There's no other way to put it. The Parker 26 Sport Hybrid (SH) is a dream. For nearly two years, a dedicated team of engineers at Parker Offshore - and Linwood Parker himself - designed the ultimate vessel to keep you inshore, take you offshore, or opt for a relaxing day of sandbar hopping with the family. Twenty-six feet with a 9'6" beam, complete with all the Bay Boat essentials - and some - the 26 SH offers ample fishing space at the bow and stern, 30-gallon recirculating livewells with clear observation lids, four rocket launchers, and multiple rod holders, located on both the starboard and port side. Friends and family will enjoy comfortable and ergonomic seating at the bow and stern, cupholders throughout, Fusion stereo and six speakers, dome lights, and fresh water washdown for when the day is complete.

At Parker Boats, we say *Traditions Continue*, but with the new 26 SH, we're showcasing *Traditions Refined*. What does that mean? It means that the 26 SH bears the same promise that preceding Parker vessels bear – *Strength, Simplicity, Seaworthiness* – three words that are the channel markers that guide our company.

The Parker 26 SH embodies the tradition of time-tested design and a continual straightforward approach with uncompromising dedication to the highest quality craftsmanship, yet she demonstrates an elevated level of elegance and sophistication with precise improvements that keep you, our Parker customer, in mind. This concept was the inspiration that guided Linwood Parker and the Parker engineering team when designing the latest addition to our stellar fleet.

The Parker 26 SH – Traditions Continued. Traditions Refined.
