CREATIVE WORK

Longo is a modular system consisting of sofas, operative and manager desks, with storage solutions (cabinets, libraries), accessories and acoustic screens which incorporate decorative accessories and items that inspire a cheerful environment.

The configuration of Longo stems from a solid extruded aluminium structure on which we attach the cast iron legs and endless possibilities to achieve the desired environment, always maintaining a compact visual concept.

Longo enables more friendly, opened and relaxed environments, where formal structures and dynamic spaces thrive to create a harmonious environment.

BEST of NEOCON

GOLD AWARD

Lounge Furniture Collections

Longo obtained the Gold award “The Best of Neocon” in the category of “Lounge Furniture Collections”. The jury, formed by architects, designers, companies and members of the North American government, awarded Longo for the excellence of its design and productive solutions it offers.

Receiving this new award is without doubt one of the great joys of 2016. The recognition is coming in from the American continent which considers Longo the best soft seating product on a market which moves hundreds of millions of dollars and at the largest trade show in the industry. Undoubtedly, a recognition that comes, in part, for the work of internationalisation, communication and dissemination which is carried out from Actiu.
