**Best Practices: Tips to consider for online teaching (Lesson 1.4)**

| New Teaching Tips for me to be considered | | |
| --- | --- | --- |
| **Teaching tips for an online class** | **Teaching Tips that work for both online and F2F** | **Rationale and incorporation** |
| 1. **Identifying the course design.**<br><br>2. **Learning activities** must go beyond discussion<br><br>3. Making students aware of **required level of proficiency** in using educational technologies and computers. | 1. Essential essence for both medium of instructions.<br><br>2. This can enhance the productivity of teaching learning process in both types of classes.<br><br>3. Both medium can make their students well aware and well prepared by informing them about the technology competency level required for given course. | 1. It is important to identify the course design according to the needs of students. We have to decide whether it should be learner – centered, subject-centered or problem- centered.<br><br>2. Learning activities should focus on students' interaction to prompt the exchange of learning, ideas and cooperation in form of collaborative tasks among them.<br><br>3. To make students mentally and educationally well- prepared by acquiring the target skill. |
