Rug Care

Vacuum regularly to keep dust and crumbs from settling into the fiber roots.

Avoid vacuuming or washing a shaggy rug, as it may cause damage. Instead, flip and shake it to remove dust.

Clean spills immediately. For liquids, use an undyed cloth to blot and firmly press around the spill to absorb as much as possible.

Do not pull loose threads. Snip them with scissors instead of pulling them out.

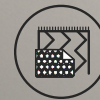

Avoid prolonged sunlight exposure to prevent fading and fiber damage.

Use rug protectors under the legs of heavy furniture to avoid flattening piles.

Rotate Regularly. Turn the rug occasionally to ensure even wear.

Use rug pad. Some rugs require a rug pad to enhance durability and prevent slipping.

For hard to remove stains, professional rug cleaning is recommended.

Professional cleaning is highly recommended time to time to maintain the beauty and longevity of the rug.

Food & Drink Stains

Use mild laundry detergent with water to clean the spot

Ink Stains

Spray hairspray, let it dry, then scrub gently with water and vinegar

Wax Spots

Cover with blotting paper and iron gently, moving constantly

Please note: Do not apply bleach directly on any stains or spots as it can result in the color loss of the area where used. All stains should not be treated with water. To remove stubborn stains and spots, we recommend getting services from an expert or professional cleaner.
