

Overall a very good portfolio - audio work is very well presented. Though you worked across two projects, there is a distinctive style to both products through your sound design/music. Arguably each project could do with more evidence of iteration and experimentation to demonstrate potential approaches to the sound design. However, working across two teams it is evident that you have produced a volume of work that indicates significant effort and ability. The project evaluations are very good and you communicate your work and its context well. Peer review feedback is wholly excellent - you were clearly a valued and respected member of the teams that you worked in

DAYNA GALLOWAY Abertay University, Dundee

Grade: A

Project Development

A In your portfolio you demonstrate an excellent ability to carry out development tasks in response to the brief and in relation to your subject area.

Testing and Iteration

B You demonstrate a very good ability to test and refine the project build.

Engagement and Commitment

A In your submission you provided a substantial amount of work, demonstrating strong engagement with the development process and commitment to the team

Evaluation

B Your evaluation of the project was very good, providing a highly appropriate, accurate and considered post-mortem on what went right and wrong and what you would do differently.

Overall Prototype

B The presentation of the prototype and documentation was very good, demonstrating an ability to clearly and professionally present the prototype to the client.
