

Dear Family, Friends and Valued Customers,

We have been receiving some inquiries about our cannabis oil due to the alarming news reports of illnesses surrounding the use of unregulated vape products across the country. Because of this, we thought it would be a good time to release a statement reinforcing the values we have always had here at Smokey Point.

We at Smokey Point have always been committed to providing the highest quality products for our customers. We use all of the products we make, we share them with our loved ones and we depend on repeat business from our retail partners and customers to keep our lights on. Without the support from our customers we would not get to keep doing what we love to do — provide top quality cannabis and cannabis extracts for responsible adults to enjoy throughout our great state.

We want to reassure everyone that our vape oils consist of pure cannabis extracts and whole plant extracted terpenes. We never use any thickeners, vitamin E acetate/tocopherol, polyethylene glycol, propylene glycol, or vegetable glycerin or any other unnatural ingredients.

In addition, we voluntarily submit 100% of our batches to independent third party laboratory testing to ensure all of our products pass rigorous state guidelines. We believe in full transparency and we are happy to share lab results for any of the products we sell.

Our hearts go out to the people that have fallen ill due to poor quality vape products that have unfortunately made their way into communities across the country. We would like to encourage everyone to only purchase from state licensed, legal dispensaries to avoid the chances of consuming sub-par products.

If you have any additional questions or if we can help provide more details on the subject please feel free to visit [Smokeypointproductions.com](http://Smokeypointproductions.com) and leave us a message.

Thank you for your continued support!

The Smokey Point Productions Team
