

■ Features:

- · Output constant voltage
- · Universal AC input: 100-130VAC
- · High efficiency :up to 87%
- · Protection:short circuit/over loading/over current/ Over temperature
- · Full protection plastic housing
- · Easy installation
- · Cooling by free air convection
- · Compatible with Forward phase, Magnetic low voltage, Triac Dimmers
- · Strong compatibility, flicker-free dimming
- · Suitable for LED lighting and moving sign applications and others
- · Provide with a junction box for power supply and output connection
- · Suitable for dry or damp location use, IP20

■ Specification

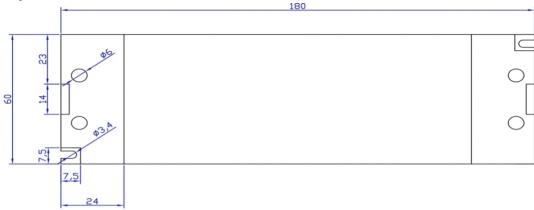

| Model | | KVP-12060-TDL | KVP-24060-TDL |
|--------------|------------------------|---|---------------|
| Certificates | | ETL,cETL,FCC | ETL,cETL,FCC |
| Output | DC Voltage | 12V | 24V |
| | Voltage Tolerance | ±0.5V | |
| | Rated current | 5A | 2.5A |
| | Rated power | 60W | |
| Input | Voltage Range | 100-130VAC | |
| | Frequency Range | 47~63HZ | |
| | Power Factor | 0.65 (Full loading) | |
| | Efficiency (Typ.) | 85% | 87% |
| | AC Current (Max.) | 1.0A | 1.0A |
| | Leakage current | < 0.50mA/120VAC | |
| Protection | Short Circuit | Hiccup mode, recover automatically after fault condition is removed | |
| | Over Current | ≤1.2*I out | |
| | Over Loading | ≤120% | |
| | Over temperature | 100 ℃ ±10 ℃, Shut down o/p voltage, recover automatically after temperature | |
| | Over temperature | goes down. | |
| Environment | Working TEMP. | -40∼+60℃ | |
| | Working Humidity | 20∼90%RH, non-condensing | |
| | Storage TEMP. Humidity | -40~+80℃,10~95%RH | |
| | TEMP .coefficient | ±0.03%/℃ (0~50℃) | |
| | Vibration | $10{\sim}500$ Hz $_{\odot}$ 2G 12min./1 cycle,period for 72min. each along X,Y,Z axes | |
| Safety& EMC | Safety standards | UL8750+UL1310 Class 2 unit | |
| | Withstand voltage | I/P-O/P:1500VAC | |
| | Isolation resistance | I/P-O/P: 100MΩ/500VDC/25℃/70%RH | |
| | EMC EMISSION | FCC Part 15 B | |
| Others | Net. Weight | 1.07kg=0.55(driver)+0. 52kg(J12-1) | |
| | Size | 350*77*37mm (L*W*H) | |
| | Packing | 430*375*190mm 20PCS/CTN | |

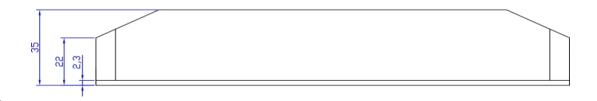

Notes

- 1. All parameters if NOT specially mentioned are measured at 120VAC input , rated load and 25 $^{\circ}$ C of ambient temperature.
- 2. To extend the driver's using life ,please reduce the loading at lower input voltage.
- 3.Loading should be 5-100%.

■ Mechanical Specification for KVP series 60W Phase/Triac Dimmable driver

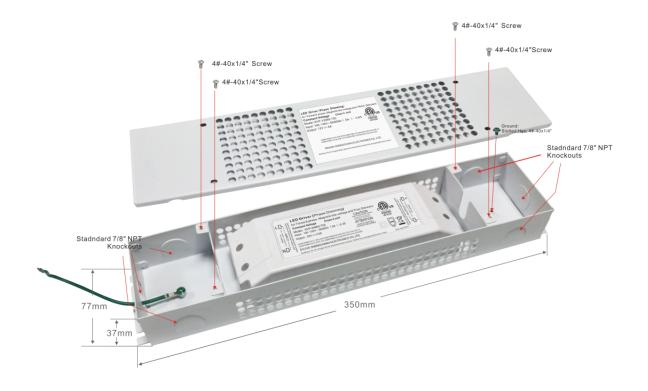

■ Label

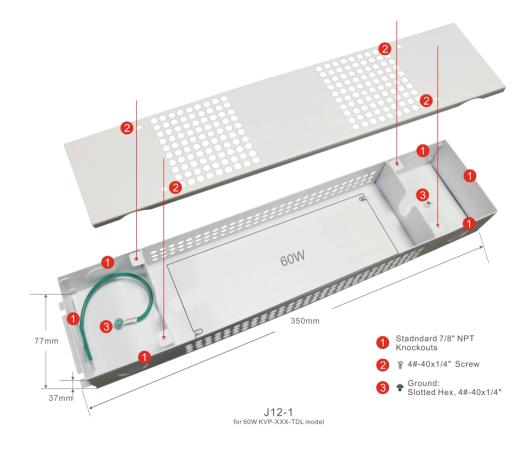

- Input (L) and (N) with wires to be connected AC.
- ※ Output: (LED+) (LED-)

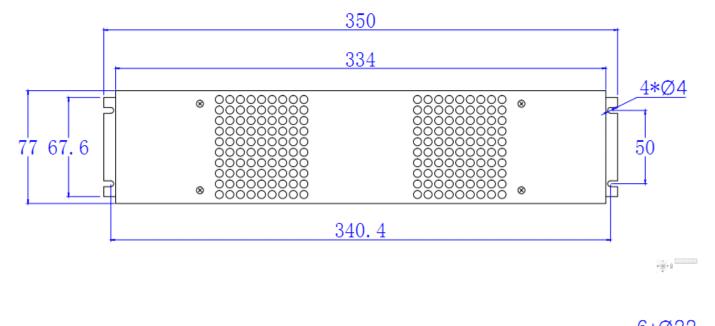

■ Mechanical Specification for 60W Phase/Triac Dimmable Driver with junction box J12-1

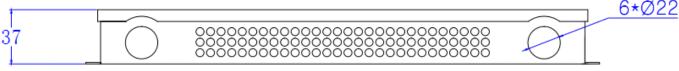

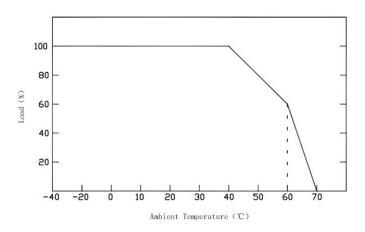

■ Dimming Operation

- *The Pulse-Width Modulation (PWM) of output voltage can be adjusted through input terminal of the AC phase line(L) by connection a triac dimmer.
- **Usually matching with leading edge/Forward Phase Triac Dimmers (Can customized as a driver only matching trailing edge/reverse phase Triac Dimmers if needed).
- **Please try to use dimmers with power at least 2.5 times as the output power of the driver.
- %for Forward phase, Magnetic low voltage and Triac Dimmers

■ Warning

- Prevent to reverse polarity;
- *Risk of Electric Shock. When used outdoors, install only on a circuit protected by a Class A GFCI;
- * Risk of Fire. Installation involves special wiring methods to run wiring through a building structure. Consult a qualified electrician;
- *Risk of Electric Shock. Mount the unit at a height greater than 1 foot from the ground surface.

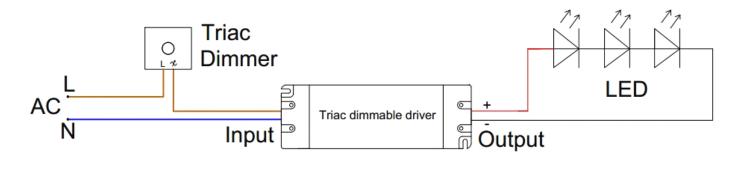

■ Derating Curve

**To extend their life, please refer to the Derating Curve and derate according to the temperature
