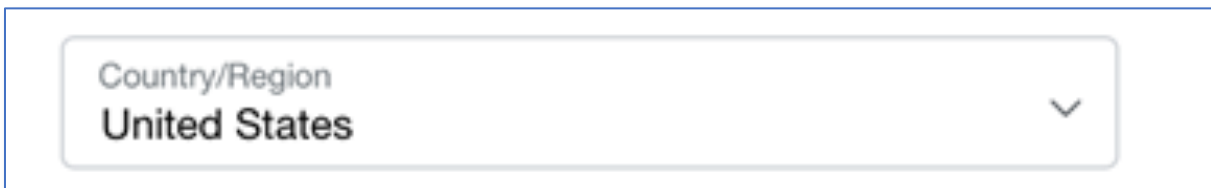

1. Fill in the registration form, then click on the "Purchase Tickets" icons

2. Click on "Create an Account"

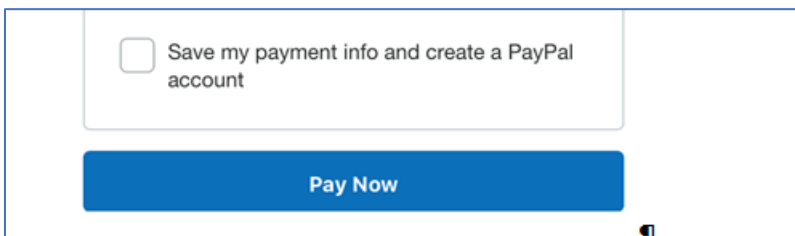

3. Do not select Switzerland as Country, but stay with United States

4. Fill in the minimum of information needed

Credit card information and email address must be yours, ZIP Code must be a valid US code (e.g. Newtown Square, PA 19073-3299) the rest can be fantasy.

5. Leave "Save my payment info and create a PayPal account" unticked and click on "Pay Now"

Your payment will be processed as expected, and you will receive confirmation mails from PayPal and Eventbrite.
