

There's a lot going on in your home,  
as well as going IN and OUT of your home...

## Air Quality

The air we breathe is often contaminated with particles. When those particles become excessive, they compromise the integrity of your home environment.

Our cutting-edge technology allows our Goldmorr Technicians to TEST, TREAT, AND CLEAR the air of these airborne contaminants.

The quality of the air in your home and the test reports provided will be based on International Standards set for clean air.

TEST

TREAT

CLEAR

The proof is in the results!

Your home's air quality is important to us.

## Contents

With traditional remediation, mold on contents is "game over." Your valuables and keepsakes are headed to the landfill. With Goldmorr, we can clean and save most of your contents, returning them to useable items.

### Furnishings

Leather      Fabric  
Canvas      Wood

### Clothing

Coats      Shoes  
Purses      Belts

### Household

Paintings      Books  
Keepsakes      China  
Plastic      Toys

The proof is in the results!

Your belongings are personal to you & important to us.

## Surfaces

With traditional mold remediation, surfaces are removed and rebuilt, raising costs and causing disruption to you and your home. Our Goldmorr Technician can treat all of your home's surfaces safely and with less cost and disruption for you:

- Living Areas
- Attics
- Crawl Spaces

There is no need to tear out perfectly good materials. These surfaces can be restored within minutes.

The proof is in the results!

Even your home's hidden areas are important to us.
