

AGRI-SENSE

**AERIAL SURVEYS, REMOTE SENSING &
GEOGRAPHICAL INFORMATION
SOLUTIONS FOR AGRICULTURE
IN AFRICA**

Knowledge at your finger tips

Technology at work for you

Connecting your Farms to the technology resources you need

Agri-Sense is an agricultural technology company with vast experience in drone surveying and agricultural crop monitoring in Africa.

The age of data is changing the way we farm, drones and satellites provide us with accurate remote sensing information to analyse our crops. Information drives decisions. However we believe that timeless information in conjunction with streamlining communication and connecting key role players, allows for swift action on those decisions. This ensures that any critical problems within the crop can be addressed, reducing the risk to all parties involved. This is the basic concept behind Agri-Sense.

More than 500 000 ha mapped in 10 countries

We combine remote sensing and field information with in depth analysis to form a unique set of management tools that are used to improve efficiency, increase productivity and reduce environmental impacts of agricultural operations. With the use of UAV in agricultural development we provide highly accurate large scale aerial mapping and Digital Terrain Models resulting in a cost effective engineering solution for the agricultural industry. We have been in operation since 2012 and have mapped over 500 000ha across 10 countries in Africa.

CLIENTS

European Union
Bayer
Illovo Group
Dangote Sugar
Tongaat Hulett
AgDevCo
COOPI
Malawi Mangos

Past Projects

GHANA, SKIP-IWAD
36 180 ha 2019
Topographical survey & DTM (Upscaling the Sisili -Kulpawn Irrigation Project)

Malawi- COOPI,
14 700 ha 2018
Aerial Survey/Mapping & DTM of 5600 in Mangochi and 9100 in Nsanje

Belize, SIRD / EU
90 000 ha 2018
Aerial survey & DTM for Drainage master plan for the sugar industry

DRC, CSKN,
21 000 ha 2017
Aerial survey and DTM of existing estate for Irrigation & Drainage Design

Mozambique, Maeva
11 000 ha , 2016
Aerial Survey & DTM for irrigated maize production

RSA, TSB Sugar
18 000 ha 2015
NDVI Crop Assessments and Farm Mapping

Ghana, AgDevCo,
13 000 ha 2015
Aerial Survey & DTM for Irrigation Development

Nigeria, Dangote Sugar,
12 000 ha 2014
Aerial Survey for Irrigation Development

Our Team

Our team of experienced agricultural professionals have been at the forefront of both the use of UAVs (drones) and mobile applications in agriculture in Africa. We effectively combine the wisdom of experience with innovative technologies, to provide our clients practical solutions, tailored to meet the demands of modern farming in Africa.

Russell Longhurst
Managing Director
B. Eng. Hons. (Ag Eng) Harper Adams, UK

Ameen Abdulla
Remote Sensing Analyst
B.Sc.Hons. Remote Sensing & GIS UKZN

Chris Matthews
Executive Director
B.Sc (Ag Eng) Hons, Silsoe, UK
Founder of Agricane Limited

Renell Soobramanian
Social Media & GIS Technician
B.Sc. Hons. Geography & Environmental Management UKZN

Michael Cohen
GIS Specialist
B.Sc.Hons. Geography, GIS Rhodes

Nicholas Bradley
Junior GIS Specialist
B.Sc Environmental Science UKZN
