

Architectural policies developments across Europe

ČESKÁ KOMORA ARCHITEKTŮ

“Public space directly impacts everyone’s quality of life, and therefore, architecture is a domain with a significant social impact. In order to better plan and develop our living environment, we have convened an expert group on spatial design, with the goal of making proposals for updating domestic architectural policy”

Indrek Saar, Minister of Culture, Estonia.

Josef Smutný

THE RISE OF ARCHITECTURAL POLICIES

ČESKÁ KOMORA ARCHITEKTŮ

1977 -> 2017

40 years

ČESKÁ KOMORA ARCHITEKTŮ

France | 1977

In the European panorama France was a pioneer country approving a Law on architecture:
Loi n° 77-2 du 3 janvier 1977 sur l'architecture.

Georges Pompidou Centre, Paris | Richard Rogers, Renzo Piano & Gianfranco Franchini | 1977

EU Architects Directive | 1985

“architecture, the quality of buildings, the way in which they blend in with their surroundings, respect for the natural and urban environment and the collective and individual cultural heritage are matters of public concern’
(Architects Directive 85/384/EEC)

Dutch government Policy on Architecture

Dutch government Policy on Architecture | 1991

In 1991, the Netherlands approved the first national government memorandum on architectural policy, entitled: Space for Architecture.

The policy document led to the establishment of several cultural institutions in the following years:

- Berlage Institute
- Netherlands Architecture Fund
- Architectuur Lokaal Foundation
- Local Architecture centres (+30)

Dutch government Policy on Architecture

The aim of the joint architectural policy of the Minister of Housing, Physical Planning and Environment and the Minister of Welfare, Health and Cultural Affairs is to **“create the right conditions for the generation of quality architecture.”**

(Space for Architecture, 1991)

EU Council Resolution on Architectural Quality | 2001

ENCOURAGES THE MEMBER STATES TO:

- a) intensify their efforts to improve the knowledge and promotion of architecture and urban design,
- b) to make contracting authorities and the general public more aware of and better trained in appreciation of architectural, urban and landscape culture;
- c) promote architectural quality by means of exemplary public building policies;
- d) foster the exchange of information and experience in the field of architecture.

LEIPZIG CHARTER on Sustainable European Cities

PREAMBLE

The "LEIPZIG CHARTER on Sustainable European Cities" is a document of the Member States, which has been drawn up with the broad and transparent participation of European Stakeholders. In the knowledge of the challenges and opportunities as well as the different historical, economical, social and environmental backgrounds of European cities, the Member States' Ministers responsible for Urban Development agree upon common principles and strategies for urban development policy. The Ministers commit themselves

- to initiate a political debate in their states on how to integrate the principles and strategies of the Leipzig Charter on Sustainable European Cities into national, regional and local development policies,
- to use the tool of integrated urban development and the related governance for its implementation and, to this end, establish any necessary framework at national level and
- to promote the establishment of balanced territorial organisation based on a European polycentric urban structure.

The Ministers thank the German Presidency for having prepared the report "Integrated urban development as a prerequisite for successful urban sustainability" and the studies "Strategies for upgrading the physical environment in deprived urban areas", "Strengthening the local economy and local labour market policy in deprived urban areas", "Proactive education and training policies on children and young people in deprived urban areas" and "Sustainable urban transport and deprived urban areas" with their examples of good practice in Europe. These studies will help cities of all sizes in the effective implementation of the principles and strategies set out in the Leipzig Charter on Sustainable European Cities.

The Ministers declare:

We, the ministers responsible for urban development in the Member States of the European Union, consider European cities of all sizes which have evolved in the course of history to be valuable and irreplaceable economic, social and cultural assets.

With the objective of protecting, strengthening and further developing our cities, we strongly support the EU Sustainable Development Strategy, building on the Lille Action Programme, the Rotterdam Urban Acquis and the Bristol Accord. In doing so, all dimensions of sustainable development should be taken into account at the same time and with the same weight. These include economic prosperity, social balance and a healthy environment. At the same time attention should be paid to cultural and health aspects. In this due attention should be paid to the institutional capacity in the Member States.

Our cities possess unique cultural and architectural qualities, strong forces of social inclusion and exceptional possibilities for economic development. They are centres of knowledge and sources of growth and innovation. At the same time, however, they suffer from demographic problems, social inequality, social exclusion of specific population groups a lack of affordable and suitable housing and environmental problems. In the long

Leipzig Charter on Sustainable European Cities (2007)

EU Council Conclusions on Architecture: ČESKÁ KOMORA ARCHITEKTŮ Culture's Contribution to Sustainable Development | 2008

Calls on the commission and member states to:

- a) make allowance for architecture in all relevant policies, especially in research, economic and social cohesion, sustainable development and educational policies.
- b) encourage innovation and experimentation in sustainable development in architecture, urban planning and landscaping, in particular within the framework of European policies and programs and when commissioning public works.
- c) and a number of more concretely defined actions, such as research, an annual European architecture event and measures to enhance better education and public awareness.

13.12.2008	EN	Official Journal of the European Union	C 319/13
Council conclusions on architecture: culture's contribution to sustainable development			
(2008/C 319/05)			
THE COUNCIL OF THE EUROPEAN UNION,		4. POINTING OUT THAT:	
1. HAVING REGARD TO:		— architecture, as a discipline involving cultural creation and innovation, including a technological component, provides a remarkable illustration of what culture can contribute to sustainable development, in view of its impact on the cultural dimension of towns and cities, as well as on the economy, social cohesion and the environment,	
— the Treaty establishing the European Community,		— architecture is also an example of the cross-cutting nature of culture, being affected by a number of public policies and not just cultural policies.	
— the Council Resolution of 12 February 2001 on architectural quality in urban and rural environments ^(*) , which affirms that architecture is a fundamental feature of the culture and the fabric of life of each of our countries,		5. CONSIDERING THAT:	
— the Council conclusions of 24 May 2007 on the contribution of the cultural and creative sectors to the achievement of the Lisbon objectives ^(*) , which point out that cultural activities and creative industries, including architecture, play a critical role in boosting innovation and technology and are key engines of sustainable growth in the future,		— Europe's towns and cities today face major challenges: demographic change and its implications for urban sprawl, environmental issues and climate change mitigation, maintaining social cohesion, particularly against a background of economic and cultural change, and the protection and development of architectural and cultural heritage,	
— and the Council Resolution of 16 November 2007 on a European agenda for culture ^(*) which, further to the Commission communication of 10 May 2007 ^(*) , brings out the cross-cutting role of culture.		— the way to respond to those challenges is by means of sustainable urban development, a creative, integrated approach under which culture, economics, social affairs and the environment each play an equally important part,	
2. TAKING NOTE OF:		— sustainable urban development means:	
— the renewed European Union Sustainable Development Strategy ^(*) , adopted by the European Council of 15 and 16 June 2006, the overall aim of which is to identify and develop actions to enable the EU to achieve continuous improvement of quality of life both for current and for future generations, through the creation of sustainable communities able to manage and use resources efficiently and to tap the ecological and social innovation potential of the economy, ensuring prosperity, environmental protection and social cohesion,		— paying particular attention to architectural quality and diversity as aspects of cultural diversity, to heritage conservation and enhancement and to the individual identity of natural or urban landscapes,	
— the Leipzig Charter on sustainable European cities, adopted on 24 May 2007 by the Ministers with responsibility for urban development ^(*) , which underlines the importance of building culture and calls for the adoption of an integrated urban development approach covering the economic, social, ecological and cultural aspects of towns and cities, on the basis of cooperation between the different tiers of administrative and political responsibility and between public and private sector actors,		— contributing to the management of projects to use and convert land and buildings, in particular industrial wasteland, control energy resources in the context of climate change and reduce pollution,	
3. WELCOMING:		— reflecting, through innovative approaches to architecture and urban planning, developments in population lifestyles, particularly issues of mobility and demographic change, as well as objectives of social cohesion, social mix, intercultural dialogue and civic involvement,	
— the work of the European Architectural Policy Forum on issues of architectural quality and sustainable development.		— encouraging high-quality architectural creation as an economic stimulus and tourist attraction for towns and cities,	
^(*) OJ C 73, 6.3.2001, p. 6, ^(*) OJ C 311, 21.12.2007, p. 7, ^(*) OJ C 143, 10.6.2008, p. 9, ^(*) 9496/07 + ADD 1, ^(*) 10117/06, ^(*) http://www.eu2007.de/en/News/download_docs/Mai0524-AN/073Dokumentil.eipzgCharta.pdf		— architecture can play an integrating and innovative role in implementing sustainable urban development, in particular by: — reconciling the sometimes differing requirements of building and landscape conservation and contemporary creation or of inhabitants' legitimate aspirations and controlling urban sprawl.

2011

Legislation (Type 1)

France

In 2014, the French Minister of Culture has announced its intention to launch a “National Strategy for the architecture” (SNA), a public management tool of the architect’s policy. To prepare the National Strategy, three working groups have been established around three objectives: awareness, innovation and growth. Working groups have submitted their proposals to the Minister 7 July 2015. The National Strategy on Architecture was published last month and was formally adopted **on October 2015**.

Legislation (Type 1)

Sweden

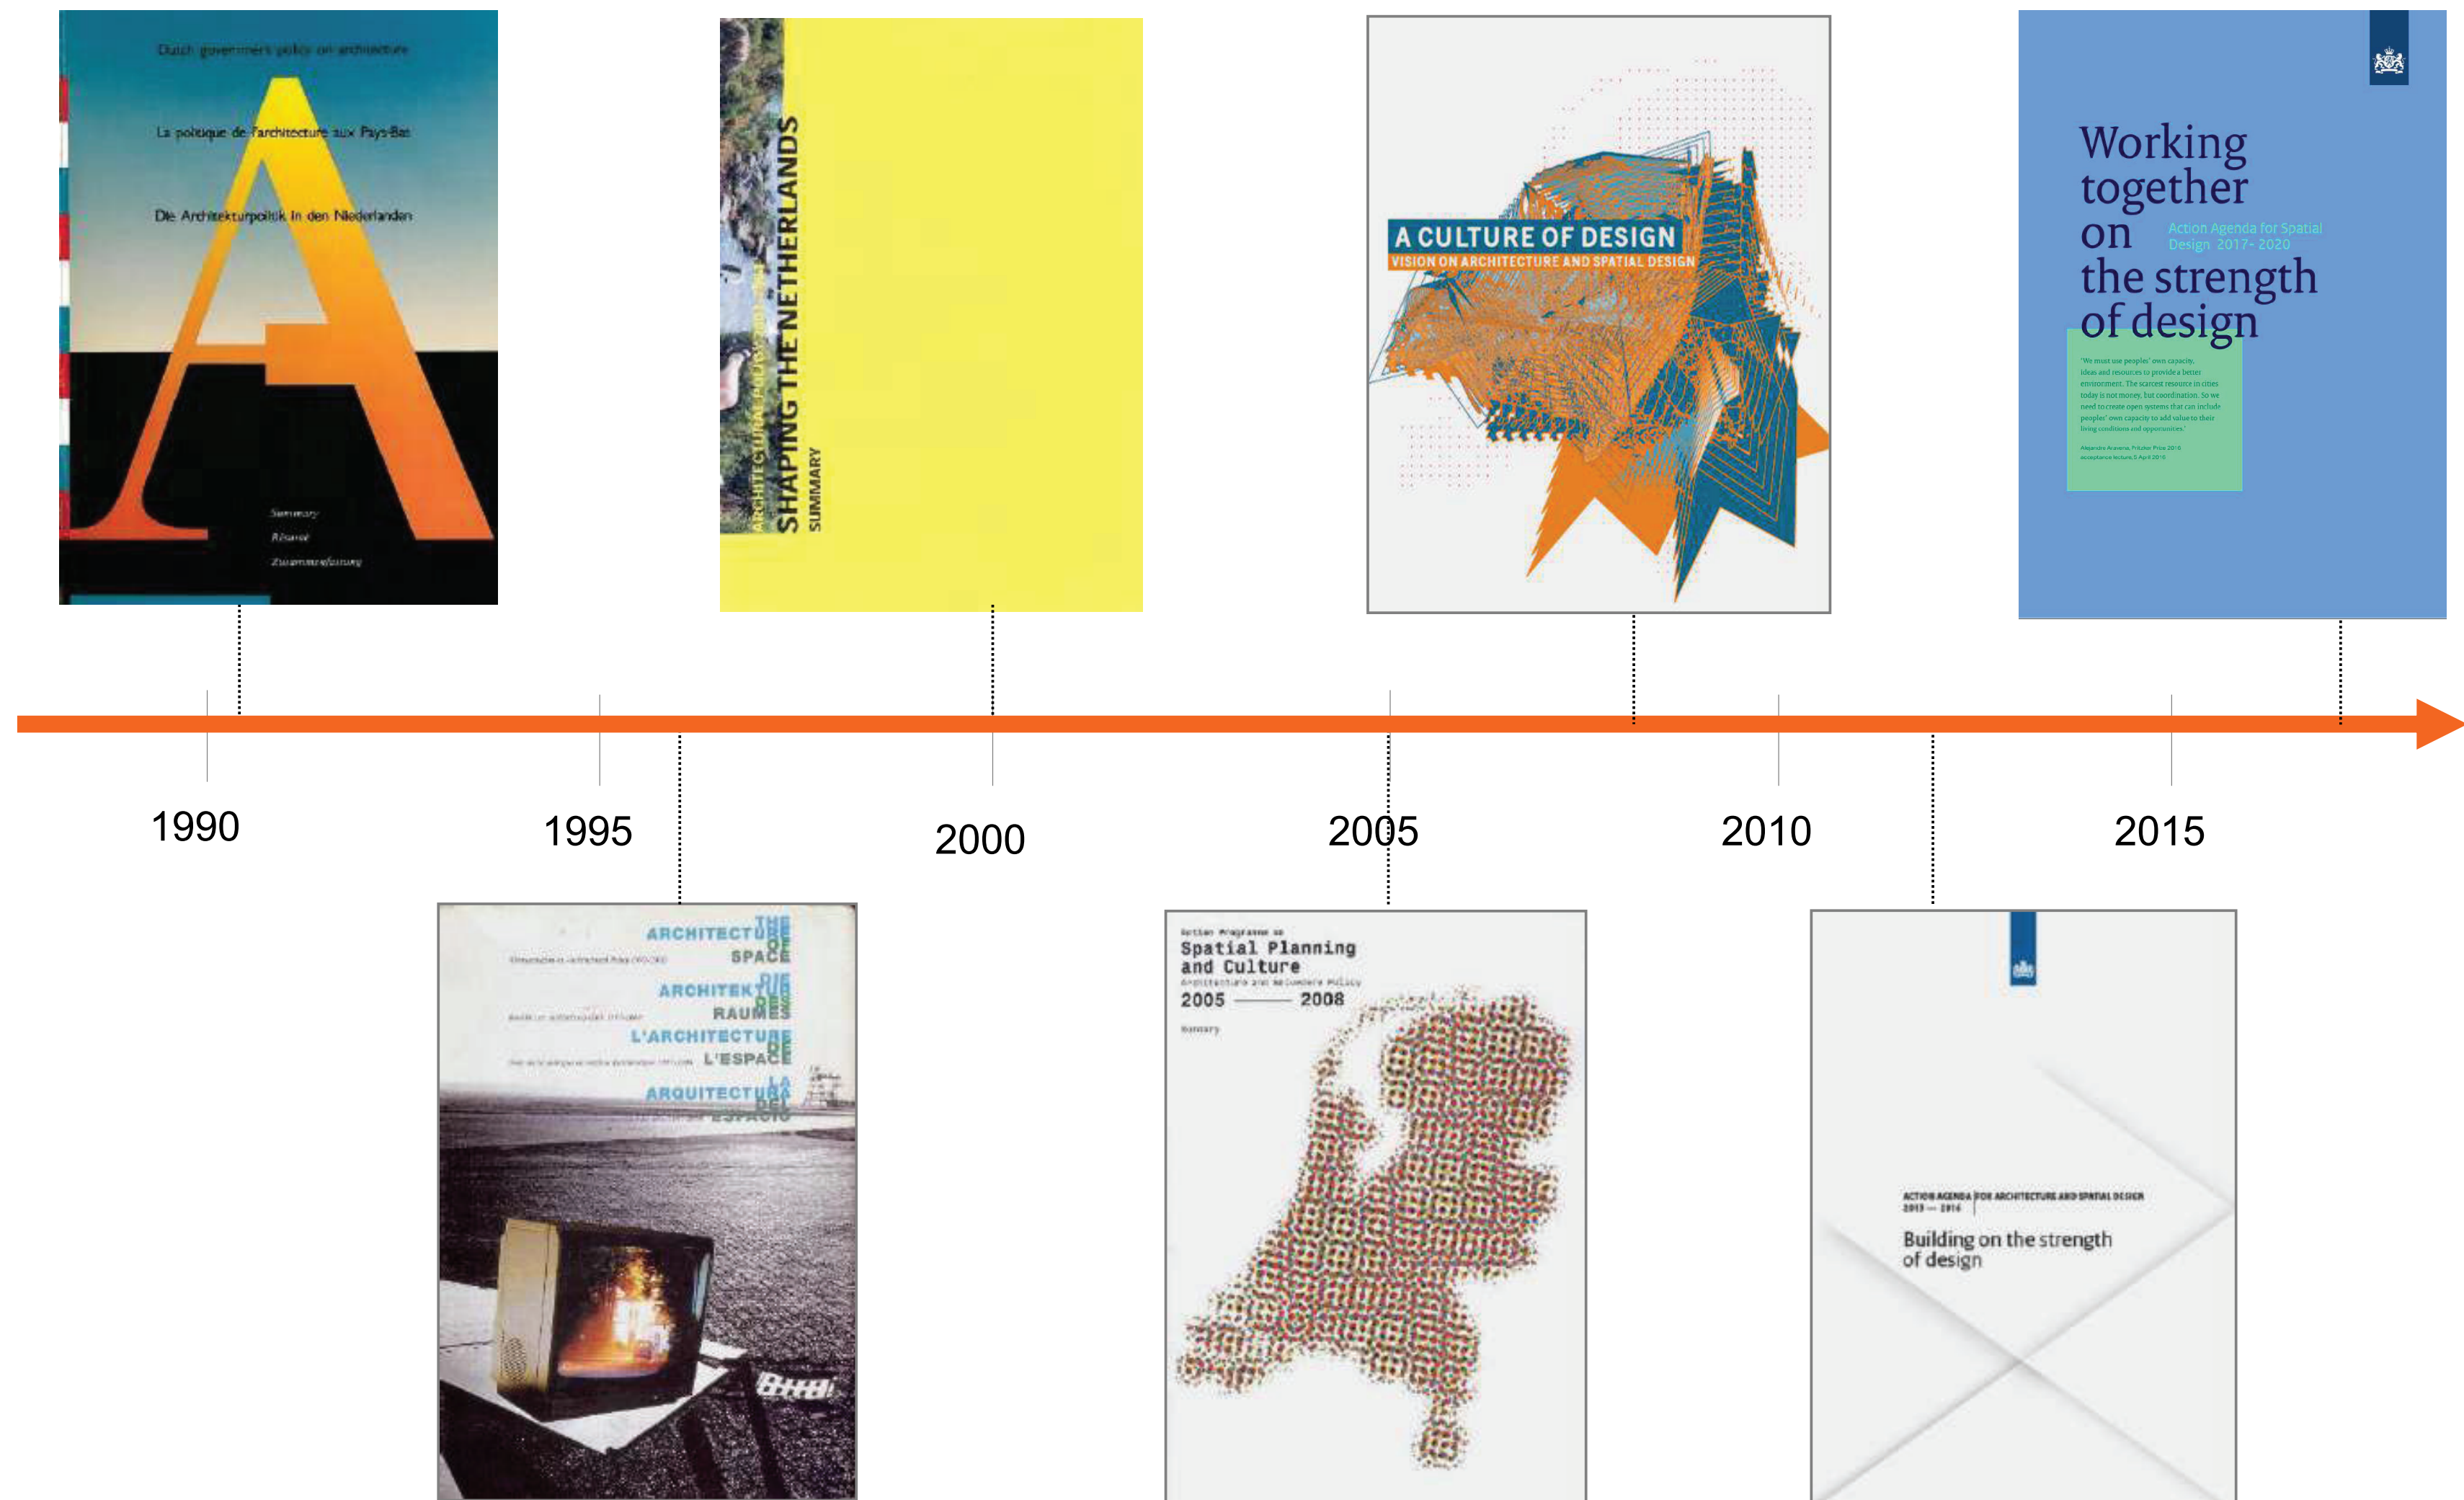

A report and proposal of a new Swedish
National policy on Architecture was
Published in 2015, entitled:

*The designed environment: a new policy
for architecture and design (2015)*

Types of public policies on Architecture in Europe

2017

Transversal themes of national Architectural policies

Expansion of the policy scope

Country	Initial scope		New concepts
Netherlands	Architecture and urban design	+	Spatial design
England	Architecture and the built environment	>	Place-making
Scotland	Architecture	+	Place
Germany	Architecture and building culture	=	Baukultur
Sweden	Architecture and design	>	Designed environment
Portugal	Architecture and the built environment	>	Architecture and landscape

+ more

> expanded to

= equivalent

Transversal themes of national Architectural policies

Grounds for state intervention

Four **main reasons** for the adoption of a national policy on Architecture:

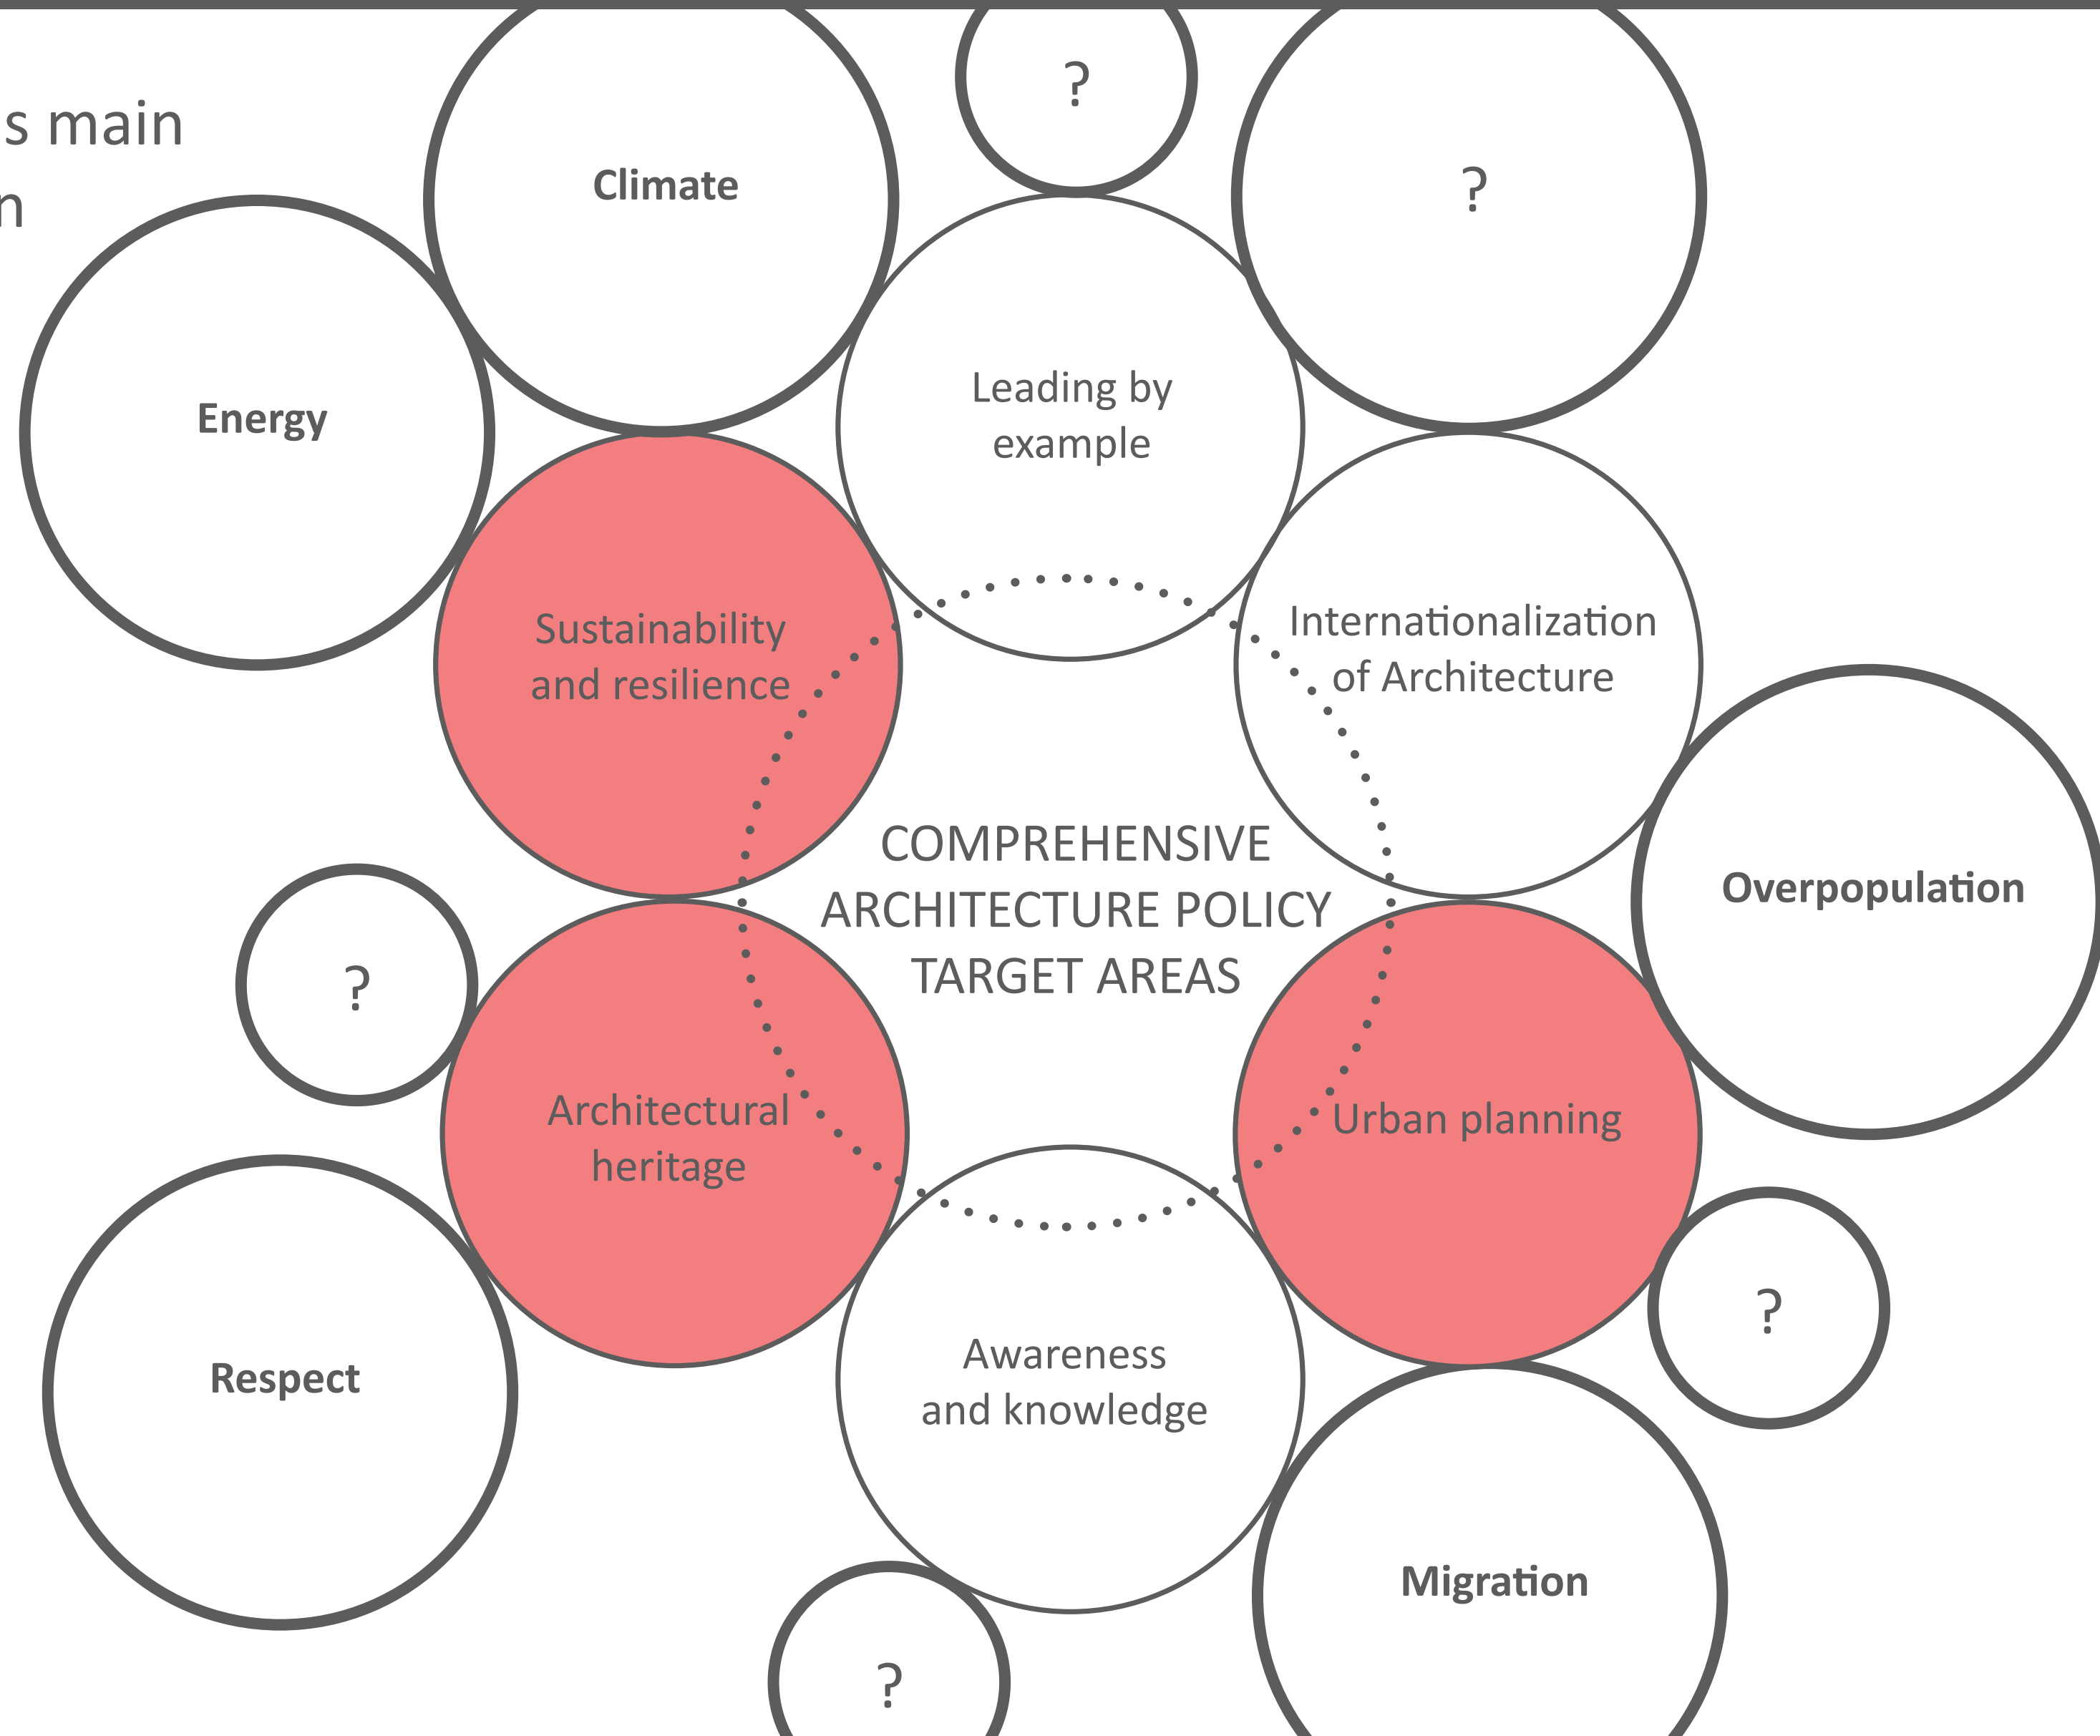

- a) Architecture is a matter of public interest
- b) Government responsibility
- c) Right to a good living environment
- d) Better efficiency in government policy
