

Embodied Ascension with Andrei Stoica

This talk will outline various layers of consciousness or subtle bodies that are important to understand and build up as part of a fully embodied awakening or ascension process. This workshop will clarify and define various concepts practices and treatments, how they work and what layer they are aimed at. Andrei will detail a type of road map of practices and areas to work on to anchor in the rapidly changing energies and consciousness shifts. You will experience information, practices and an energy transmission.

Andrei is an Energy Medicine practitioner specializing in Chinese Energetic Medicine or Medical Qigong. This practice allows him to 'tune into' the energetic layers of the body and help his patients understand how these layers are affecting their body, emotions, and mind. In addition to using energy medicine to treat conditions, Andrei is passionate about educating his patients on how to use and practice this for themselves.

Andrei's interest in the Healing arts started at a young age when he began martial arts training. He then went on to study yoga and meditation, which led him to pursue a career in Chinese Medicine. He studied at Acupuncture and Integrative Medicine College (AIMC) in Berkeley, CA; Medical Qigong with Dr. Suzanne Friedman as well as with Dr Bernard Shannon at the International College of Medical Qigong; Esoteric Acupuncture with Dr. Mikio Sankey; Medical Intuition with Carolyn Myss and Dr. Norm Shealy; Arcturian Healing Method with Dr. Gene Ang and Visionary Craniosacral Work with Hugh Milne. <https://www.interiorcastlewellness.com/>
