

# Comprehensive

No mold remediation system does a more thorough job of addressing both the visible mold & air quality. Your Goldmorr Technician can prove it with state-of-the-art clearance reporting based on International Standards and signed off by a biochemist immediately.

**BOTTOM LINE...WE GET IT ALL!**

## The Science, Safety, & Satisfaction of The Goldmorr System

### Science

GM 6000 is formulated to penetrate porous materials and is used for the removal of most types of visible staining, including mold. GM 2000 is a biodegradable, water-based product safely used to clean all surfaces including fabrics, as well as fogging into the air and AC ducts. This final step in the Goldmorr micro-cleaning process is the elimination of airborne particulates. When fogging, it acts as a non-mechanical air scrubbing system designed to suspend inanimate particulates for easy removal from the indoor air environment.

*Everyone wants a clean, safe home.  
We want that for you as well!*

# Convenient

The Goldmorr System, in most cases, can have you back in your home the same day - 24 hours later. Why be displaced from your home for weeks to months for the unnecessary tear out of building materials that are not compromised?

**BOTTOM LINE...WE MAKE IT EASY!**

### Safety - Skin Testing & Biodegradability

Produced no erythema or oedema at 60 minutes, 24, 48, and 72 hours, following a 4-hour exposure period...Classified as non-irritant to skin according to the criteria of the National Occupational Health and Safety Commission.

Biodegradability / Goal = > 70% decomposition within 28 days.  
Actual = 95% during test period in approximately 4 days.

# Cost-Effective

With The Goldmorr System, your mold remediation technician can do a better job, more efficiently, with far less reconstruction costs.

**BOTTOM LINE...WE SAVE YOU MONEY!**

### Satisfaction - Testimonials

1. "We had our house on the market and we were shocked beyond belief that the inspector had found mold all over the sheeting in our attic. Within one day, they had sprayed and fogged and the mold just disappeared. It was amazing as the sheeting looked brand new again. The attic even smelled fresh."
2. "In the many years that I have been performing clearance testing on mold work, I have never seen a cleaner indoor air environment than when I inspect and test behind a job that is remediated with The Goldmorr System."

We are proud to offer  
**The Goldmorr System.**

It's simply the most comprehensive, convenient, and cost-effective system available.
