

A Message to our Bloomists.

Bloom has been an innovator of vapes in the cannabis industry since 2014. We have improved our process multiple times over the years, always holding our products to the highest of standards.

We do not add any cutting agents or fillers (like PG, PEG, or Vitamin E acetate) to our oil. The only ingredients in our vapes are pure cannabis oil and a blend of natural terpenes.

Furthermore, **Bloom** is a fully compliant brand in all four states—meaning our products pass all required testing and are only sold in state-licensed dispensaries and deliveries.

We advise all of our consumers only to purchase products from licensed stores and to stick with reliable brands that do not add any cutting agents to their products.

We appreciate your continued support and look forward to providing clean, consistent cannabis oil for years to come.
