*Sexual health is defined by the World Health Organization as ‘a state of physical, emotional, mental and social well-being in relation to sexuality; it is not merely the absence of disease, dysfunction or infirmity. Sexual health requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having pleasurable and safe sexual experiences, free of coercion, discrimination and violence. For sexual health to be attained and maintained, the sexual rights of all persons must be respected, protected and fulfilled.” (2006a)*

Facilitated by Zak Dattadeen and Saba Kidane, Sexual Assault Centre of Edmonton (SACE)

WORKSHOP DESCRIPTION:

At some point in their lives at least 1 in 3 Canadian women and 1 in 6 Canadian men will experience sexual assault. Despite the prevalence of sexual violence in our country, many Canadians are not provided with comprehensive information on the subject. In this workshop the Sexual Assault Centre of Edmonton presents accurate, research-based, non-victim-blaming information on sexual violence and prevalent attitudes and beliefs that create conditions where sexual violence is allowed to happen. Participants will gain a thorough understanding of Canada’s consent laws, how to respond to disclosures of sexual assault, and effective community responses to sexual violence.

In other words, sexuality is not just about what our body does and what we do with our bodies, it is how thoughts, fantasies, desires, beliefs, attitudes, values, behaviours, practices, rules and relationships are experienced and expressed (WHO, 2006a).

SEXUALITY AND MENTAL HEALTH: BODY IMAGE

NEW WORKSHOP (3 Modules)

March 4 – March 24, 2019

Developed and Facilitated by Colleen Larsen, AHS, Calgary Region

WORKSHOP DESCRIPTION:

This workshop explores the intersection of sexual health and mental health, focusing on the issue of body image within the adolescent population. Though mental health and sexual health have enormous influence on each other, this subject often goes unaddressed, both by health care providers as well as in many sexual health education programs. As the stigma of discussing sexual health has begun to decrease, there has been a rise in research that highlights the inter-relatedness of mental and sexual health, and the importance of acknowledging and addressing these needs in tandem rather than as separate concerns. This workshop aims to provide a basic overview of the common mental health diagnoses that occur in adolescence, how they can affect self-image, common body image concerns, the sexual health needs of this population, and ways to address these topics with youth.

FACILITATOR’S BIO:

Colleen Larsen (she/her/hers) is a Registered Nurse who works in the mental health field, primarily with adolescents as well as crisis intervention services. She has worked in a variety of settings within mental health, and has had the privilege of working as an instructor of nursing students at both Mount Royal University and the University of Calgary. In recent years, Colleen has also been pursuing her first passion – sexual health education. She is currently taking the University of Alberta’s Post-Graduate Sexual Health certificate, and is very excited to share this workshop with you!

THE ANTI-CHOICE MOVEMENT IN CANADA: THE FACTS

NEW WORKSHOP (3 Modules)

April 1 – April 21, 2019

Developed and Facilitated by Kathy Dawson and Joyce Arthur, Abortion Right Coalition of Canada, Edmonton and Vancouver

WORKSHOP DESCRIPTION:
The anti-choice movement is highly active in Canada, but how politically influential are they? This workshop will look at the history and scope of the anti-choice movement in Canada, and examine their key activities and strategies in recent years. What are their goals? How are they funded? What are the main threats they pose to reproductive rights and other human rights?
To get a sense of how politically influential the anti-choice movement is in Canada, the workshop will look at several provinces where reproductive rights are being violated or may be threatened by conservative governments, including Alberta, Ontario, and New Brunswick – as well as federally if the Conservatives win the 2019 election. Party positions on reproductive rights will be reviewed. Another focus will be anti-choice “crisis pregnancy centres” that misinform and deceive clients about abortion and other healthcare, and which have been making incursions into school sex-ed curriculums and opening maternity homes. You will learn about what ARCC and the reproductive rights movement has been doing in response to anti-choice actions, participate in a discussion of other potential strategies and campaigns, and find ways to get involved yourself to protect abortion access and rights.

FACILITATORS’ BIOS:
Kathy Dawson is a board member of the Alberta Pro-Choice Coalition and the Abortion Rights Coalition of Canada. Since 2013, Kathy has been working to get anti-choice groups blocked from classrooms, public funding & government referrals.
