

**WARNING – KEEP OUT OF THE REACH OF CHILDREN
READ THE LABEL COMPLETELY BEFORE MIXING OR APPLYING**

Parka®

POWERED BY **Sure Seal**
BIOFILM TECHNOLOGY

CHERRY CRACKING SUPPRESSANT

PARKA® is a food-grade hydrophobic BioFilm applied to cherries to assist in the reduction of cracking due to rain.

Active Ingredient: PARKA contains a proprietary blend of phospholipids in a cellulosic matrix.

ACVM classification: Exempt
HSNO Approval code: Non-hazardous

This product is not classified as hazardous under the HSNO Act.	
PRECAUTIONS Store in original container, tightly closed, away from foodstuffs and under lock and key. Avoid contact pesticides. When handling the concentrate wear protective clothing such as overalls, gloves and face shield. Avoid contact with skin, eyes and inhalation of spray mist. Wash splashes of concentrate from skin or eyes immediately. When spraying, wear overalls and gloves. DO NOT eat, drink or smoke while using. Wash hands and face before eating, drinking or smoking and after work. Wash protective clothing after use. Apply with well-maintained and calibrated spray equipment.	
Container disposal: Ensure the container is empty. Triple rinse empty container and add rinsate to the spray tank. Recycle empty container through Agrecovery (0800 247 326, www.agrecovery.co.nz). Otherwise crush and bury in a suitable landfill. DO NOT reuse this container for any other purpose.	
Product disposal: Dispose of this product only by using according to the label, or at an approved landfill or other approved facility.	

FIRST AID:
If swallowed DO NOT induce vomiting. For advice, contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. If skin, hair or eye contact occurs, remove contaminated clothing and flush skin, hair and/or eyes with running water for several minutes.

SPILLAGE
Wear suitable protective clothing including face shield, impervious gloves and boots. Prevent the product or spilled material from entering water bodies. Absorb liquid spills with inert material such as earth or sand and place in waste containers. Wash area with water and absorb with further inert material. Dispose of safely.

DISCLAIMER
Use Directions must be followed carefully. It is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness, or other unintended consequences may result because of factors including, but not limited to: weather conditions; presence of other materials; or the manner of use or application, all of which are beyond the control of the manufacturer or seller. The buyer shall assume all such risks.

GENERAL INFORMATION
PARKA® is a patented blend of phospholipids with unique elasticity proprieties designed to supplement the cuticle of growing fruit and foliage. Supplementing the cuticle of the fruit reduces micro-fractures in the cuticle minimizing cracking from rain, improving finish and reducing post-harvest disorders. Cracking can be attributed to differences in cuticle development and by a range of environmental conditions. **PARKA** should be used as part of a management program.

USE RECOMMENDATIONS:
Shake Well Before Using.
DO NOT USE WITH CAPTAN.
DO NOT USE CAPTAN AFTER MID FLOWERING IF PARKA IS TO BE USED.
DO NOT USE SULPHUR WHERE PARKA IS TO BE OR HAS BEEN APPLIED.
DO NOT MIX WITH SURFACTANTS, STICKERS OR PINOLENE BASED MATERIALS.
Avoid applying when dry times are long (spraying in a cool afternoon/evening with excessive dry time)

PARKA is manufactured by: Cultiva www.cultivaipm.com
TM: **PARKA** is a trademark of Cultiva, Portland, OR. USA

© Copyright Etec Crop Solutions Limited 2019, all rights reserved. All directions for use, recommendations, use rates, compatibilities and other technical information is proprietary to Etec Crop Solutions.

Mixing: DO NOT MIX WITH ANY OTHER PRODUCTS. For best results finished spray solution pH should be between 5 and 7.

Application: Use PARKA at a rate of 9.5 litres per hectare in 1500 to 2000 litres of water. Ensure good coverage. DO NOT USE higher or lower dilution or water rates as fruit marking may occur. Apply using a calibrated orchard sprayer.

Timing:
Apply in a two application program at 100% shuck fall and straw colour. A 3rd application can be considered if there is a rain event >10 days after last application. For maximum effect all cherries must be thoroughly covered.

STORAGE:
Store in original container tightly closed and in a locked, dry, cool, well ventilated area, away from feed, seeds and foodstuffs. Protect from freezing. Store above 10°C. Storage must be generally in accordance with NZS8409 Management of Agrichemicals. See the HAZNOTE for further information.

When stored appropriately, this product should show no significant degradation for a minimum of 2 years from the date of manufacture. Contact your supplier for further information about the use of any product that is older than this. See Safety Data Sheet for additional storage information.

SAFETY DATA SHEET
If additional hazard or safety information is required, refer to the Safety Data Sheet. For a copy visit our website at www.etec.co.nz

EXCLUSION OF LIABILITY: PLEASE READ. To the extent permitted by law, buyers and/or users of the goods accept that neither the manufacturer, Etec Crop Solutions Limited as distributor, nor any other distributor have any liability or responsibility whatsoever for any loss, damage or injury whether in contract or tort, whether direct, indirect or consequential howsoever arising in connection with the supply of these goods.
