Code	Description	Weight g	W mm	H mm	L mm
FT 3002	Micro Burr Set	73	70	20	120

	<p>Instructions</p> <p>Do not use heavy pressure when deburring as this will cause the blade to dig into the material and give an uneven finish</p> <p>Use light and even pressure which will allow the blade and handle to work together to remove the burr and leave a smooth finish on the component</p> <p>Blades should be handled carefully as they are sharp and can cut</p> <p>Blades can break causing flying objects</p> <p>Sharp edges and flying objects can cause injury</p> <p>Users and bystanders should wear protective safety glasses</p> <p>Do not pry or bend blades</p> <p>Keep blades and sharp tools away from children</p> <p>Do not regrind blades as this will weaken the blade and cause breakage and possible injury</p> <p>All Noga products meet the strict requirements of ISO 9001 and ISO 14001</p>
