Experiences of Studying Abroad

Today, Pusan National University (PNU) is one of the oldest, but at the same time, the most powerful educational institutions of the Republic of Korea. Being famous not only for its innovative approaches to teaching, but also for a spacious campus, our university can rightfully be called an excellent place for obtaining a Bachelor's degree.

Even if you do not know Korean, it does not matter. PNU Korean Language Center provides you the best quality Korean language courses. You will get TOPIK Level 4 within 1 year, when you follow teacher's direction well.

I am Sembay Darina, the sophomore at Department of Global Studies which is English Track. DGS provides courses to learn Korean from zero. On the first class already, you will learn to read and speak, so you will not be lost in the city for sure. And after a year, you will be proficient in the language at the Pre-Intermediate level, able to write essays, and talk with local people.

My faculty, whose name may be understandable to many at the beginning, is one of the newest faculties in PNU. Global Studies is an interdisciplinary specialty focused on such areas as globalization, international relations, business, international organizations, innovation management, etc. Even if it may seem that this faculty includes so many different spheres, but justifies itself by how versatile students become after graduating Global Studies. Moreover, the largest number of foreign students are enrolled in our faculty, so if you want to have friends from all over the world, you definitely need Global Studies.

Now I am studying at prestigious university in the Netherland as exchange students from PNU. PNU International offers various program to international students. Despite being undergraduate students, some are carrying out research projects at PNU's major laboratories. I believe that they will be researchers contributing to society in the world. Moreover, some students are working at department offices as teacher assistants. And some students have participated in the internship at Busan Foundation for International Cooperation, Busan English Broadcasting and so on.

We have been actively working with PNU International, which is the office of international affairs at Pusan National University. For instance, some served as a global marketer as part of PNU International's promotional efforts. And others did voluntary work for the Busan International Film Festival and for the KT mentoring program that volunteers teach children in outland.

I believe that You will be the happiest students in the world, if you choose PNU.
