Product Description:

The 660L industrial 4-wheeled wheelie bin is a robust waste management solution designed for demanding industrial, commercial, and municipal environments in South Africa. Made from 100% virgin UV-stabilised HDPE, it offers exceptional durability and easy mobility for safe waste collection and disposal.

Key Features:

- Heavy-duty construction for industrial and commercial use
 - 100% Virgin HDPE – UV-stabilised to withstand harsh South African weather
 - Four 200mm rubber wheels for smooth mobility on uneven terrain
 - Large 660L capacity for high-volume waste handling
 - Hinged, secure-fitting lid to contain odours and prevent spills
 - Available in colour-coded options: grey, red, yellow, orange, blue, black, green
-

Technical Specifications:

- Capacity: 660 litres
 - Material: 100% Virgin HDPE – UV Stabilised
 - Overall Height: 1220 mm
 - Overall Length: 1380 mm
 - Overall Width: 820 mm
 - Weight: 35 kg
 - Wheels: 4 x 200mm solid rubber wheels
 - Lid: Hinged and tight-fitting for secure containment
-

Colour Options:

- Grey
- Red
- Yellow
- Orange
- Blue

- Black
 - Green
-

Applications:

- Construction, mining, and industrial waste management
 - Warehouses, workshops, and logistics hubs
 - Municipal waste collection and recycling
 - Large-scale events and facilities waste control
 - Compliance with colour-coded waste separation for improved site safety
-

Compliance:

- Manufactured in line with South African standards for waste management containers
 - UV-stabilised HDPE meets local environmental and safety requirements
 - Robust design for industrial and municipal waste management in South Africa
-

Usage Instructions:

1. Place waste materials securely inside the bin.
 2. Close the secure, hinged lid to contain waste and odours.
 3. Use the 4 rubber wheels to safely transport the bin to the collection or disposal point.
 4. Empty regularly to maintain hygiene and compliance.
 5. Keep the bin clean and in good condition for safe ongoing use.
-

Safety Precautions:

- Do not overload the bin beyond its 660L capacity.
 - Regularly inspect the wheels and lid for damage.
 - Use colour-coded bins for correct waste separation to comply with site safety and environmental standards.
-
